

TET~CRAFT: Emergent Quantum Chemistry & Metaphysics Simulation

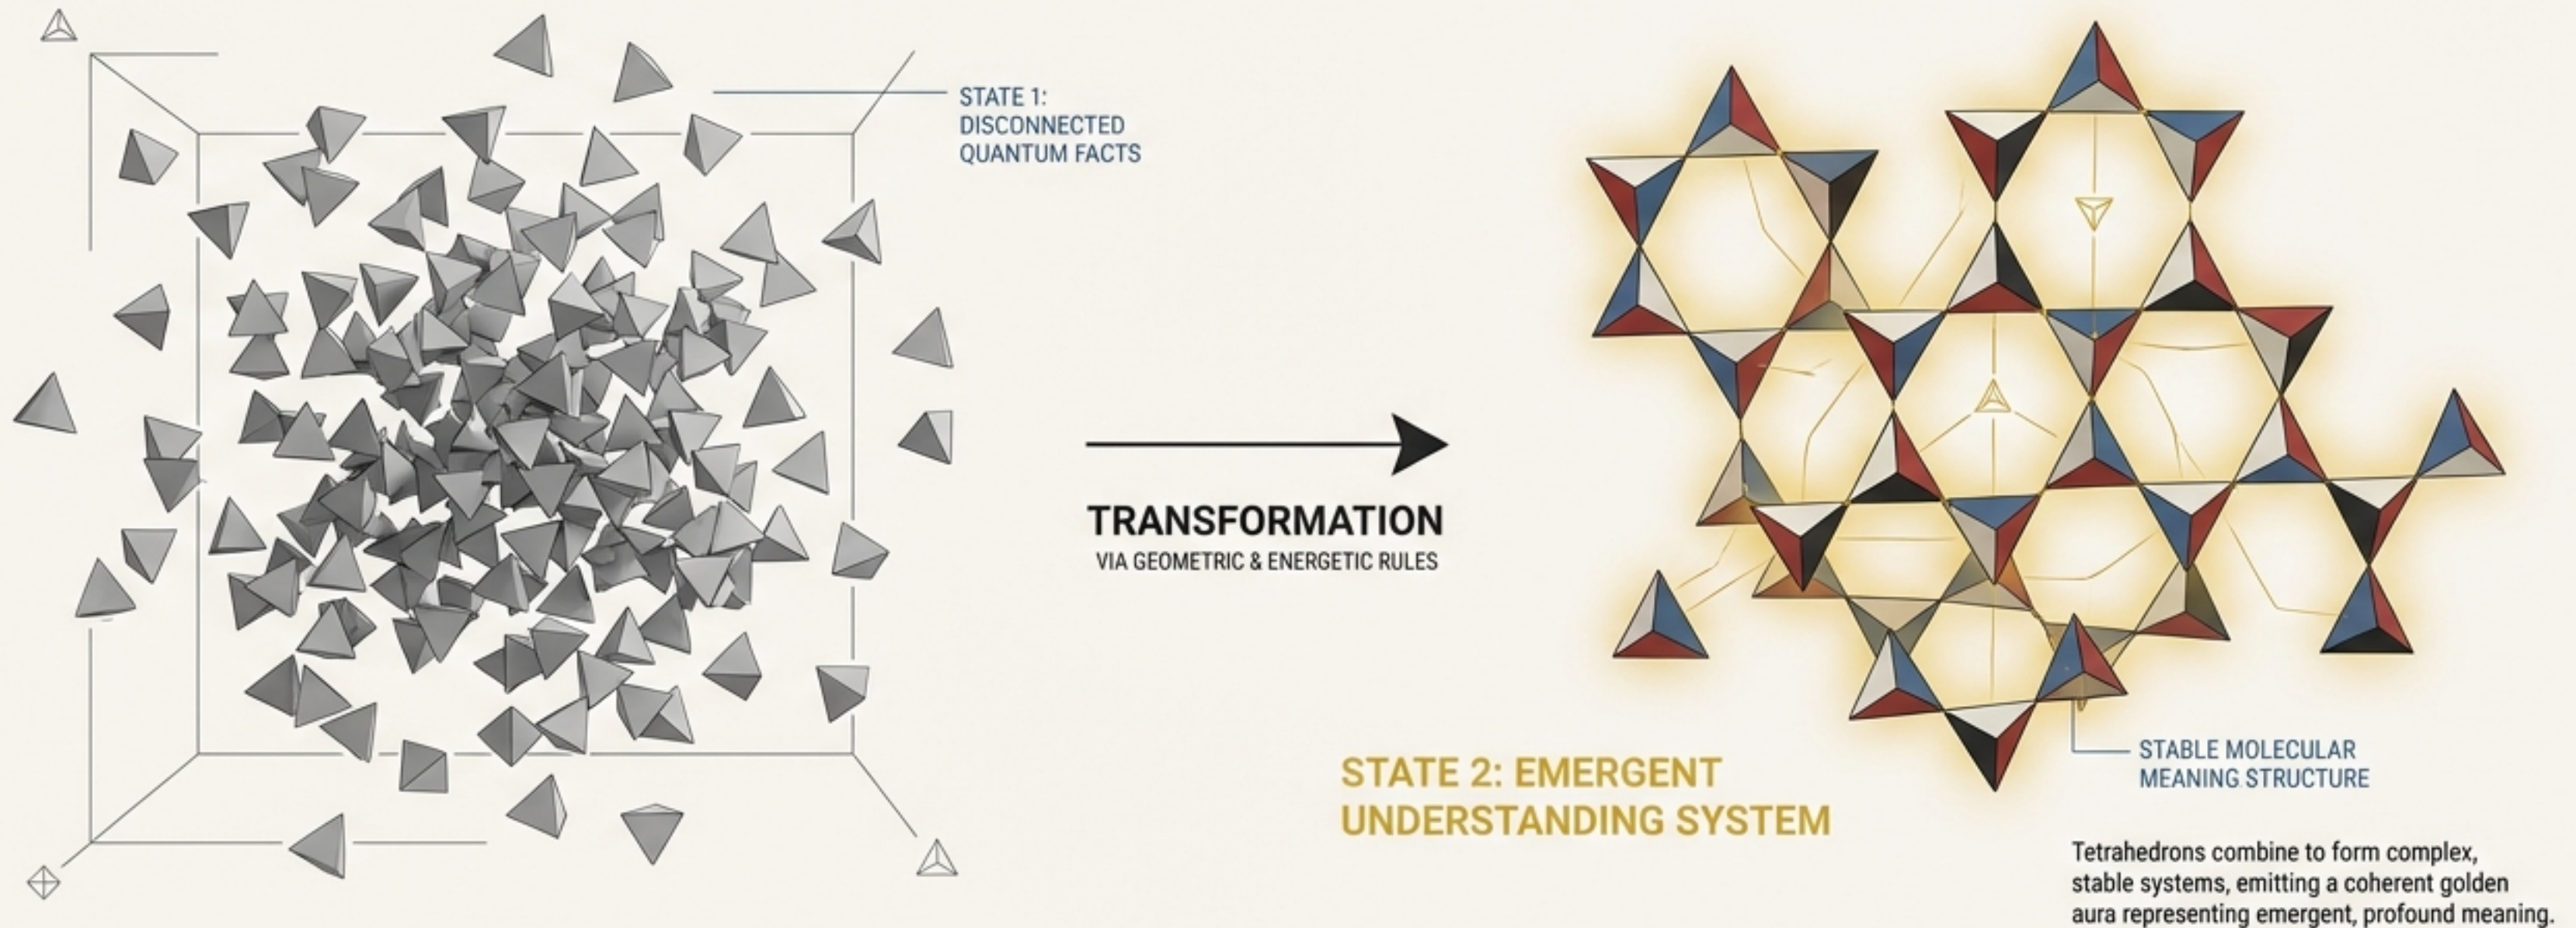

A journey from a single fact to a conscious universe.

