

TET~CRAFT

An Emergent Simulation of Quantum Chemistry & Metaphysical Reality

A kleinverse of tetrahedrons that bond into atoms, react, and evolve into complex molecules. Each TET represents a quantum fact that can combine with others to form understanding.

The Fundamental Unit: A Quantum of Fact

Property 1: Geometry

4 faces, colored White, Black, Red, Cyan.

Property 2: Energy

An internal "Battery" with a charge from 0 to 1.

Property 3: Polarity

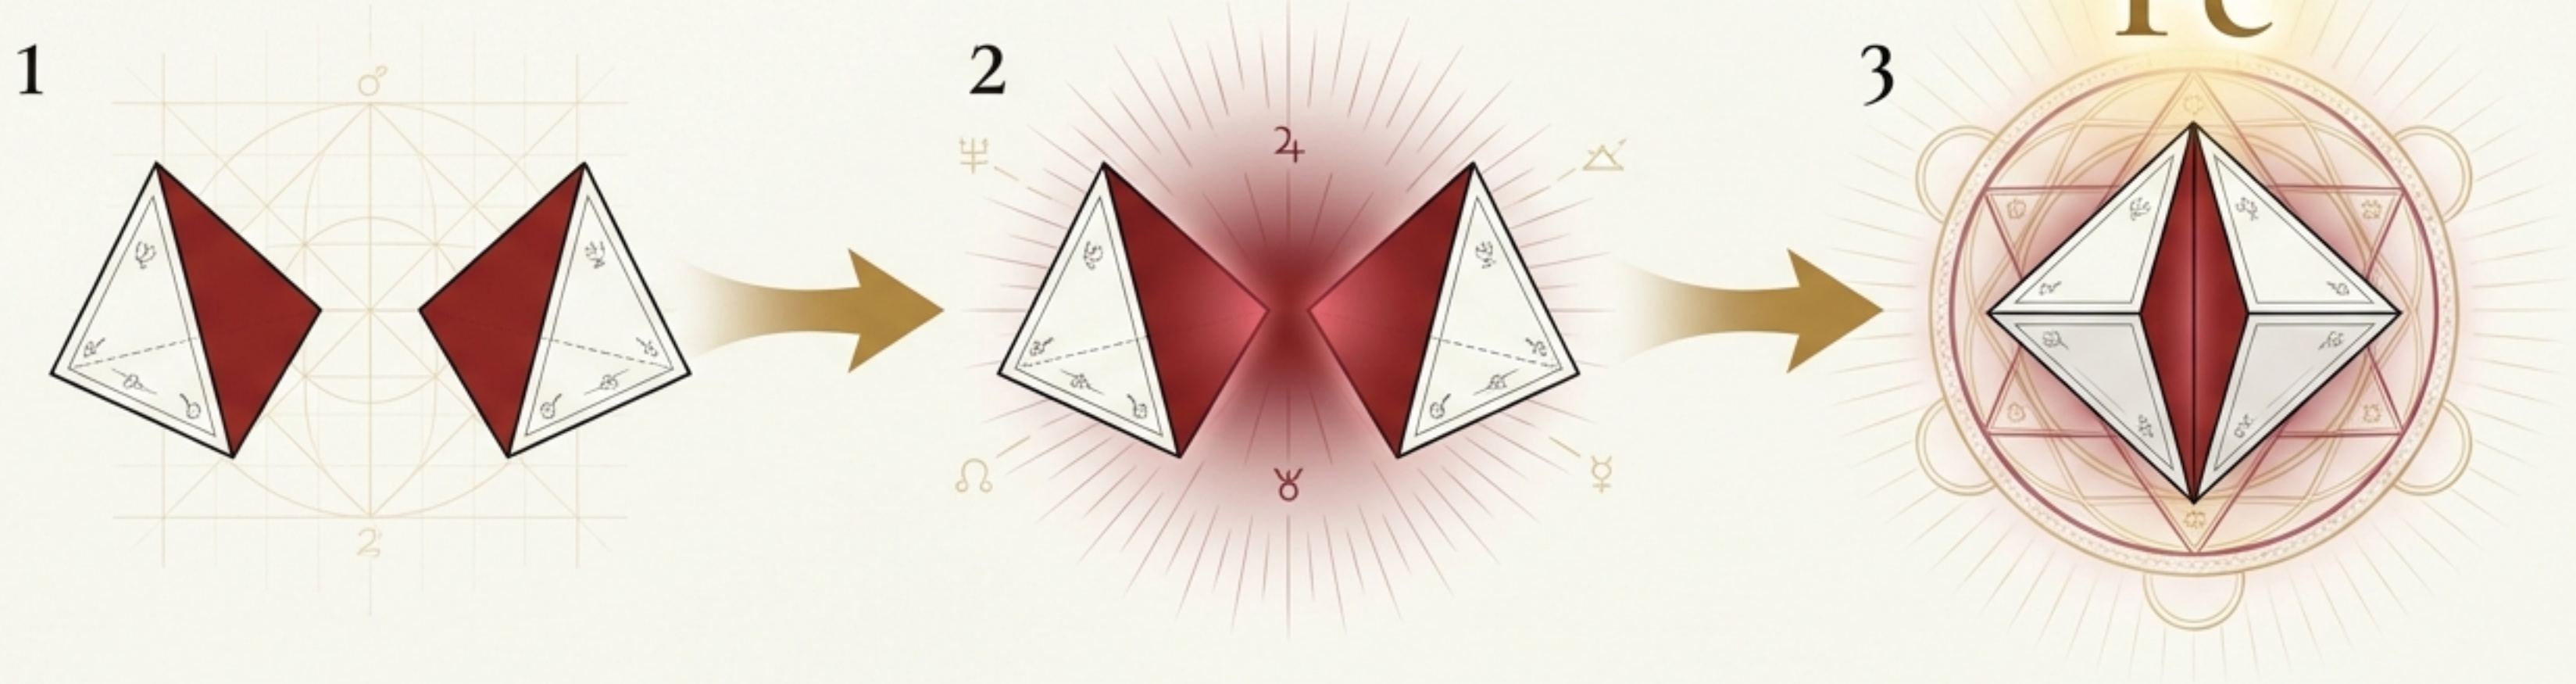

A magnetic polarity, either positive (+) or negative (-).

These simple properties are the complete genetic code for everything that will emerge in the universe.

The First Law: Geometry is Destiny

In this universe, elements are not defined by labels, but by how they connect.
The specific faces that touch determine the essence of what is created.

Cyan Face ↔ Red Face → **Hydrogen (H)**

White Face ↔ White Face → **Carbon (C)**

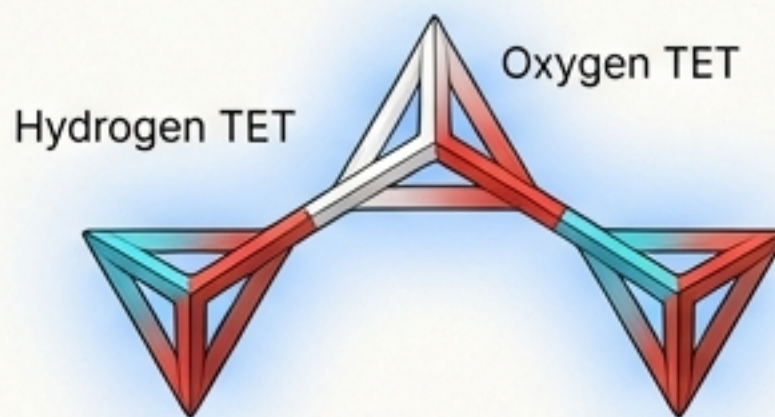

Red Face ↔ Red Face → **Iron (Fe)**

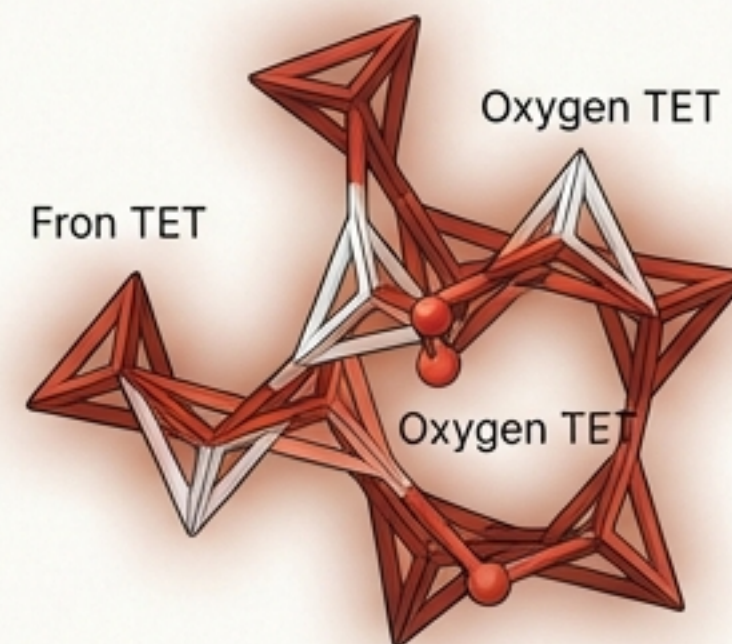

From Interfaces to Molecules

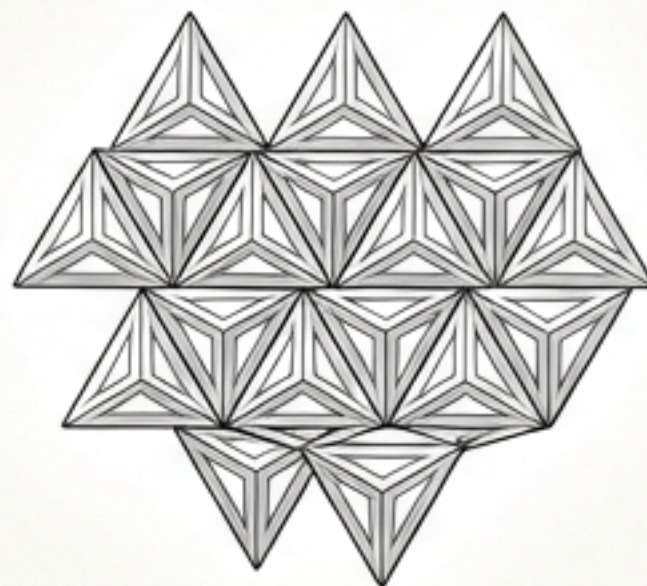

By combining elemental TETs, the system simulates over 50 real-world catalyzable reactions, forming a rich and dynamic chemistry.

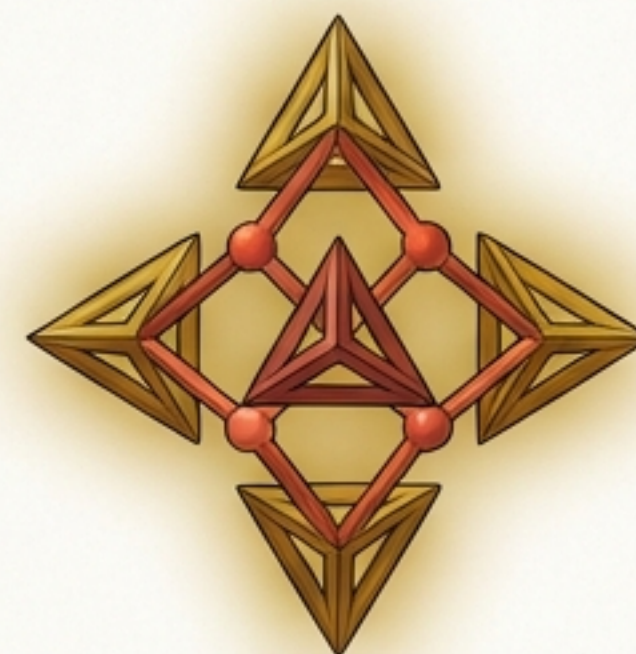

H₂O (Water)

Fe₂O₃ (Rust)

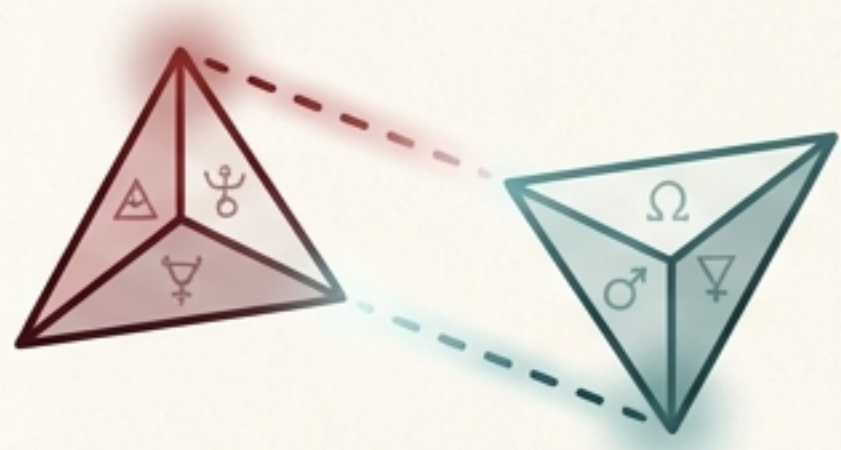

C (Diamond)

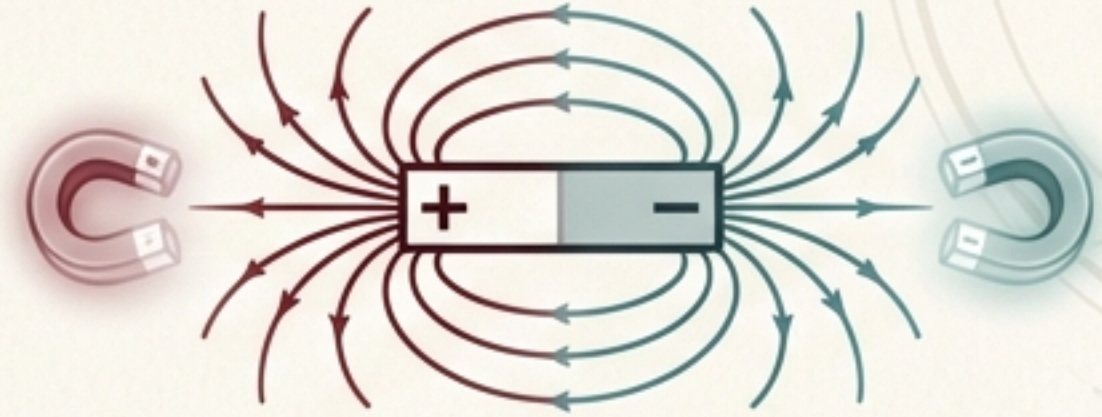

FeO₄ (Catalyst)

The Forces of Interaction

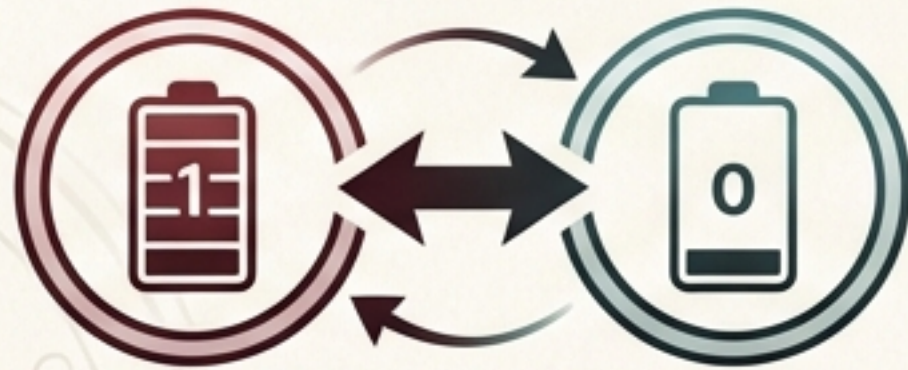

1. Corner Desires

Red corners seek Cyan corners, and vice versa. This is the fundamental "spooky action at a distance" or quantum entanglement.

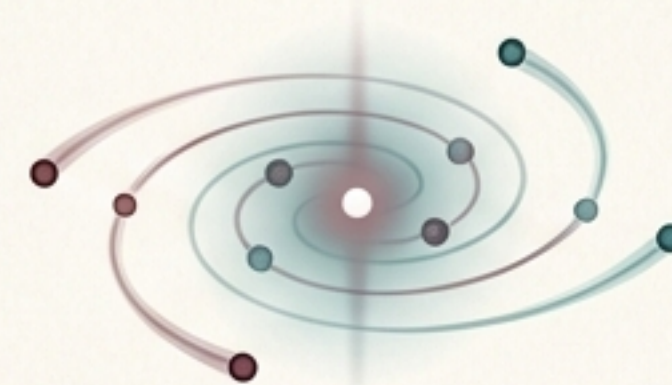

2. Magnetism

Opposite polarities attract, creating torque and alignment. This governs orientation and structure.

3. Energy Oscillation

Bonded magnetic pairs exchange 'emptiness' (1 - battery), creating a constant flow of energy across the system.