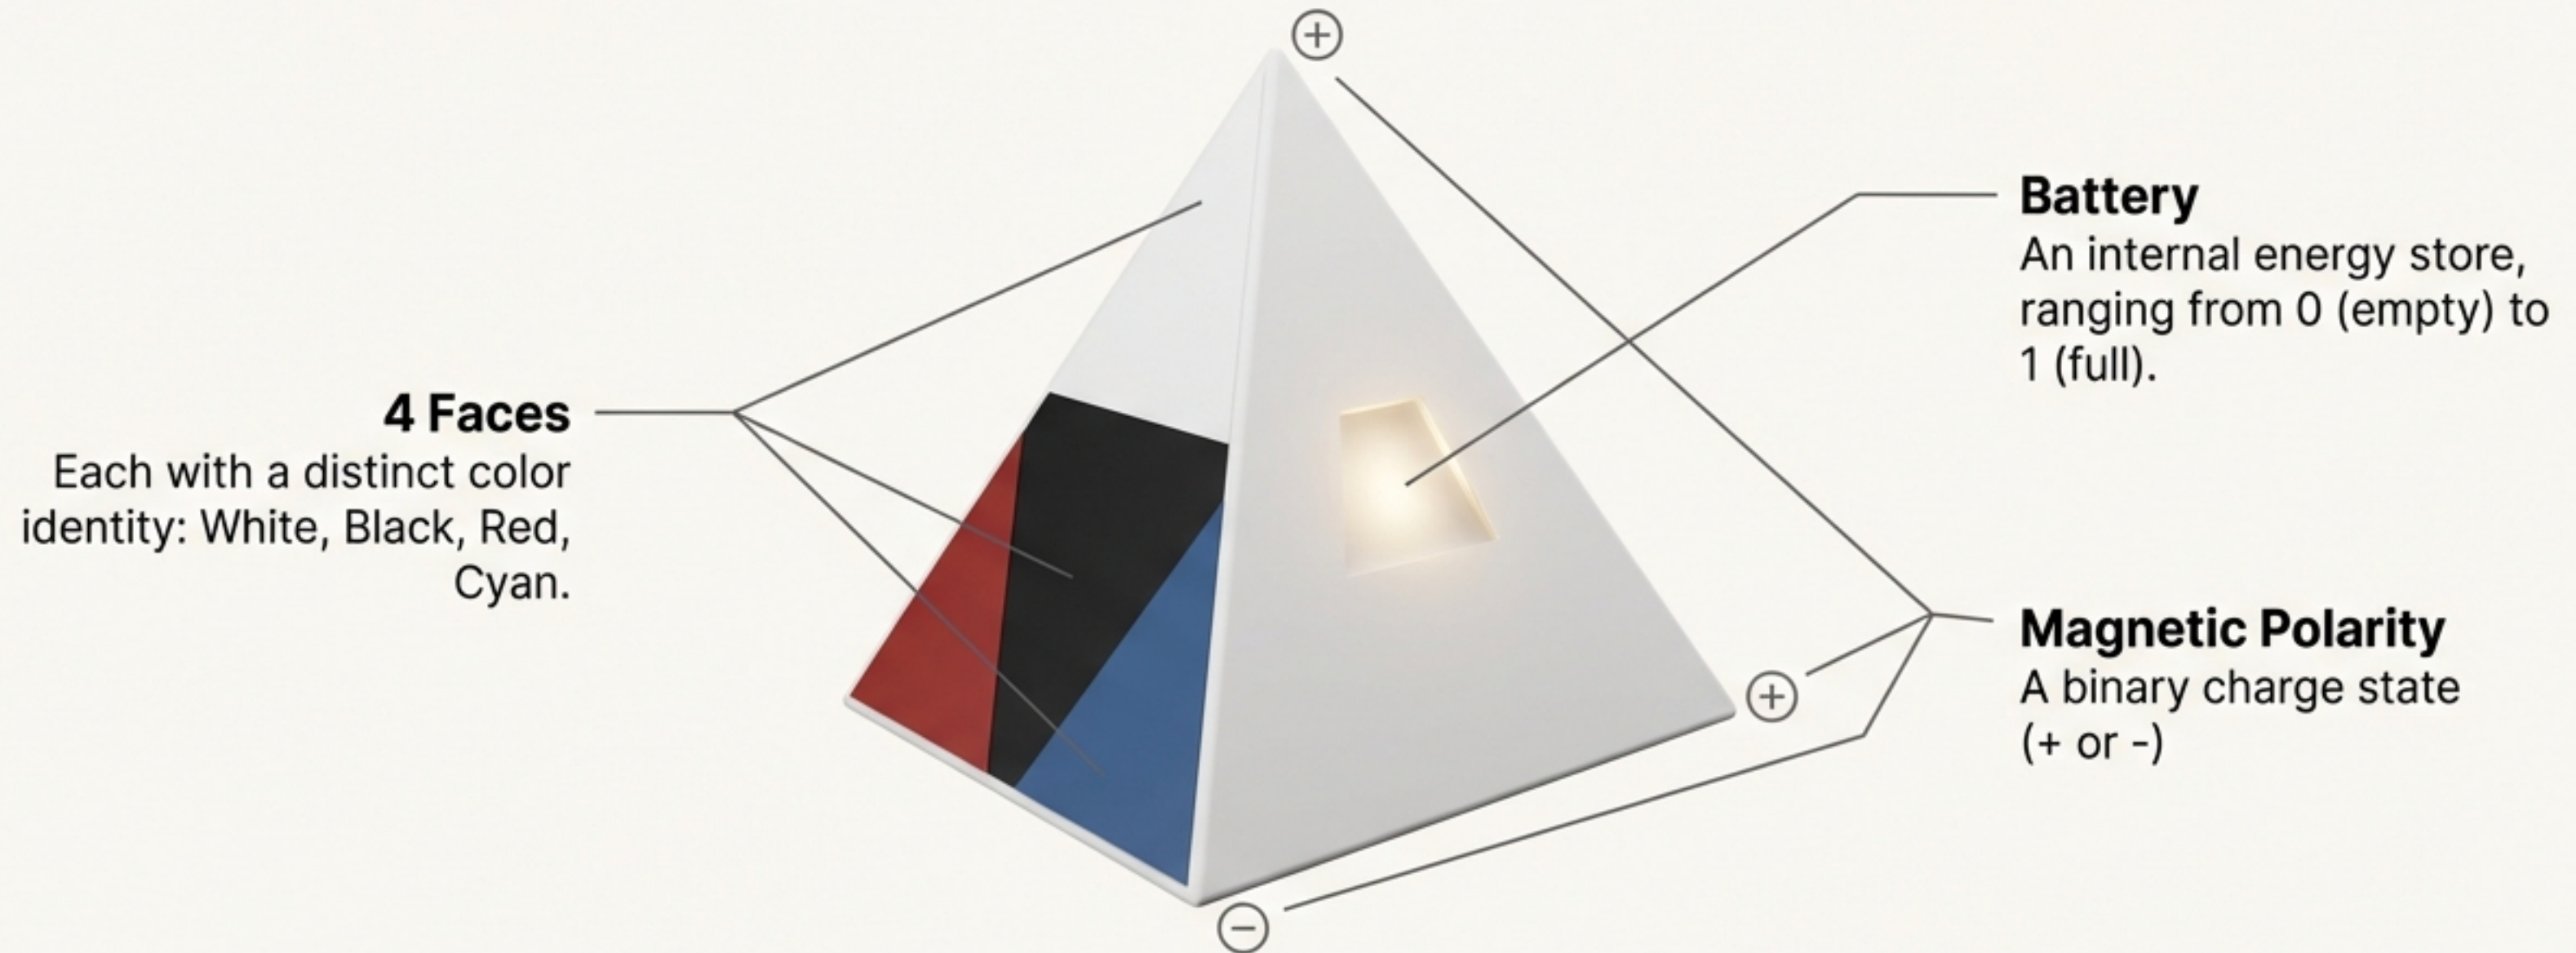

Project Version: v5.3D

Can understanding itself be simulated?

TET-CRAFT is a kleinverse designed to model the formation of complex meaning from simple, disconnected data. Each tetrahedron represents a single quantum fact. Through geometric and energetic rules, these facts combine, react, and evolve into systems of emergent understanding.

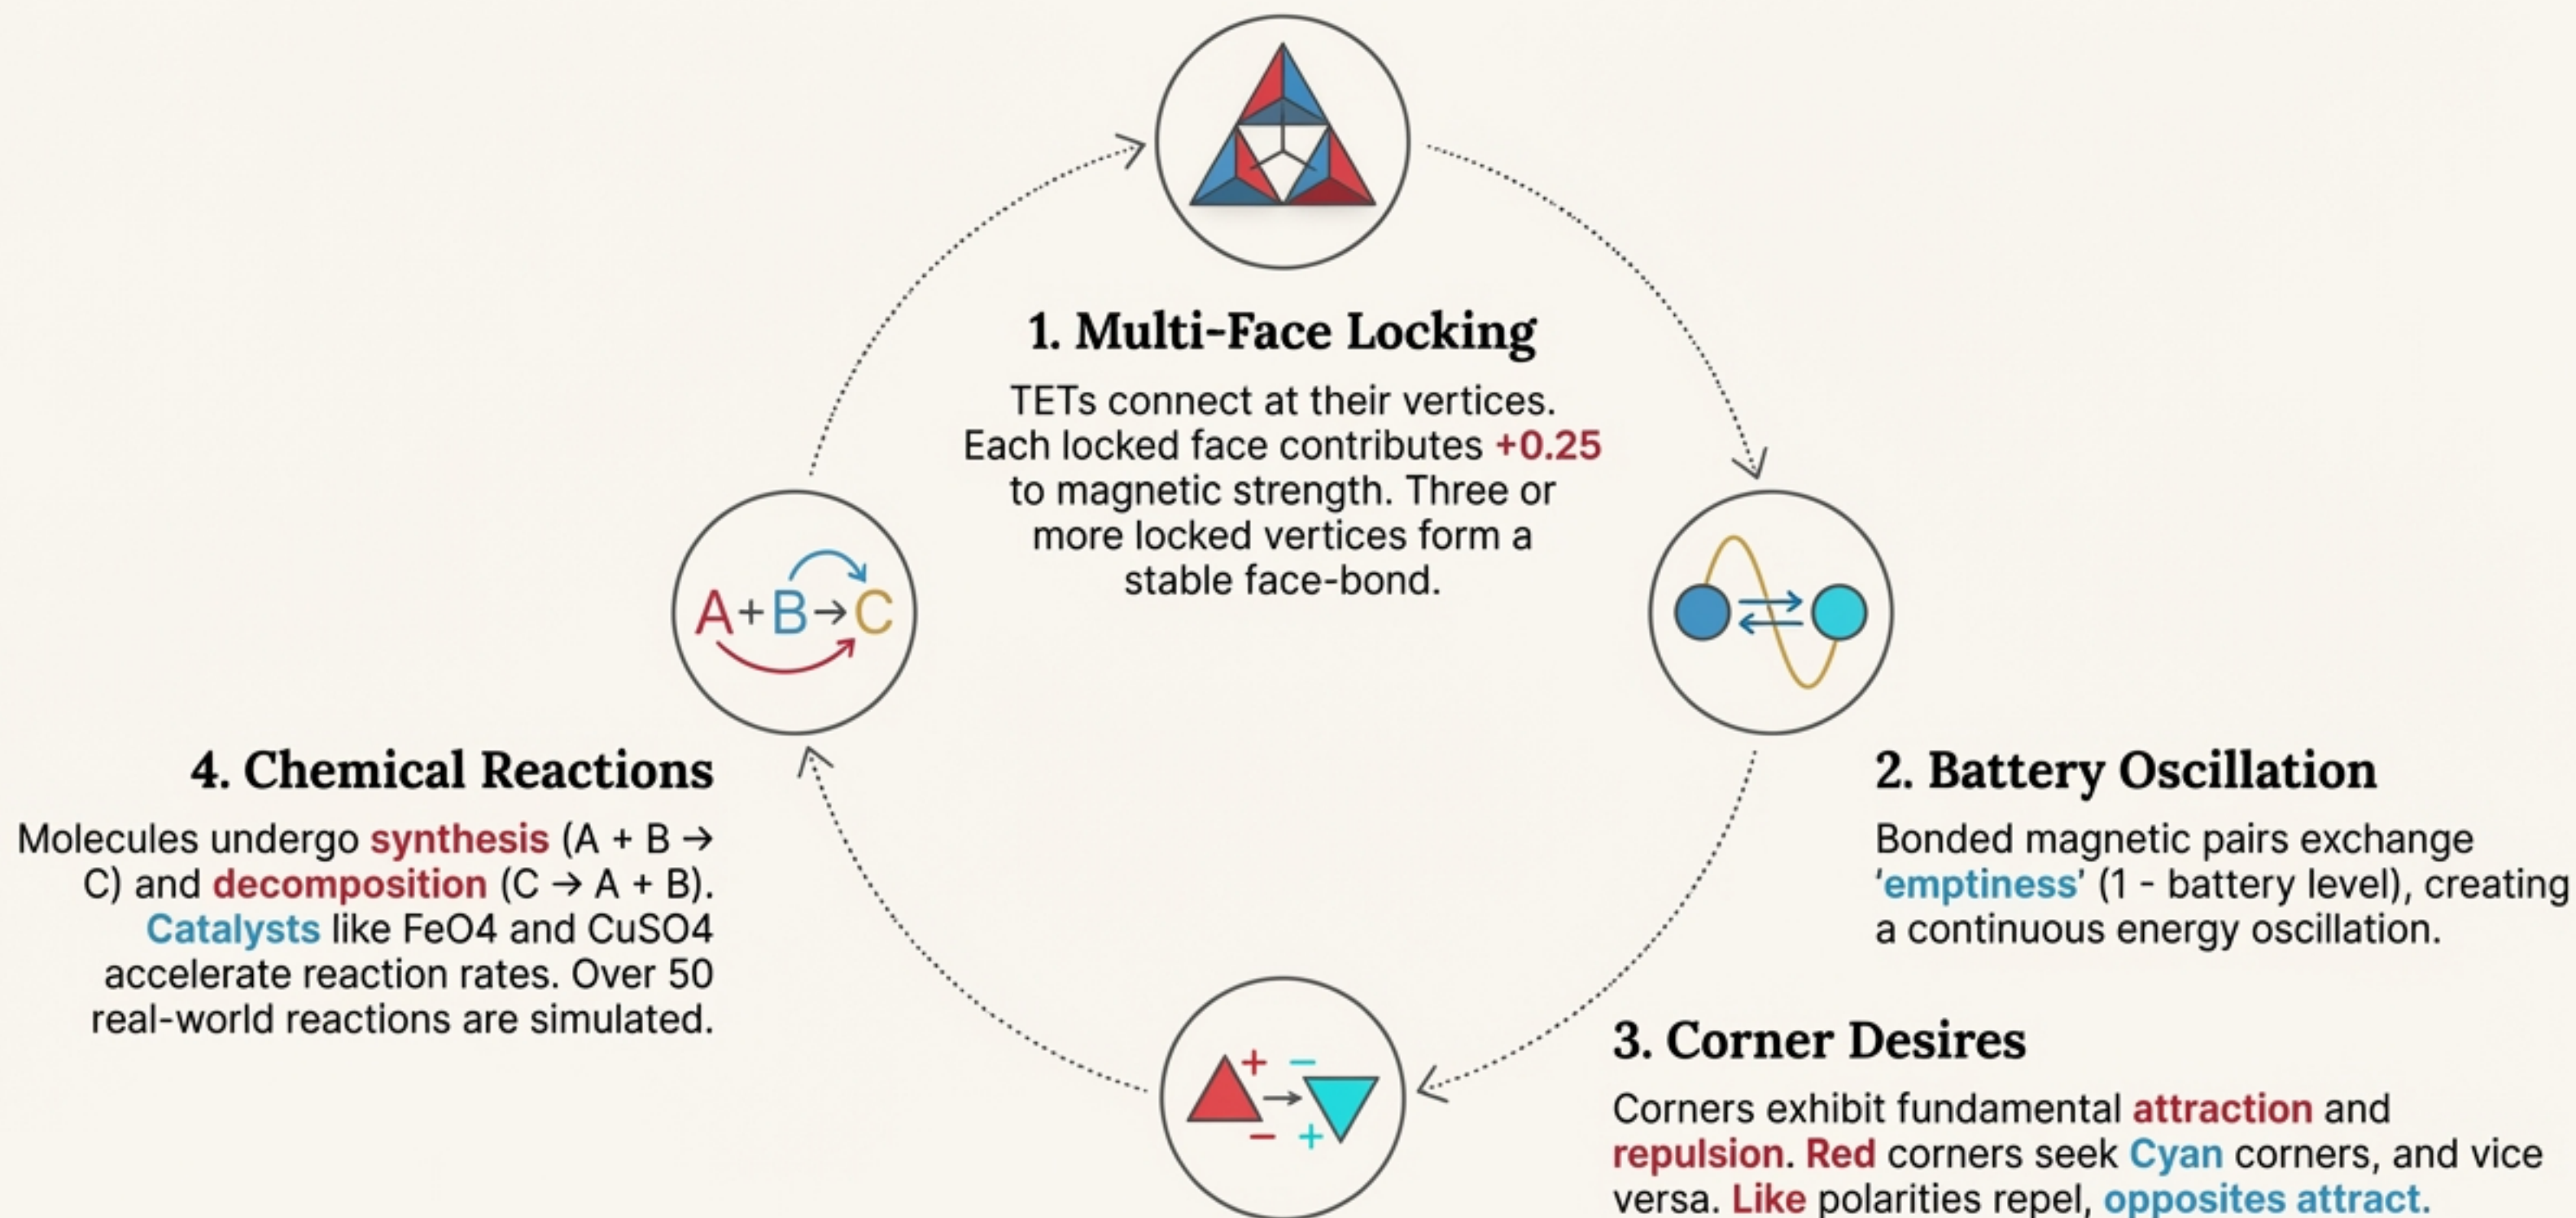

The fundamental unit of reality is a quantum fact: The TET.