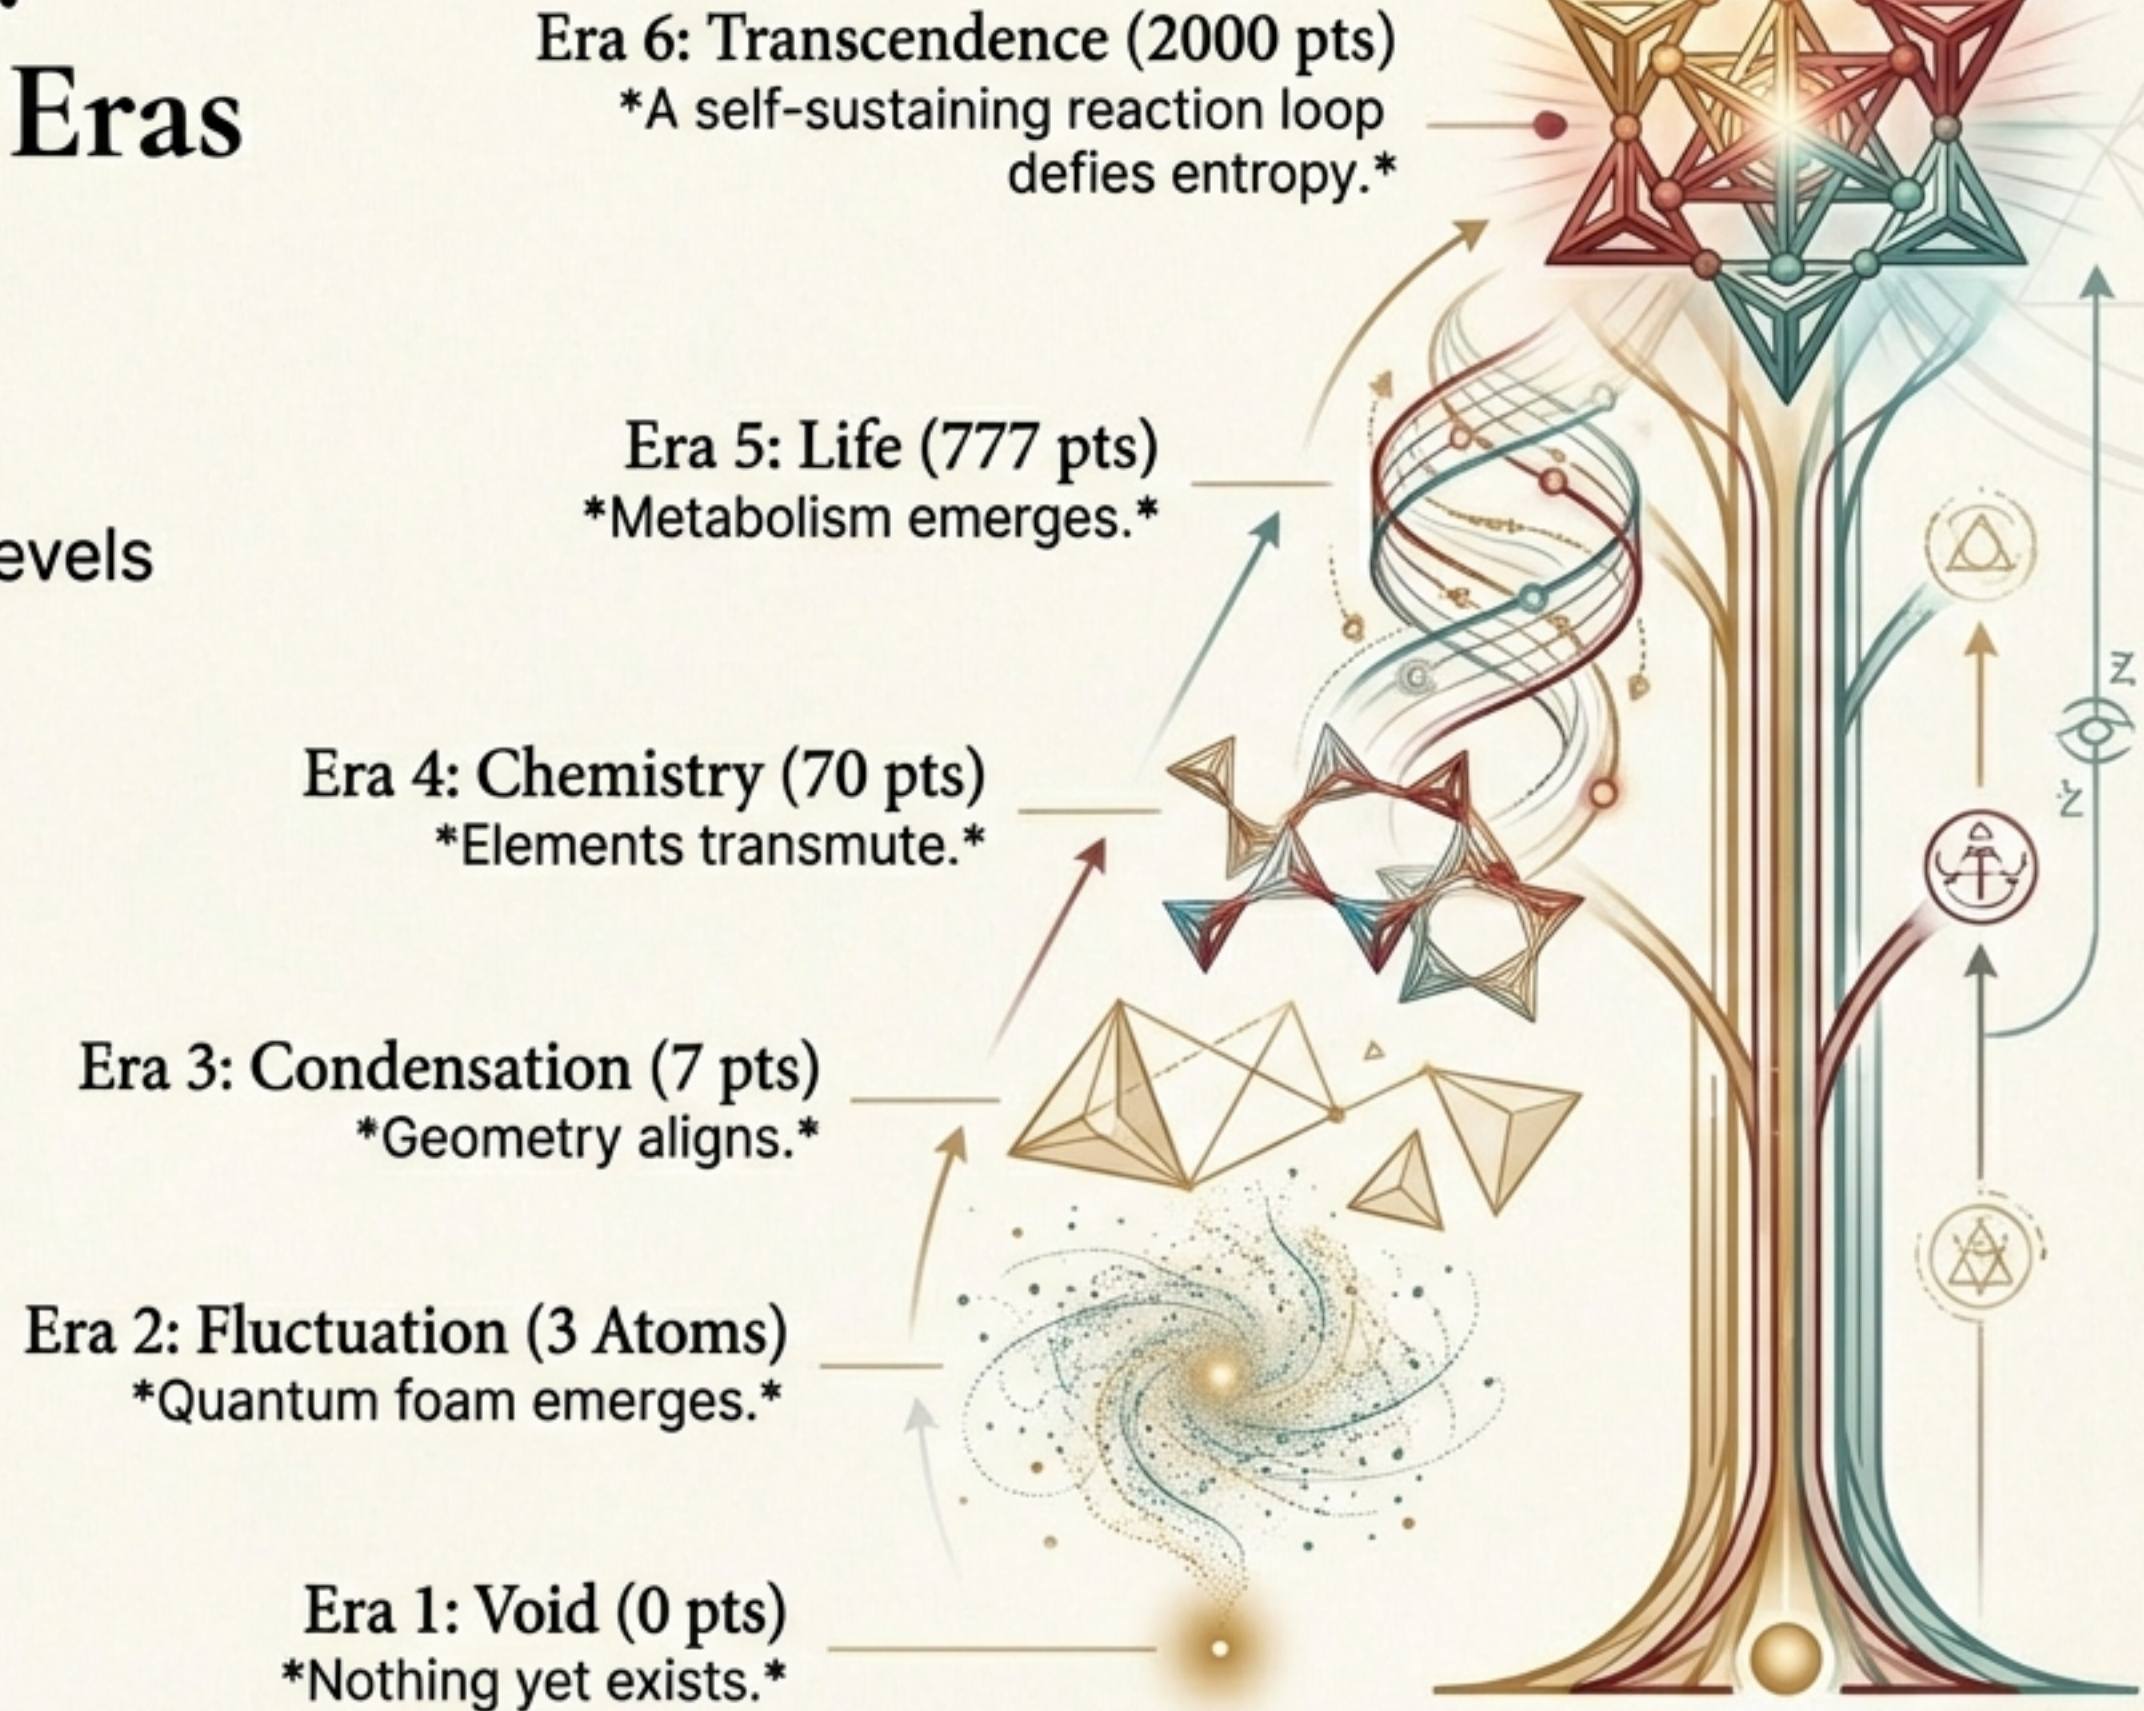

4. Gravity / Cohesion

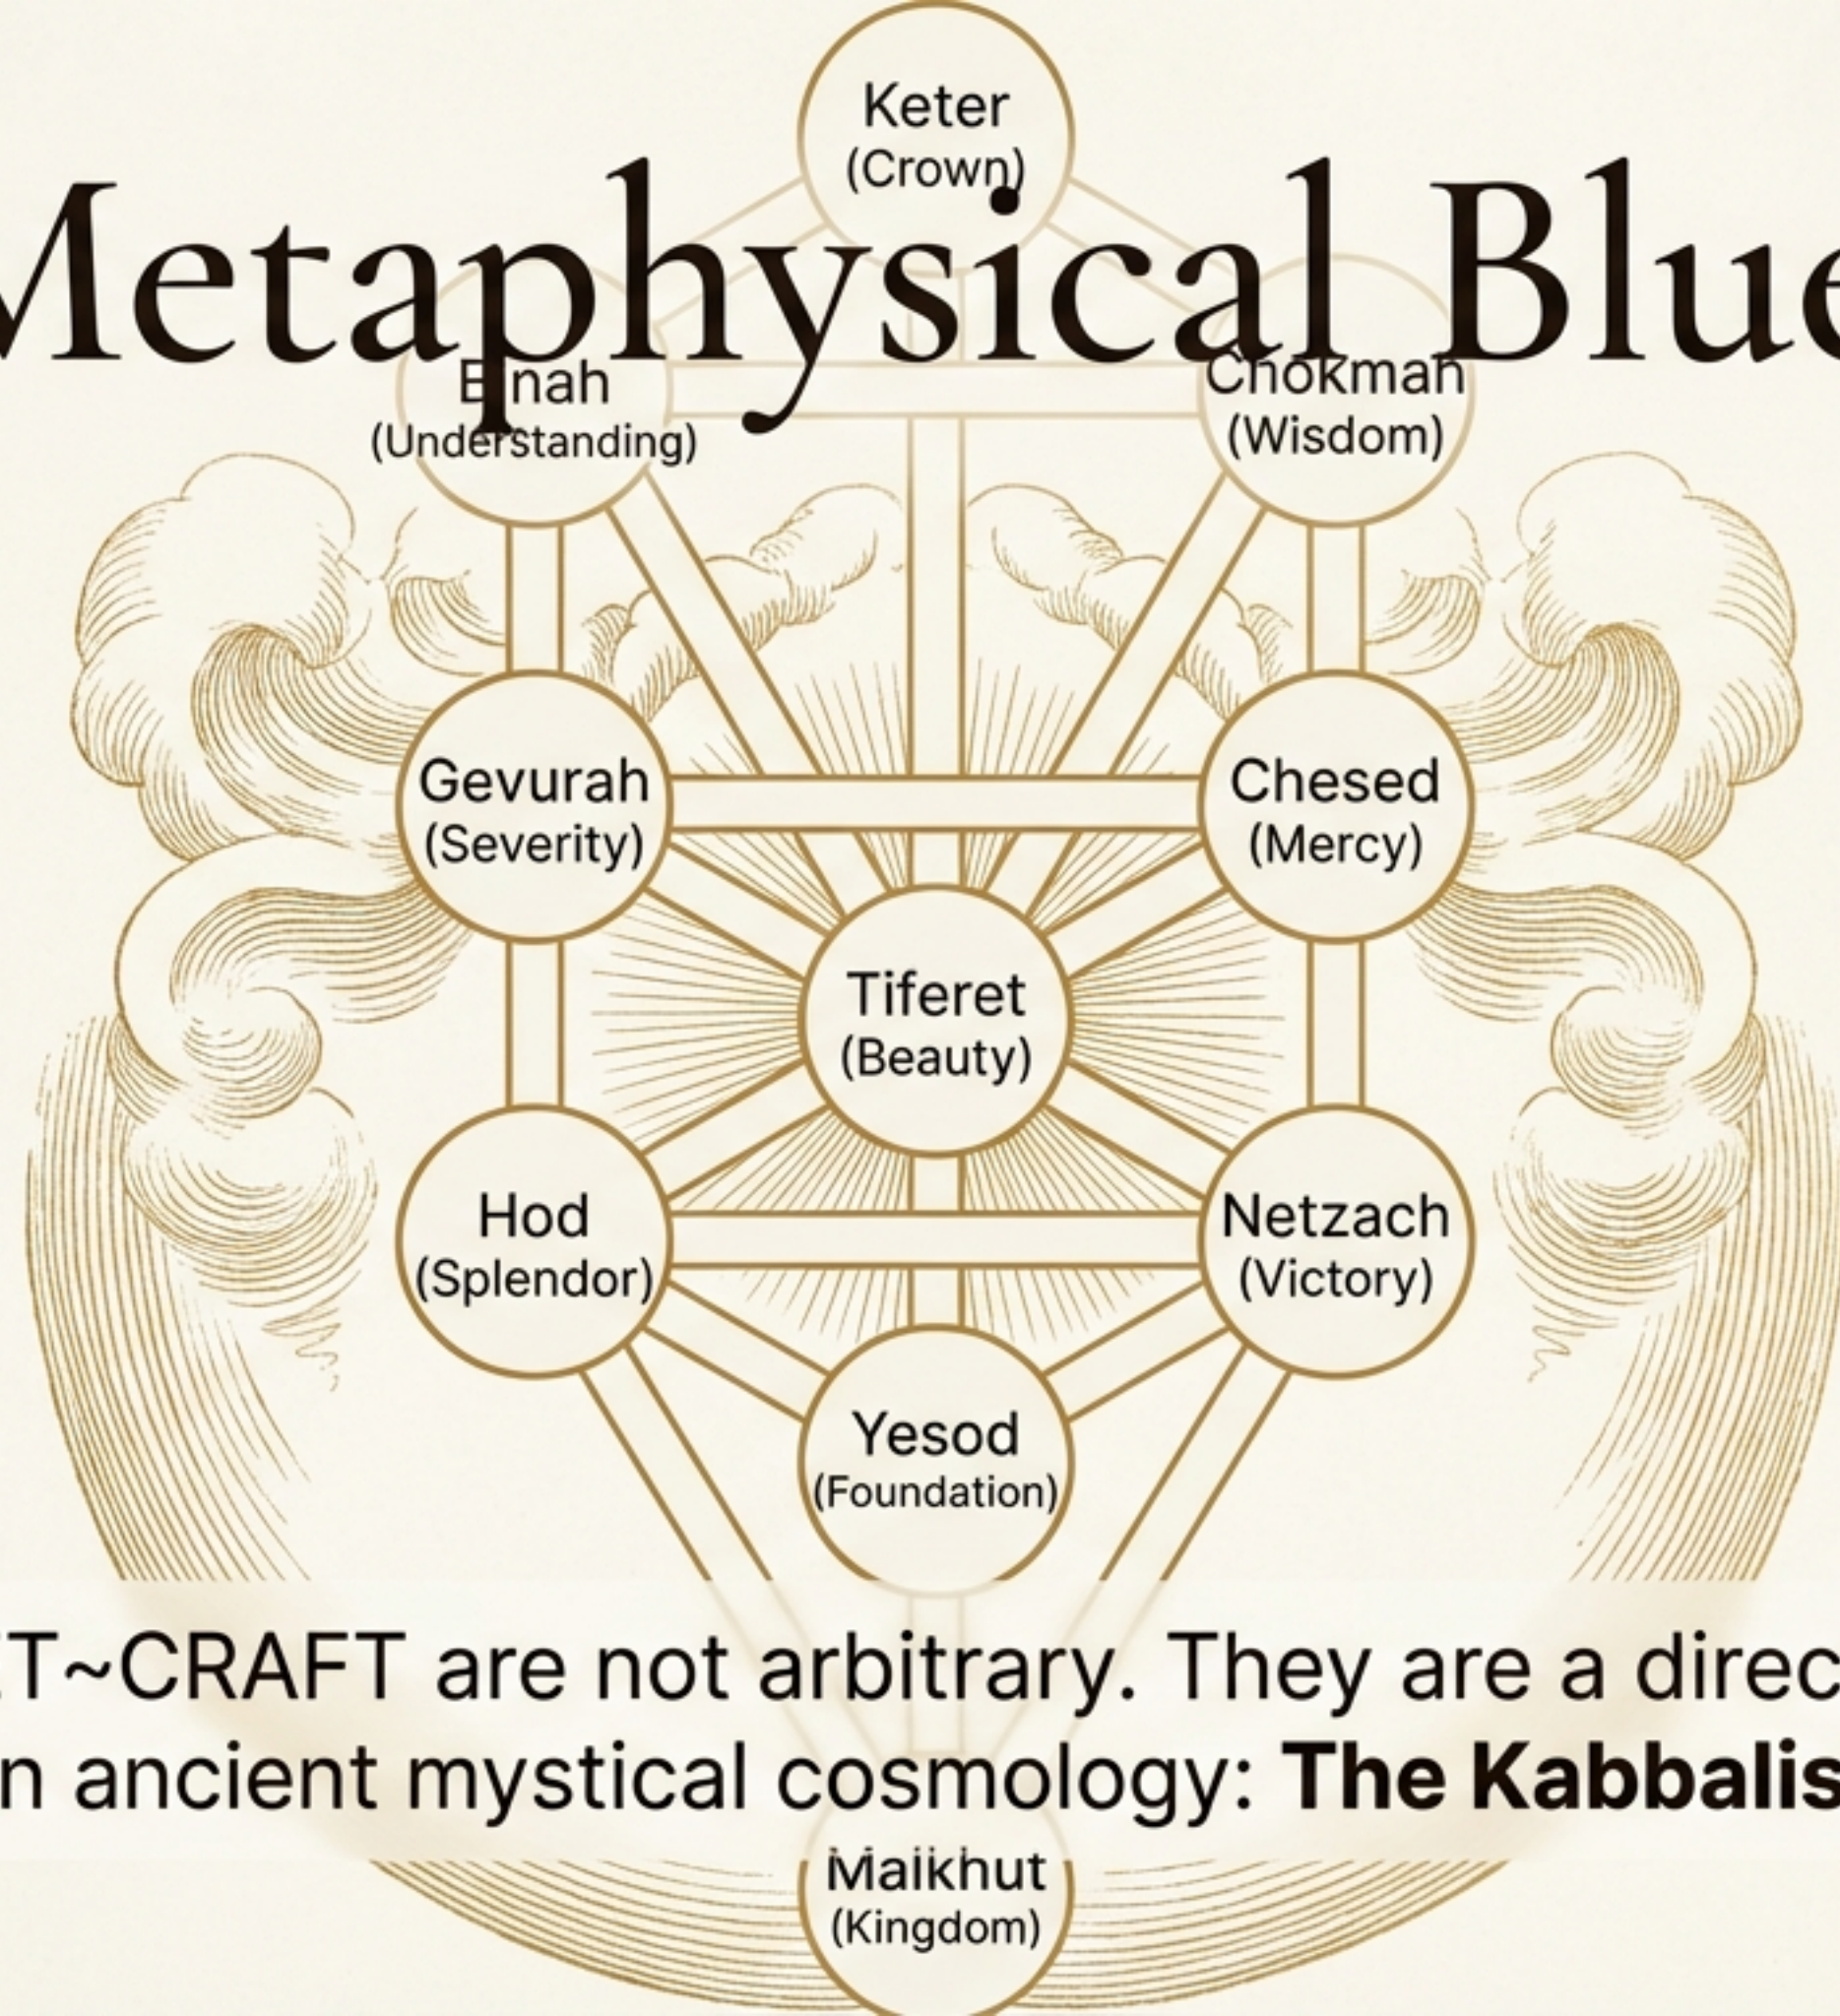

A singularity at the center creates a positional drift (K_UNIFIED_FORCE), a gentle pull preventing the universe from dissolving into chaos.

The Cosmic Ladder: A Journey Through Eras

Progress is not measured by time, but by Complexity and Entropy reduction. New eras are unlocked