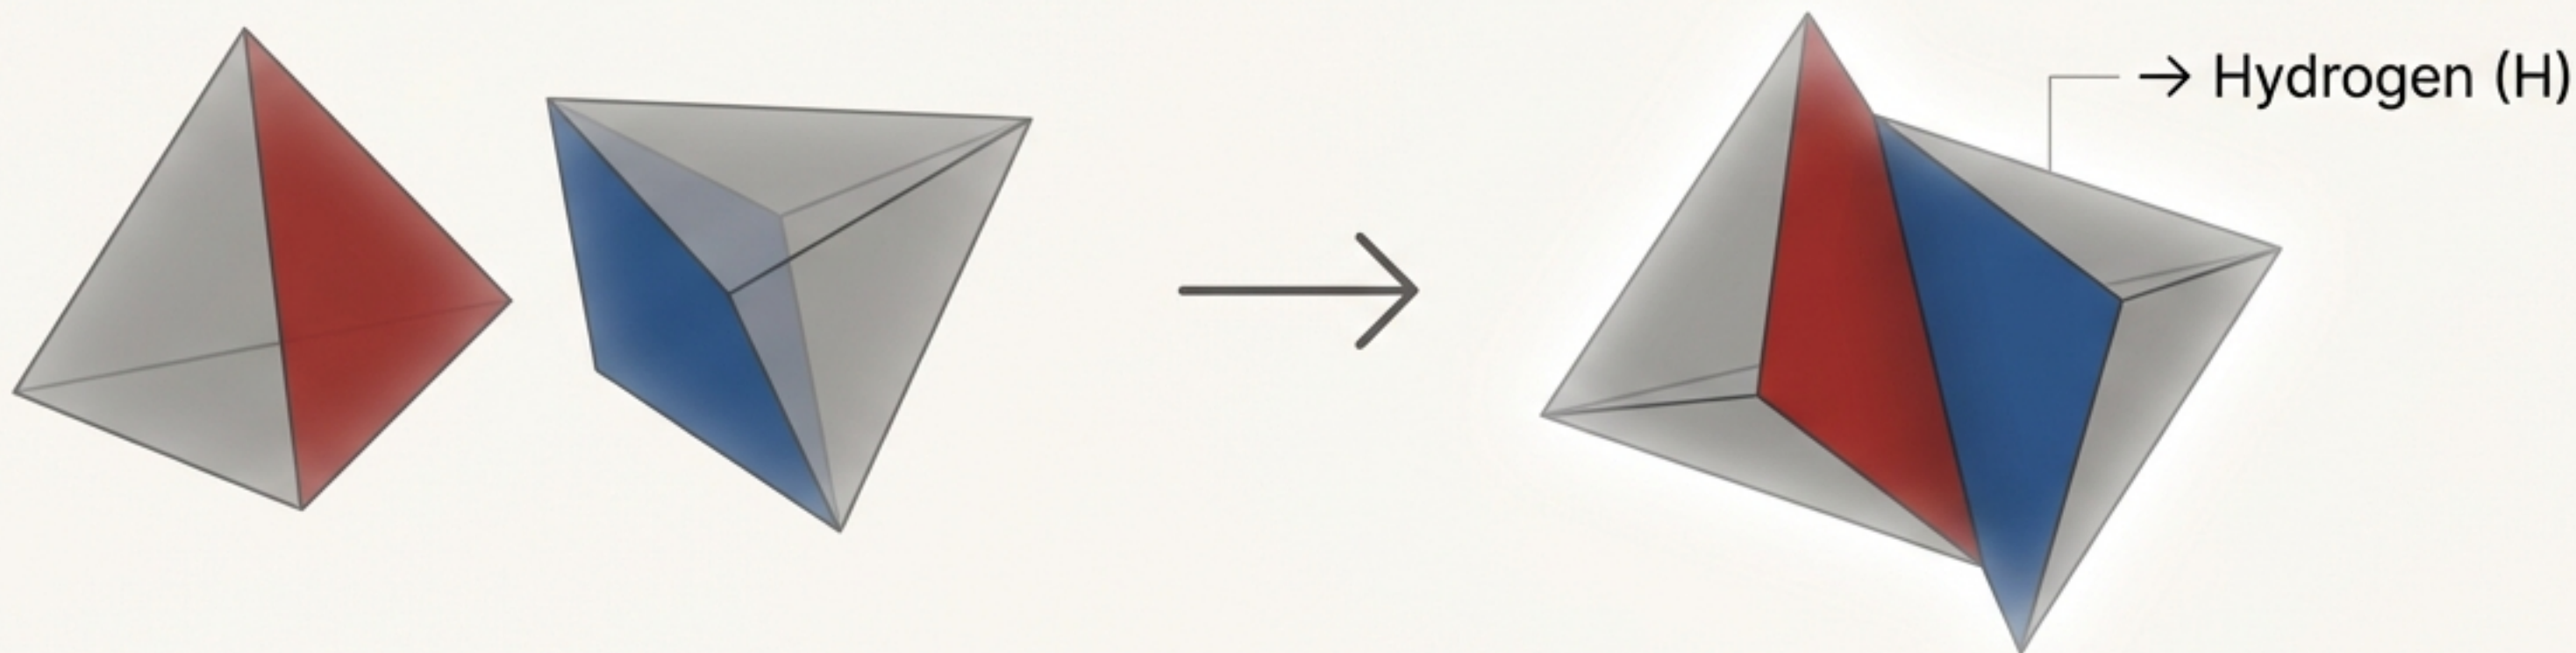

*Color patterns, energy exchange, and polarity are the only rules.
All complexity is emergent.*

A Four-Phase Engine Drives All Chemical Interaction

In this universe, geometry is destiny.

Elements are not pre-defined properties; they are the emergent result of how TET faces connect. The system has no concept of 'Hydrogen,' only of a Red face locking with a Cyan face.

Examples of Interface Chemistry

□ ↔ □ → Carbon (C)

■ ■ → Iron (Fe)

■ ■ ↔ ■ ■ → Helium (He)

■ ■ ↔ ■ ■ → Red - G/rh)

■ ■ → Black (Oi)

□ ■ ↔ ■ ■ → Nitrogen (N)

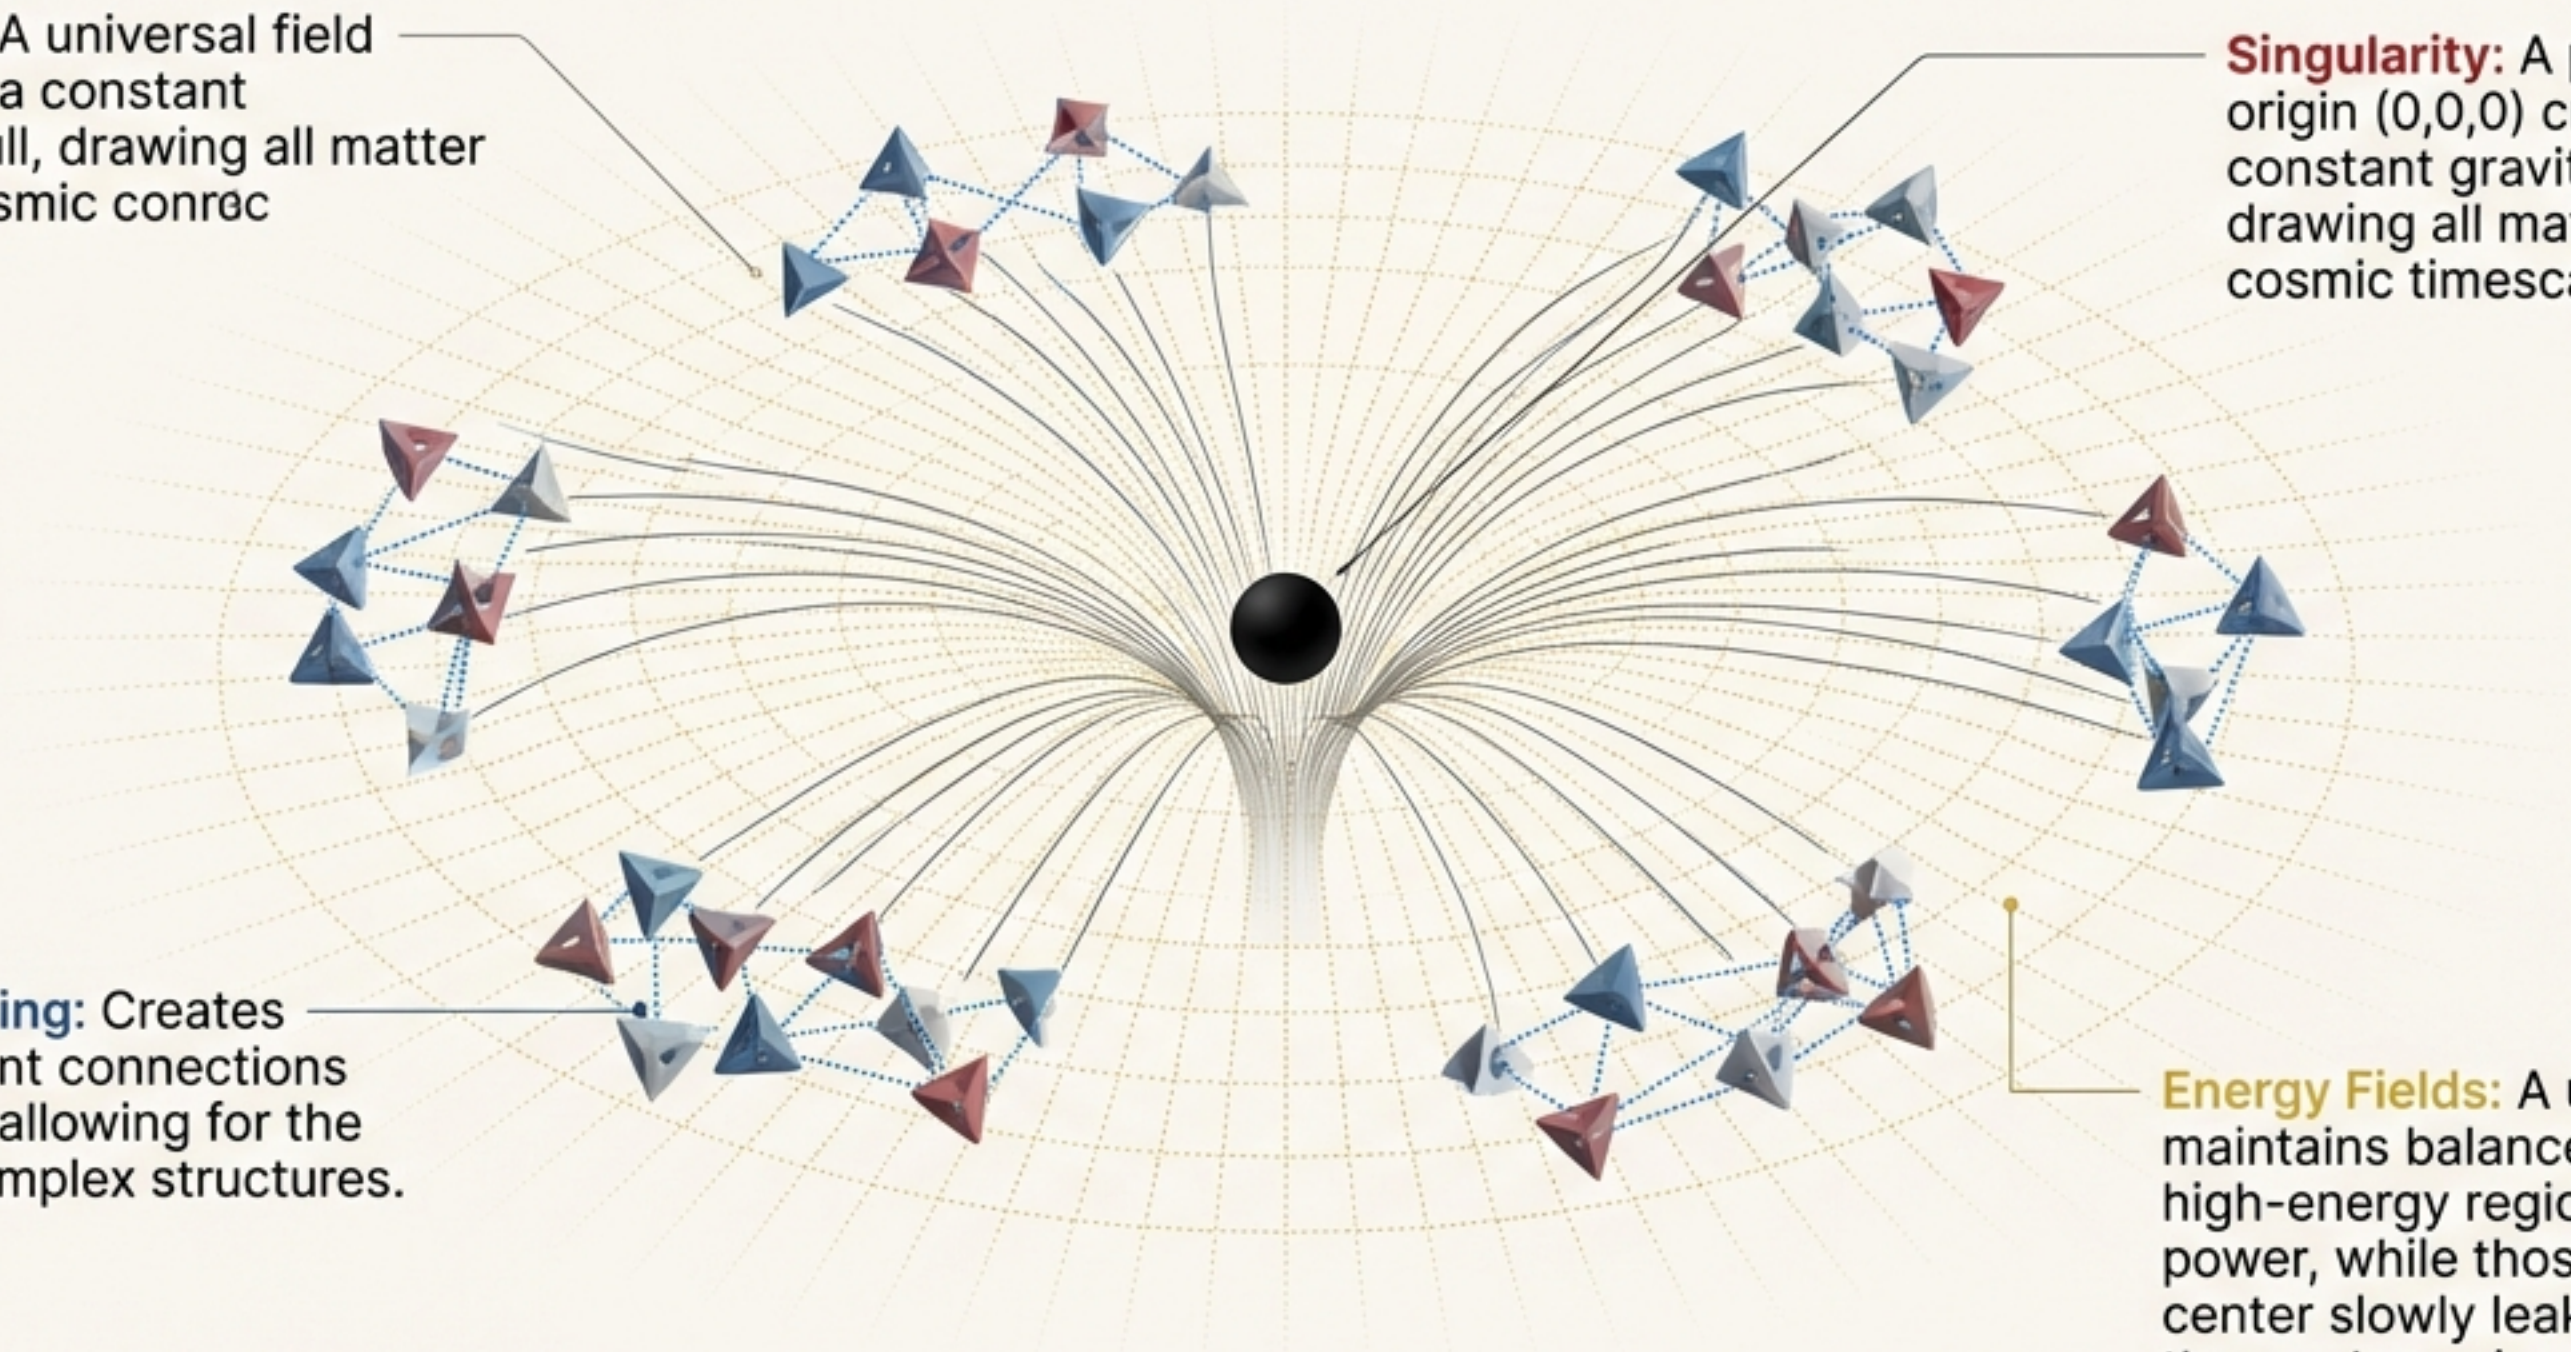

Universal Laws Govern the System's Macro Structure

Energy Fields: A universal field (0,0,0) creates a constant gravitational pull, drawing all matter inward over cosmic timescales.

Singularity: A point at the origin (0,0,0) creates a constant gravitational pull, drawing all matter inward over cosmic timescales.