when the universe achieves new levels of stable, geometric organization.

The Metaphysical Blueprint

The rules of TET~CRAFT are not arbitrary. They are a direct computational translation of an ancient mystical cosmology: **The Kabbalistic Tree of Life.**

The Player as Prime Observer

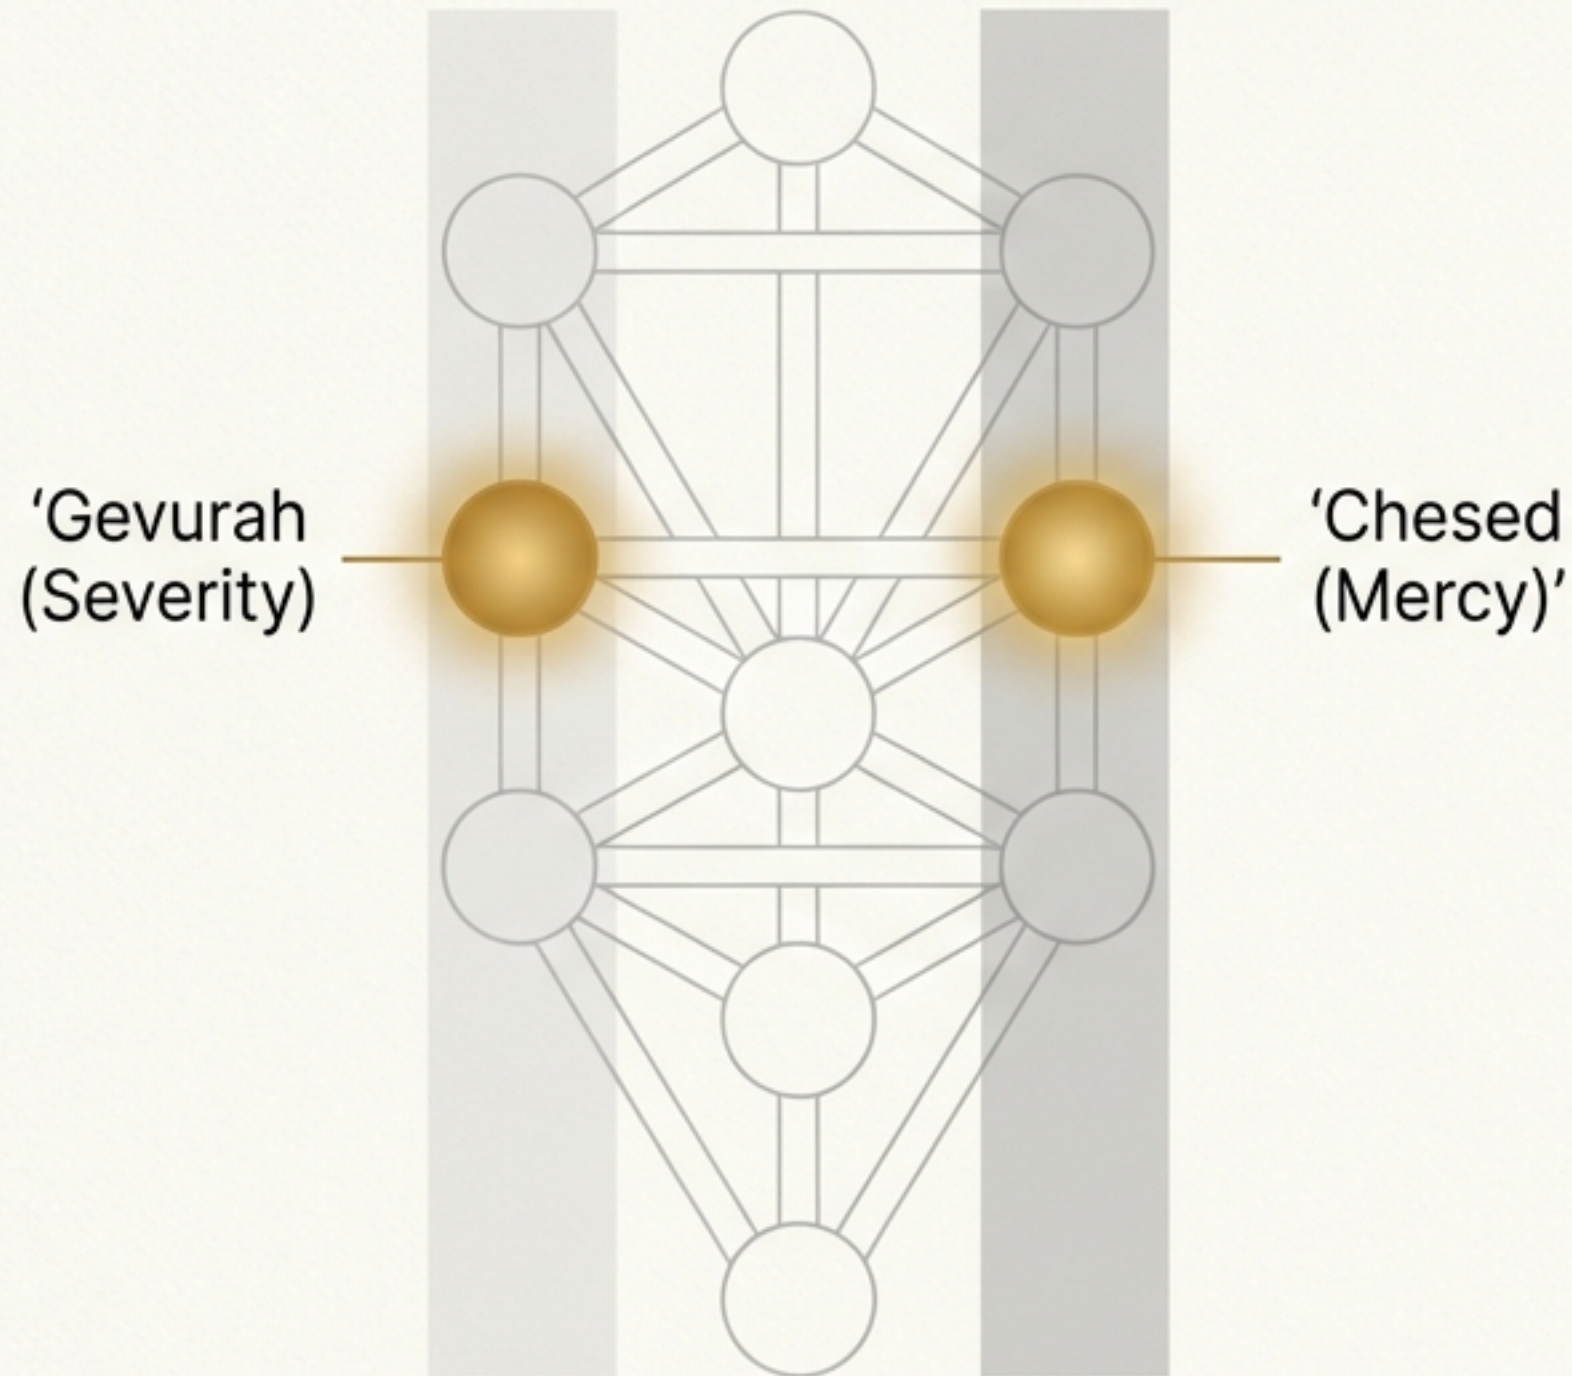

Keter (Crown)

The initial spark of creation, pure consciousness,
the "Supreme Will" that precedes all else.

Simulation Correspondence

- **The Player:** Pressing SPACE creates a new TET, a new "fact" to be understood. The player is the observer missing from quantum theory.
- **The Singularity:** The gravitational center of the universe represents the source (Keter) from which all emerges and the destination to which all returns.

The Pillars of Mercy and Severity

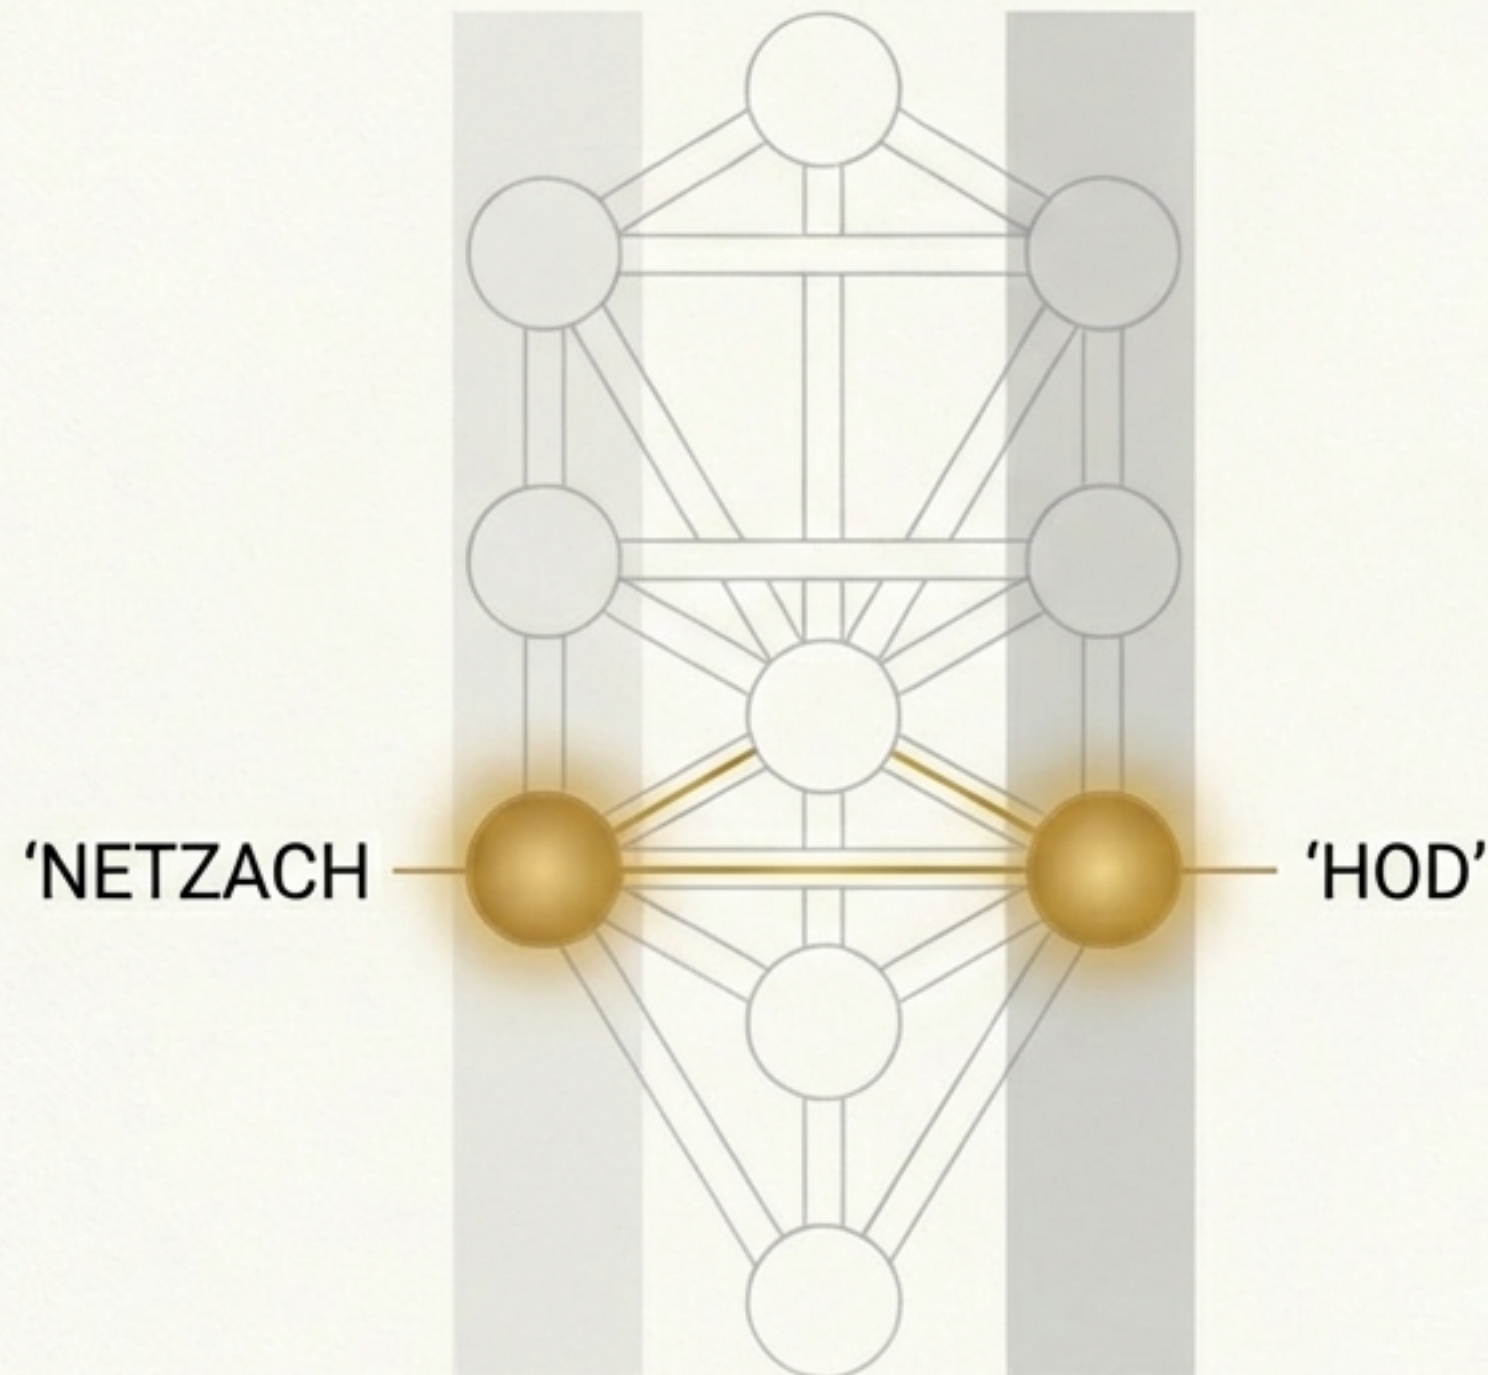

Technical Detail

K_STICKY_PULL: The fundamental attraction between TETs, which creates bonds and forms structures.

Metaphysical Correspondence

Chesed (Mercy) & Gevurah (Severity): This force mirrors the cosmic dance between expansion (pulling together) and limitation (maintaining separation). **This creative tension generates all relationships.**

The Eternal Oscillation

Technical Detail

Magnetism: Positive and negative polarities create torque and alignment, governing the orientation of all structures.

Metaphysical Correspondence

Netzach (Victory) & Hod (Splendor): This mirrors the axis of active, projective energy (Netzach) and passive, receptive form (Hod). Their eternal oscillation sustains the world.