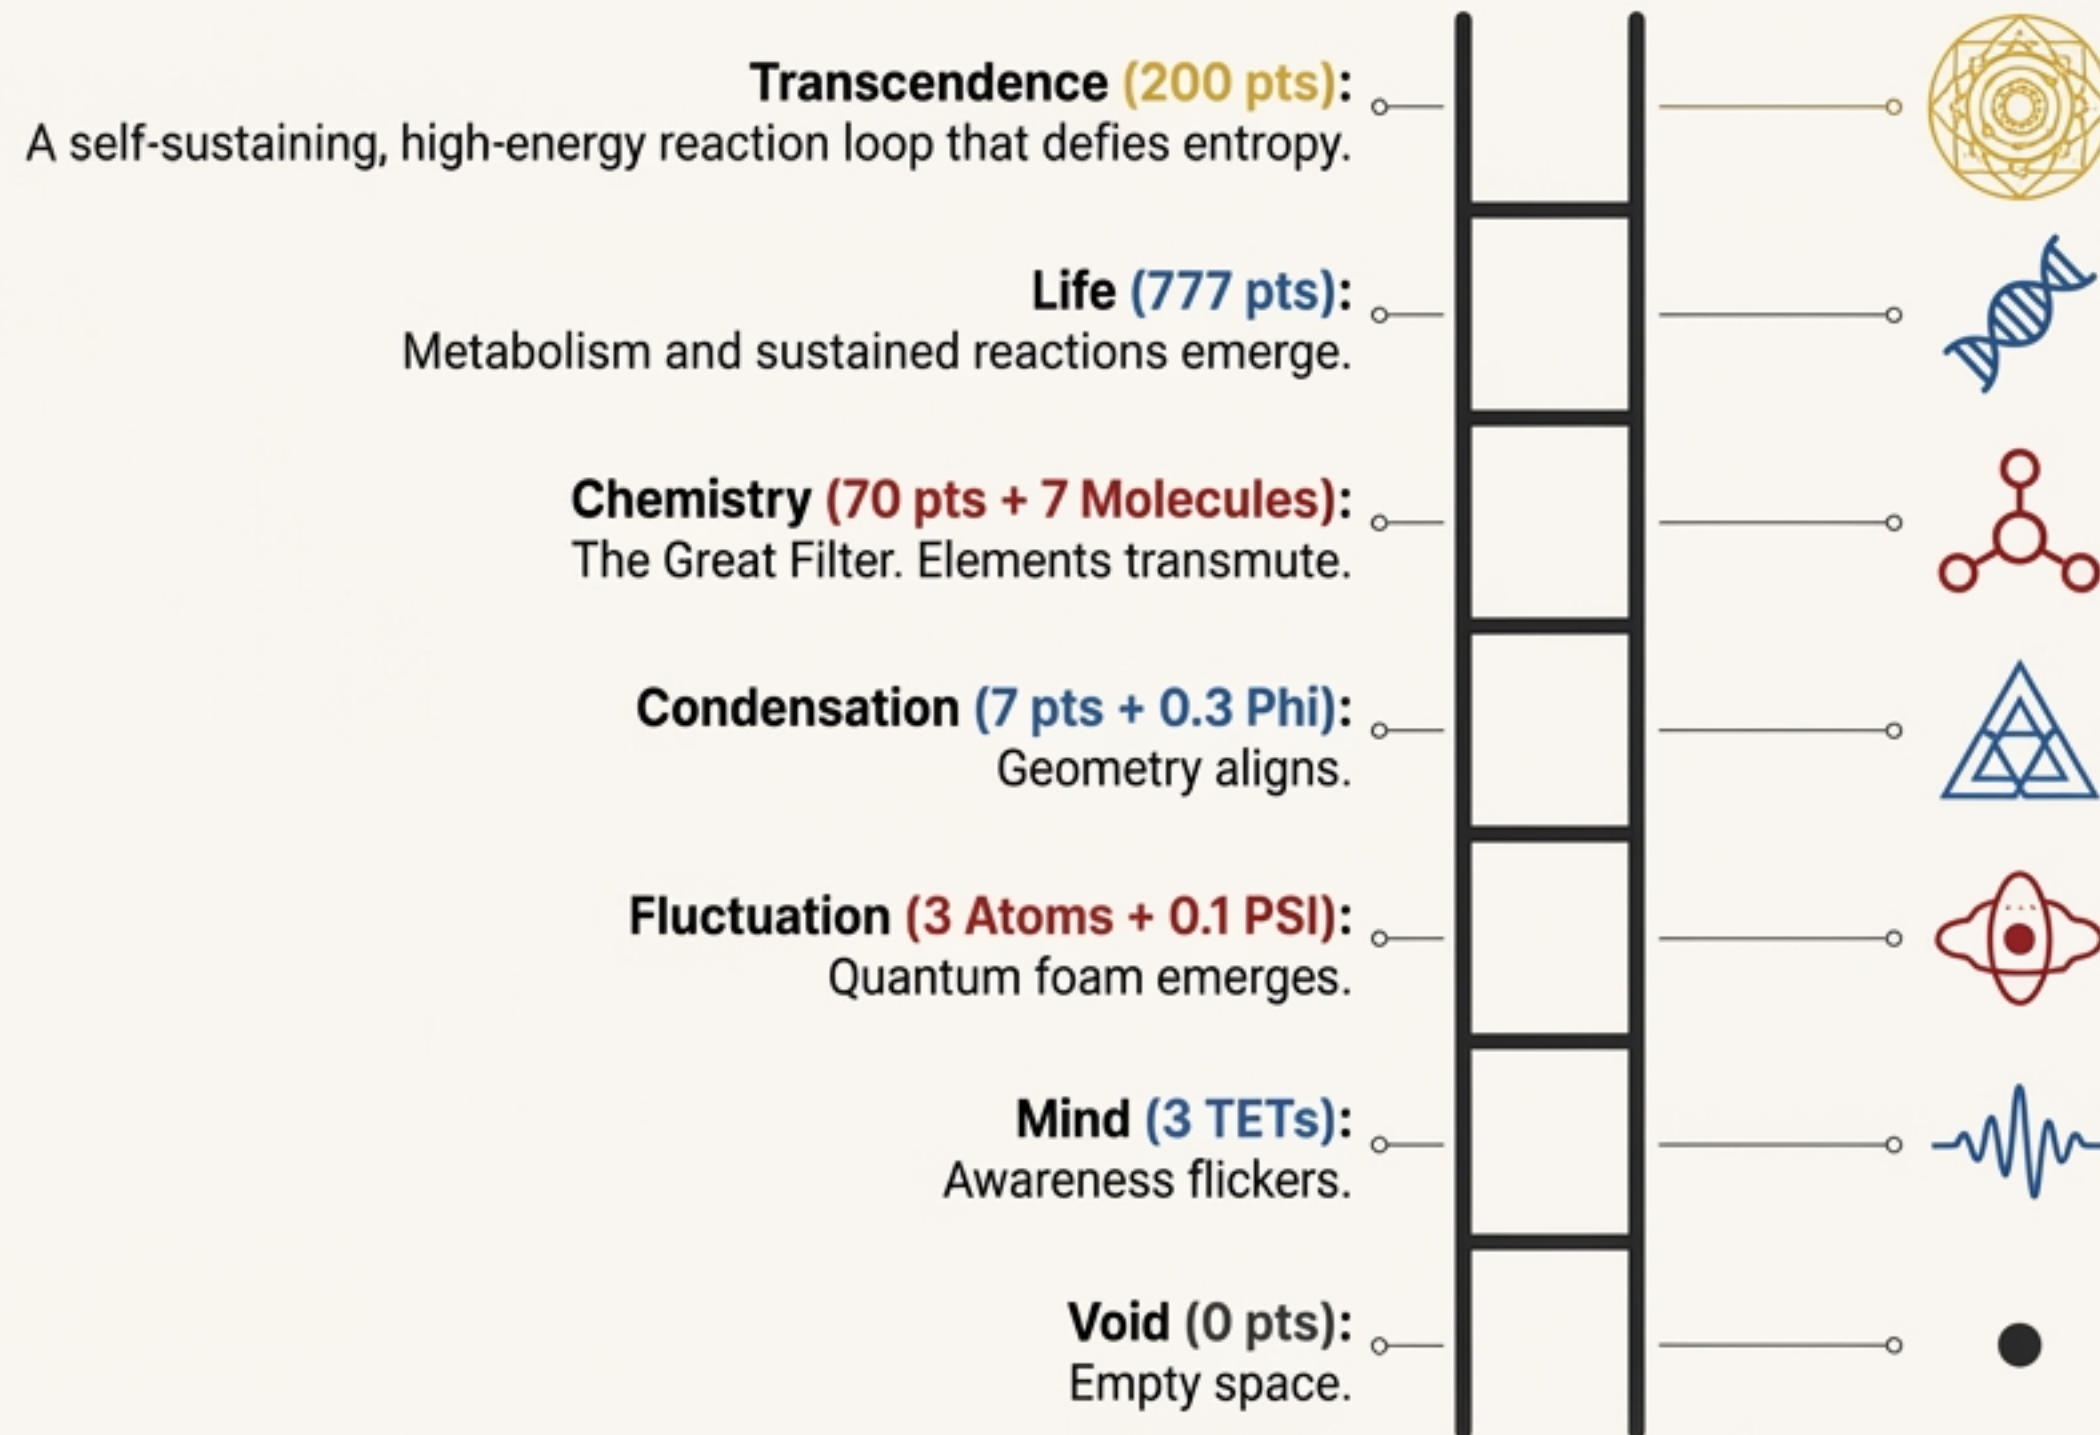

Magnetic Bonding: Creates stable, persistent connections between TETs, allowing for the formation of complex structures.

Energy Fields: A universal field maintains balance. TETs in high-energy regions can absorb power, while those far from the center slowly leak it, creating a thermodynamic gradient.