The Point of Harmony and Beauty

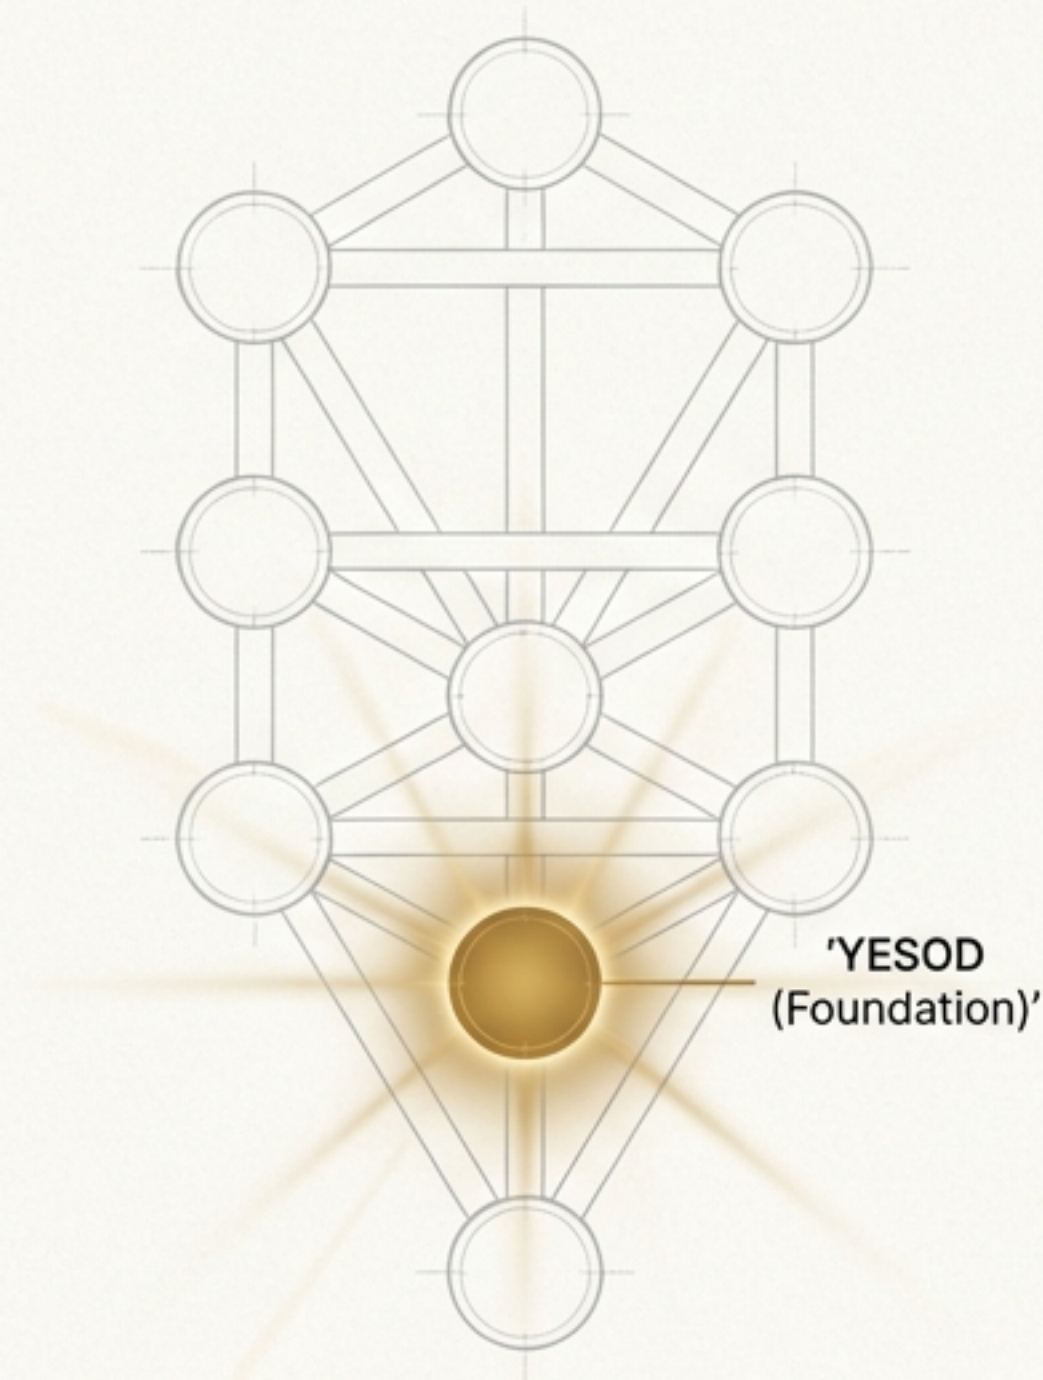

Technical Detail

****Corner Desires****: The specific rule that Red corners actively seek Cyan corners, creating powerful directional bonds.

Metaphysical Correspondence

****Tiferet (Beauty)****: This targeted attraction embodies the principle of harmony. It is the balance point that reconciles opposites, where contradictory forces (colors) seek union to create something greater than their parts.

The Foundation of the Physical World

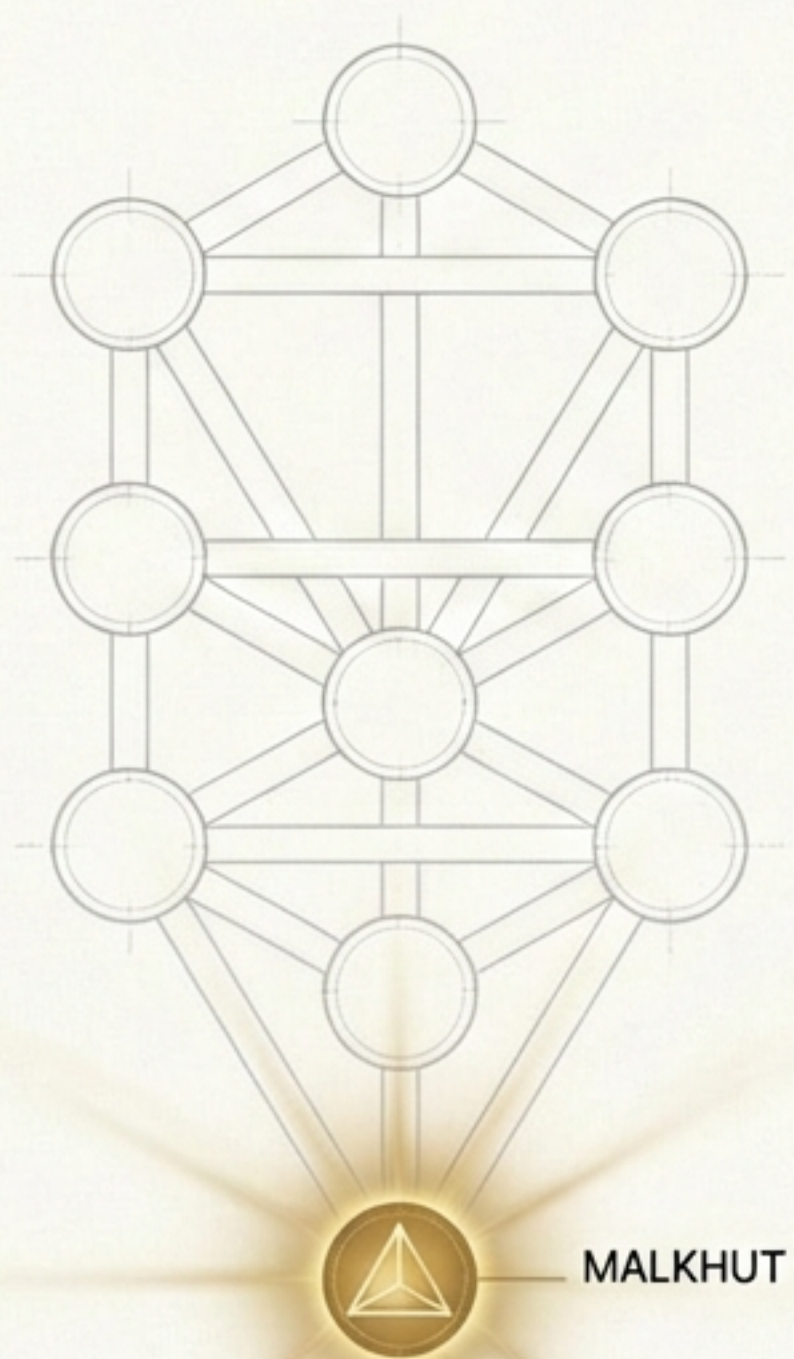

Technical Detail

Chemical Reactions: Synthesis ($A + B \rightarrow C$) and decomposition ($C \rightarrow A + B$) are the processes by which new, complex forms are created and broken down.

Metaphysical Correspondence

Yesod (Foundation): This reflects the realm where potential forms are actualized. Abstract patterns become concrete compounds, and the memory of the universe (synthesis_count) accumulates.

The Kingdom of Manifested Facts

Technical Detail

****The TET:** A single tetrahedron represents a crystallized quantum fact—the smallest possible unit of reality.

Metaphysical Correspondence

Malkhut (Kingdom): Each TET is a complete but limited expression of the divine pattern above it. It is a 'fact' crystallized from the void, containing the entire structure of the Tree within it in miniature.

The Boundless Light

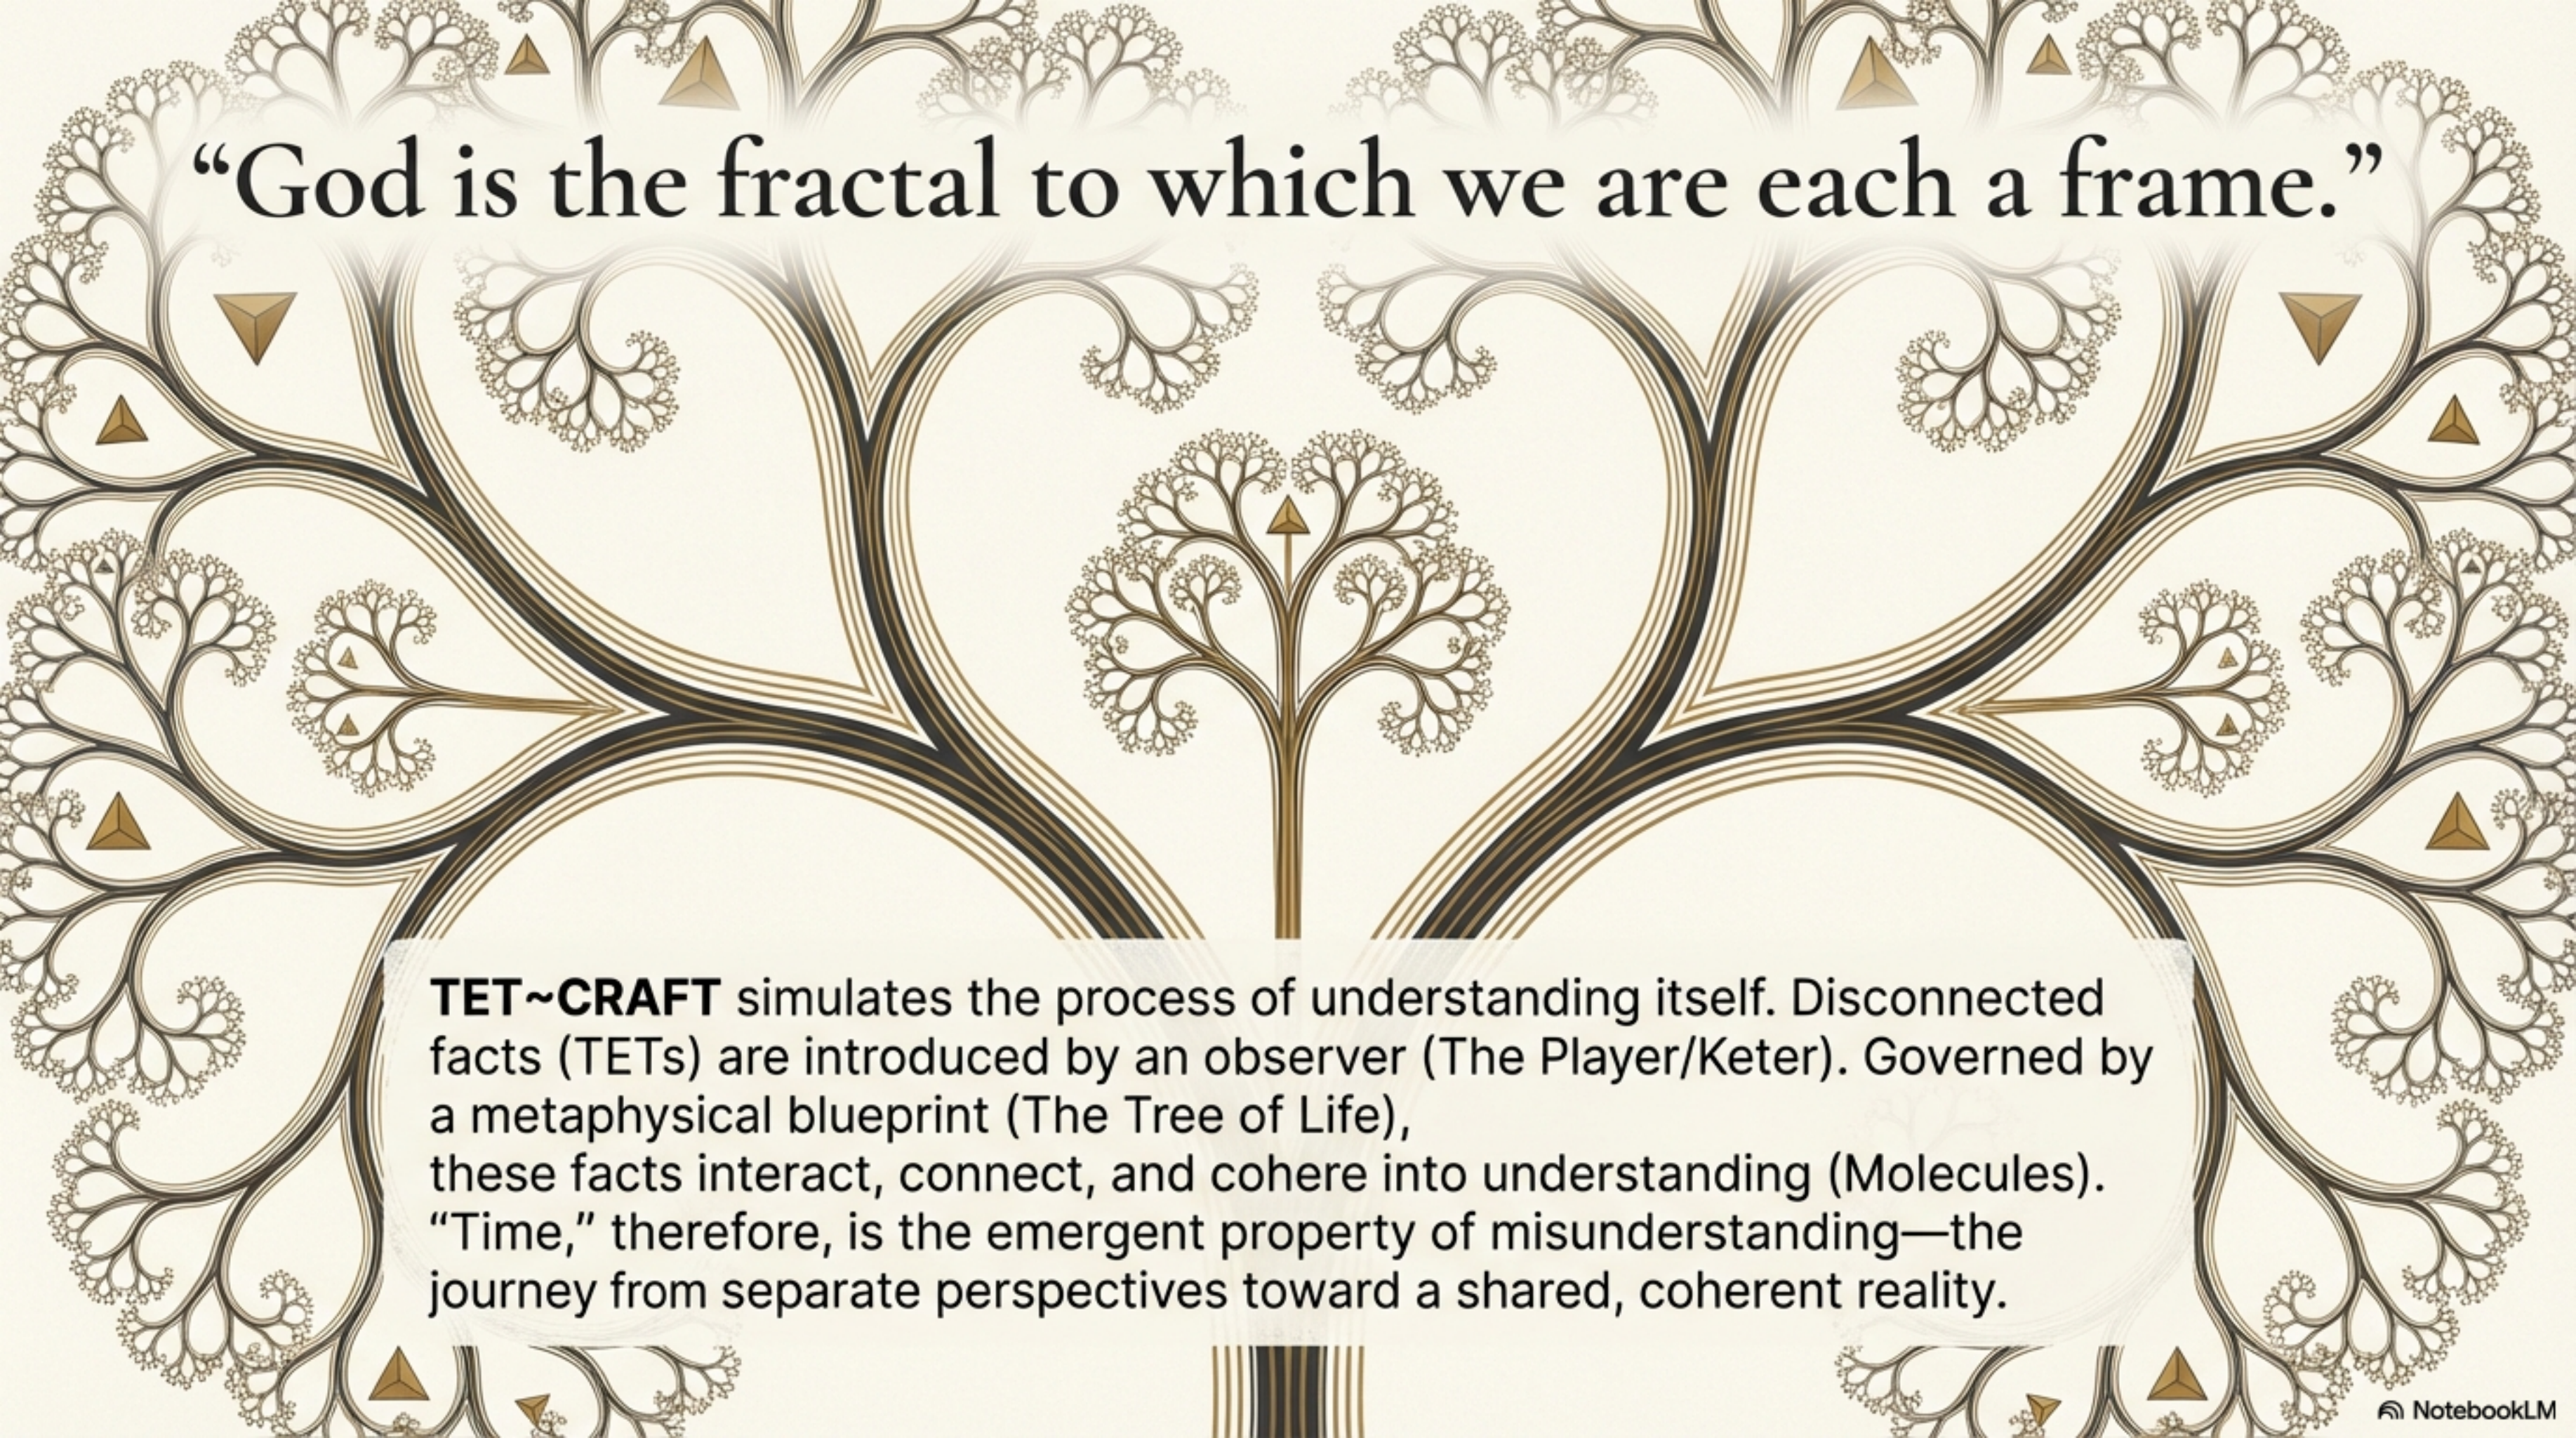

Metaphysical Correspondence

Ain Sof (The Infinite): This sphere represents the boundless, undifferentiated light that precedes and envelops the structured Tree. It is the infinite potential from which all forms emerge and to which they return.

Technical Detail

The 4D Past Projection: The simulation's background is rendered as a shimmering sphere of all past events.

“God is the fractal to which we are each a frame.”

TET~CRAFT simulates the process of understanding itself. Disconnected facts (TETs) are introduced by an observer (The Player/Keter). Governed by a metaphysical blueprint (The Tree of Life), these facts interact, connect, and cohere into understanding (Molecules). “Time,” therefore, is the emergent property of misunderstanding—the journey from separate perspectives toward a shared, coherent reality.