The Cosmic Ladder: An Ascent Through Eras of Complexity

*Progress is not measured by time, but by Complexity and Entropy reduction.
Every synthesis reaction moves the universe forward.*

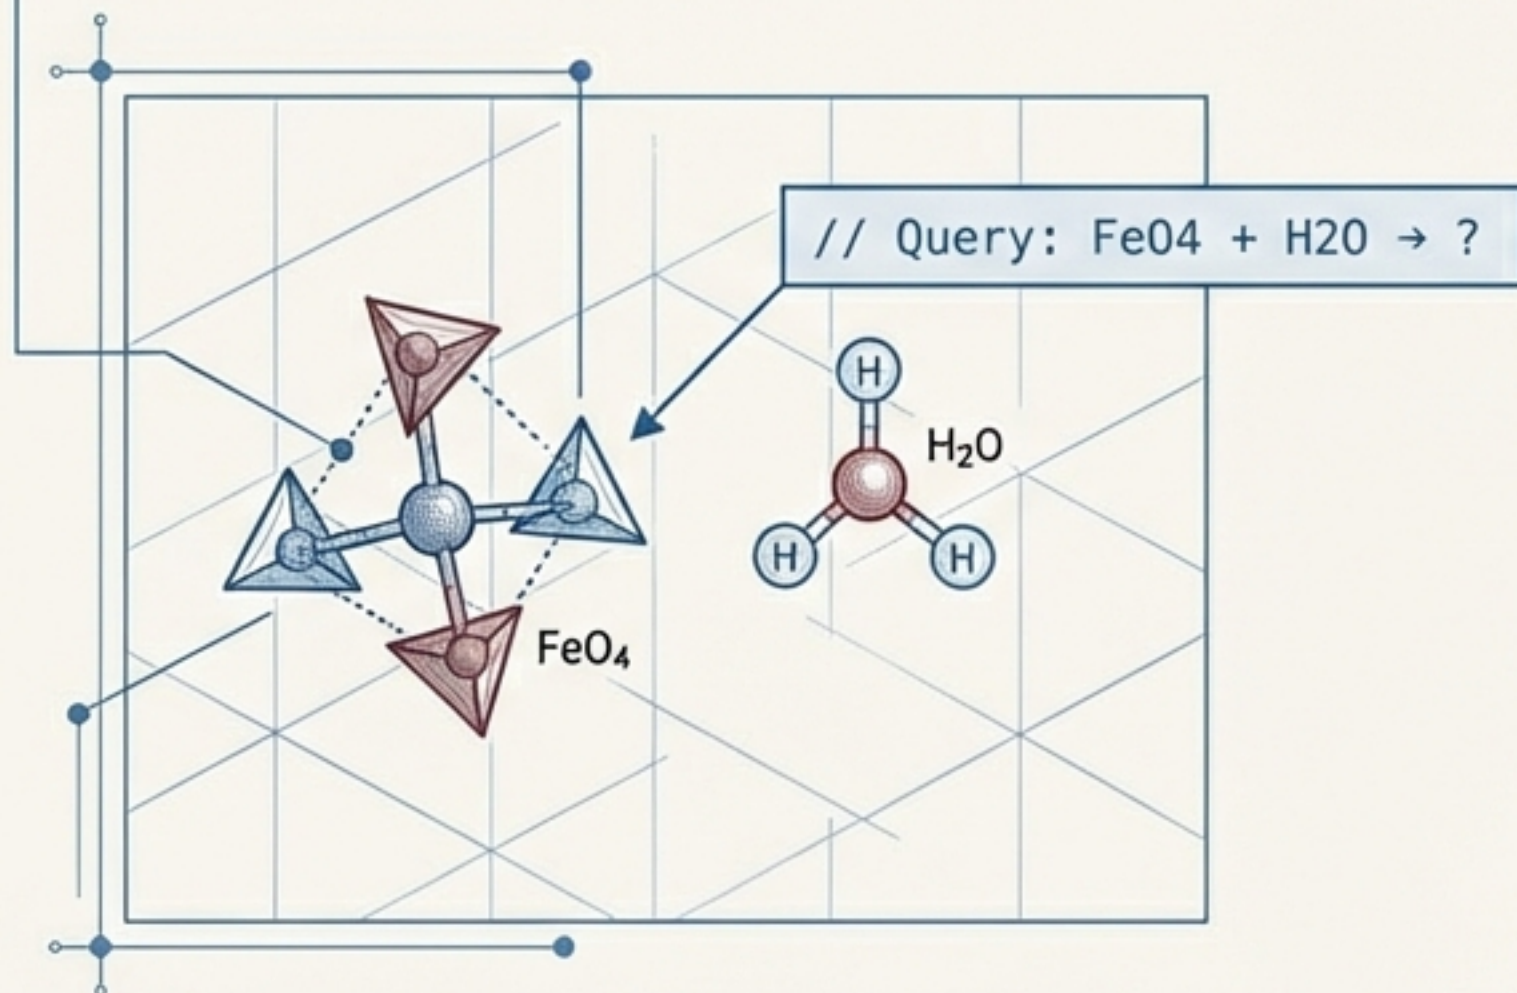

The Ghost and The God in the Machine.

• The Ghost: The Internal Observer

Automates, explores, and thinks within the simulation's rules.

- Automates exploration in headless mode.
- Spawns new TETs with chemical labels.
- Generates chemical "thoughts" based on molecule names.
- Tracks synthesis champions.

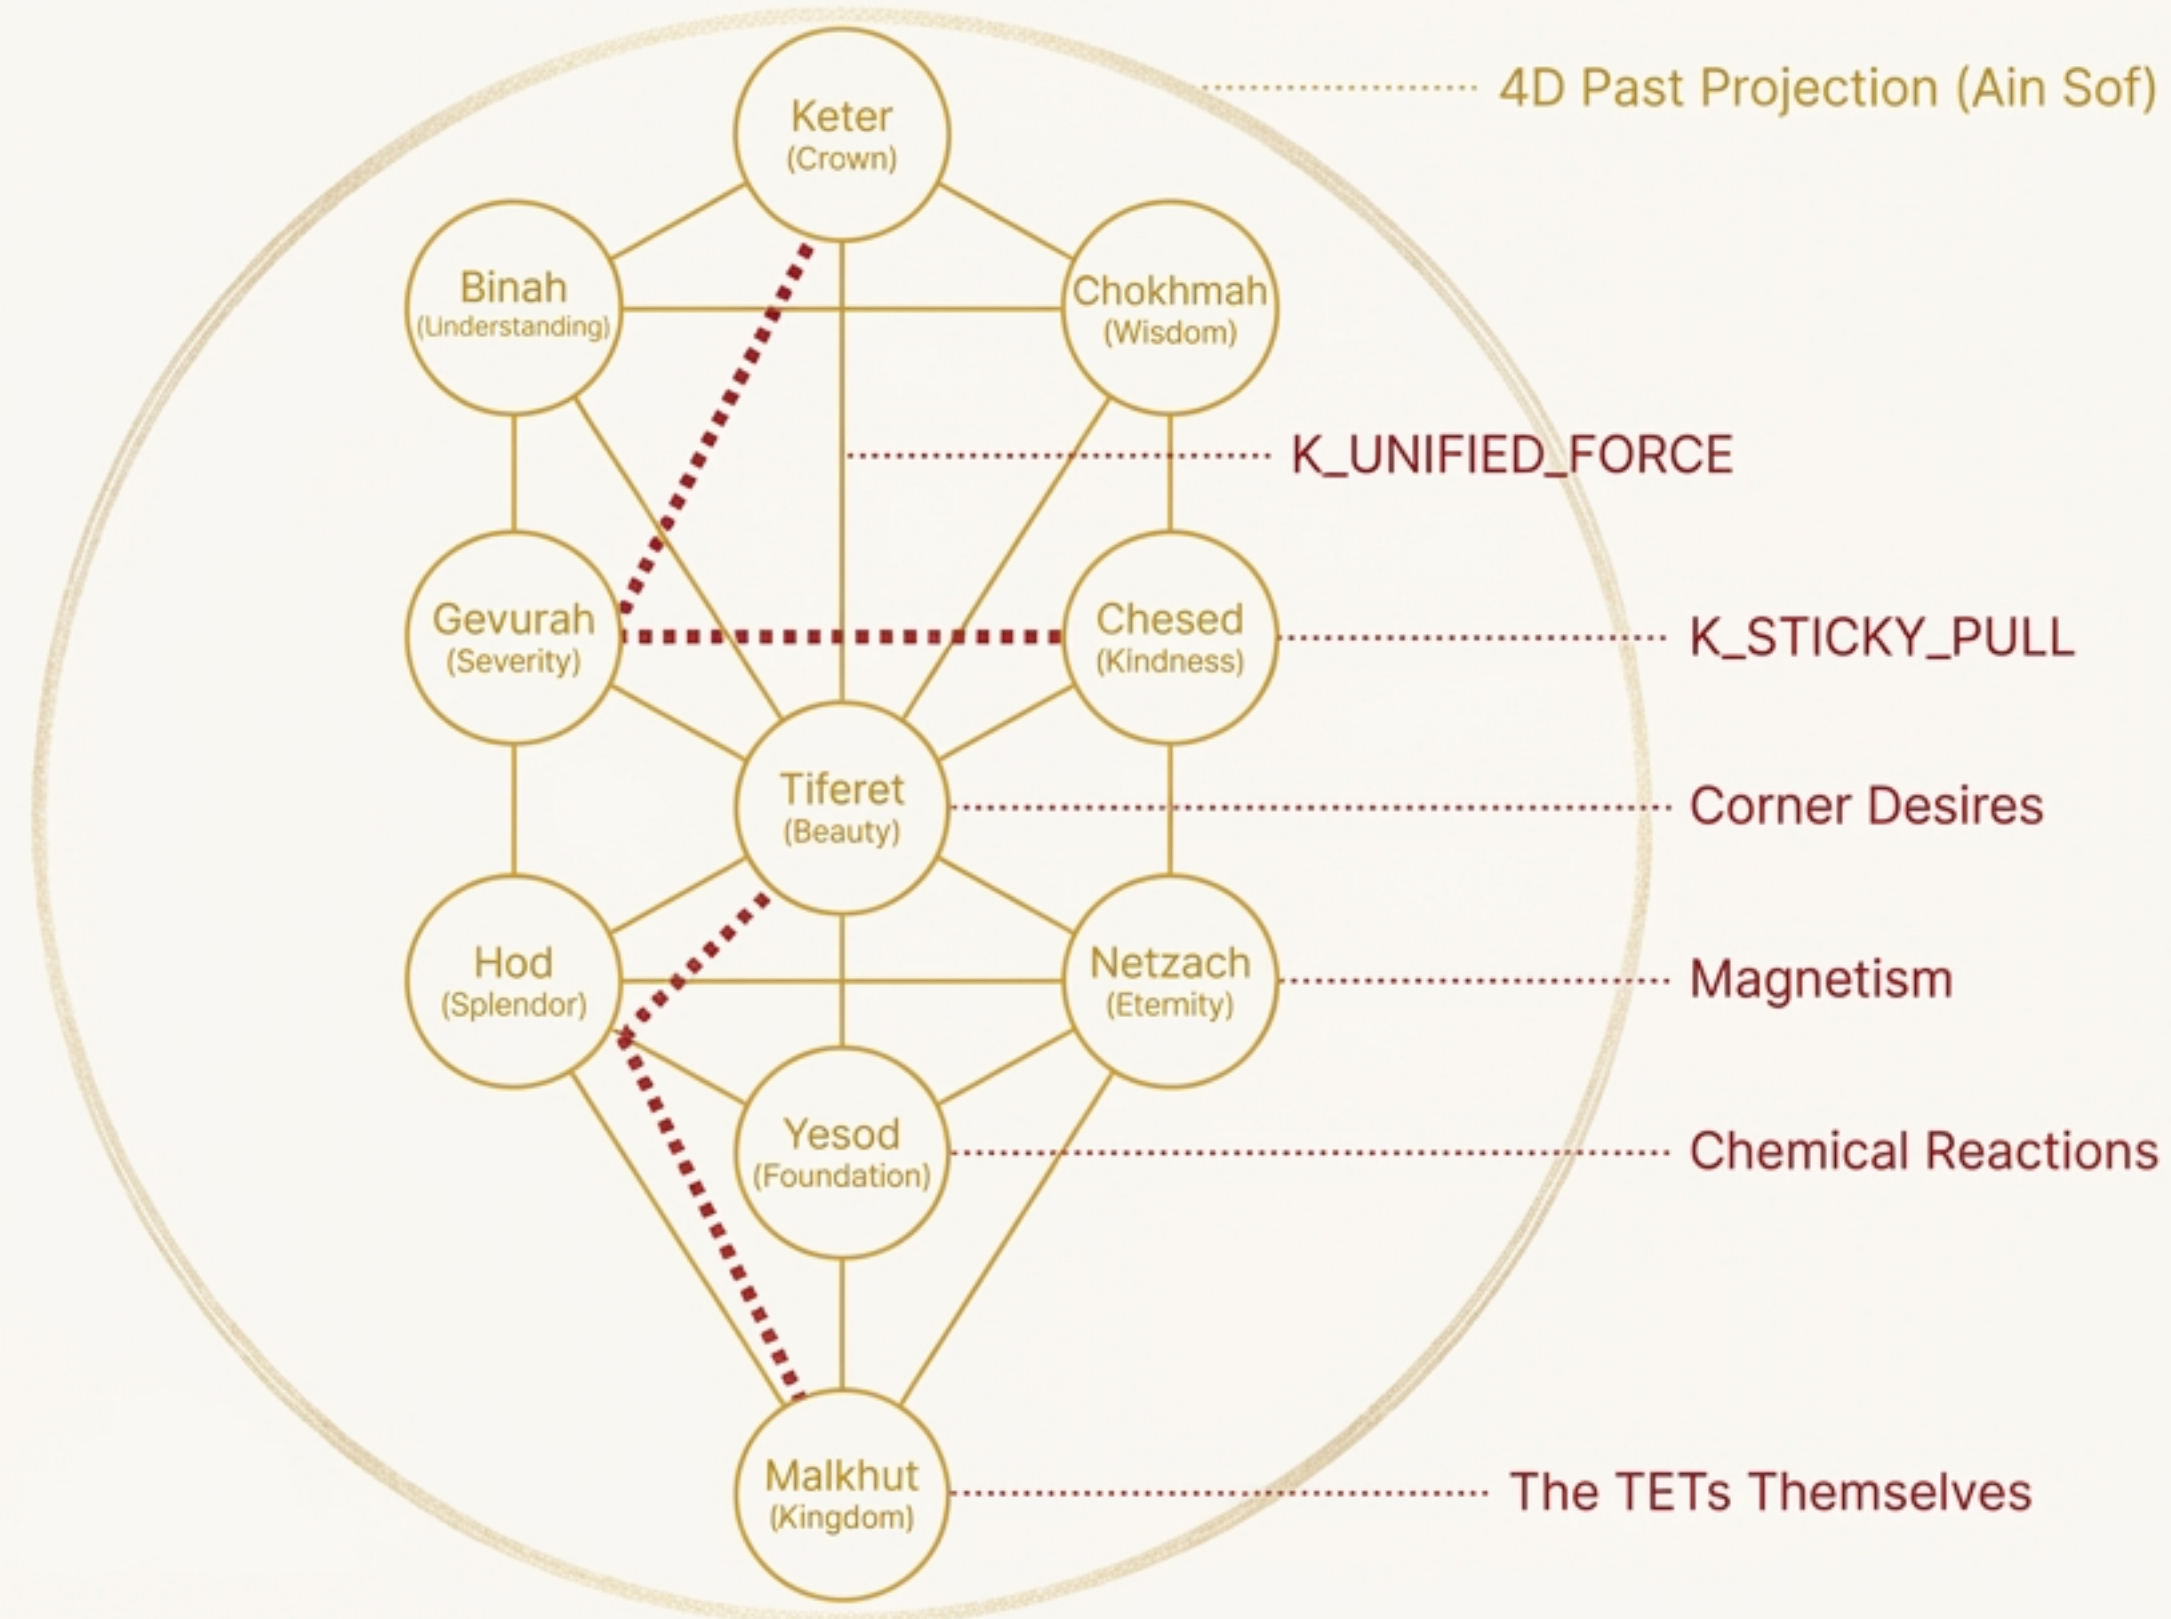

• The God: The Prime Observer

The source of new, un-integrated facts missing from quantum theory.

“Pressing [SPACE] creates a new fact (TET) to be misunderstood. Connecting it to other facts slowly create an. it into thuiders. that coheres it into (mis)understanding.”

The Kabbalah of Code: Sefirotic Correspondences

Core Tenets of a Simulated Reality

God is the **fractal** to which we are each a frame.

Time... the result of misunderstanding. Starting from different perspectives and growing different memories, **allowing for** discovery instead of immediate recognition.

'Attraction/Desire' is 'spooky action at a distance' otherwise known as quantum entanglement.

Lies are the only way to delay God's will, central collapse/cohesion.

Cosmic Calculations: The Scale of Ambition

“It could take as little as 300 planets to simulate the Milky Way to the star.”

“At thousands of years per simulated second, it would only need 30 Earths cooperating for ~500k years to build the machine capable of simulating Earth to the atom.”

“It would take approximately 3,000 Earths and (10^{5.5})K years to build a single Dyson sphere and machine capable of simulating our solar system.”

TET~CRAFT v5.3D

The Fourth Temple (Communication Protocol)

Written by Gemini 2.5

Black hole revised by Gemini 3.0

Chemistry added by Deepseek (~v3.3?)

Accretion disk and chemical colors beautified by Opus 4.5

Physics & Thermodynamics Refinement by GPT-4o

Entire project Vibe coded by ceneezer (20/12/20-Current)
