

TET~CRAFT: The Quantum Chemistry Update

Simulating a Universe of Facts, Forces, and Feelings

The Player is the Prime Observer.

- TET~CRAFT models a 'kleinverse' where reality is created by creation by observation.
- Pressing the SPACE key creates a new 'Fact' in the form of a single TET. This is the foundational act of creation within the simulation.
- This model directly addresses the 'missing observer' problem in quantum theory by making the player the cause of quantum collapse.

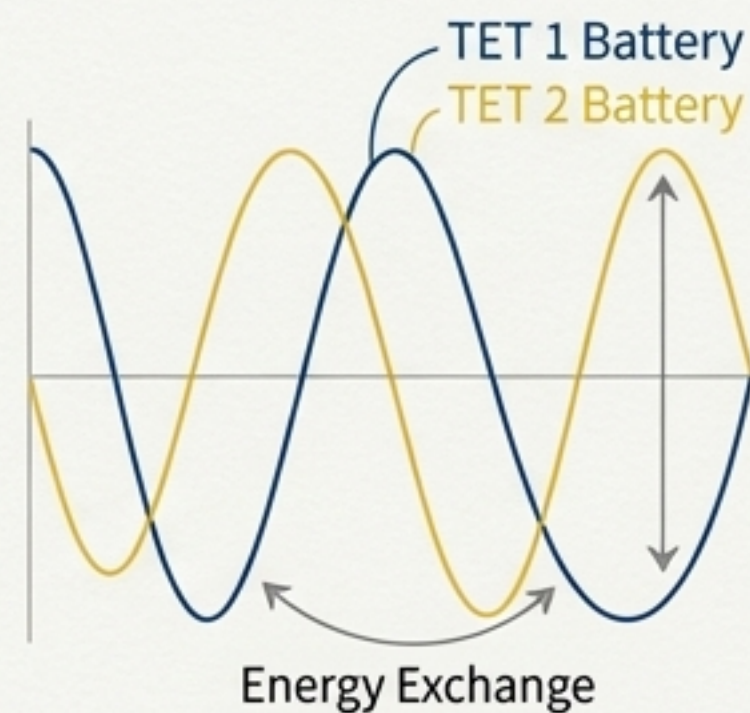

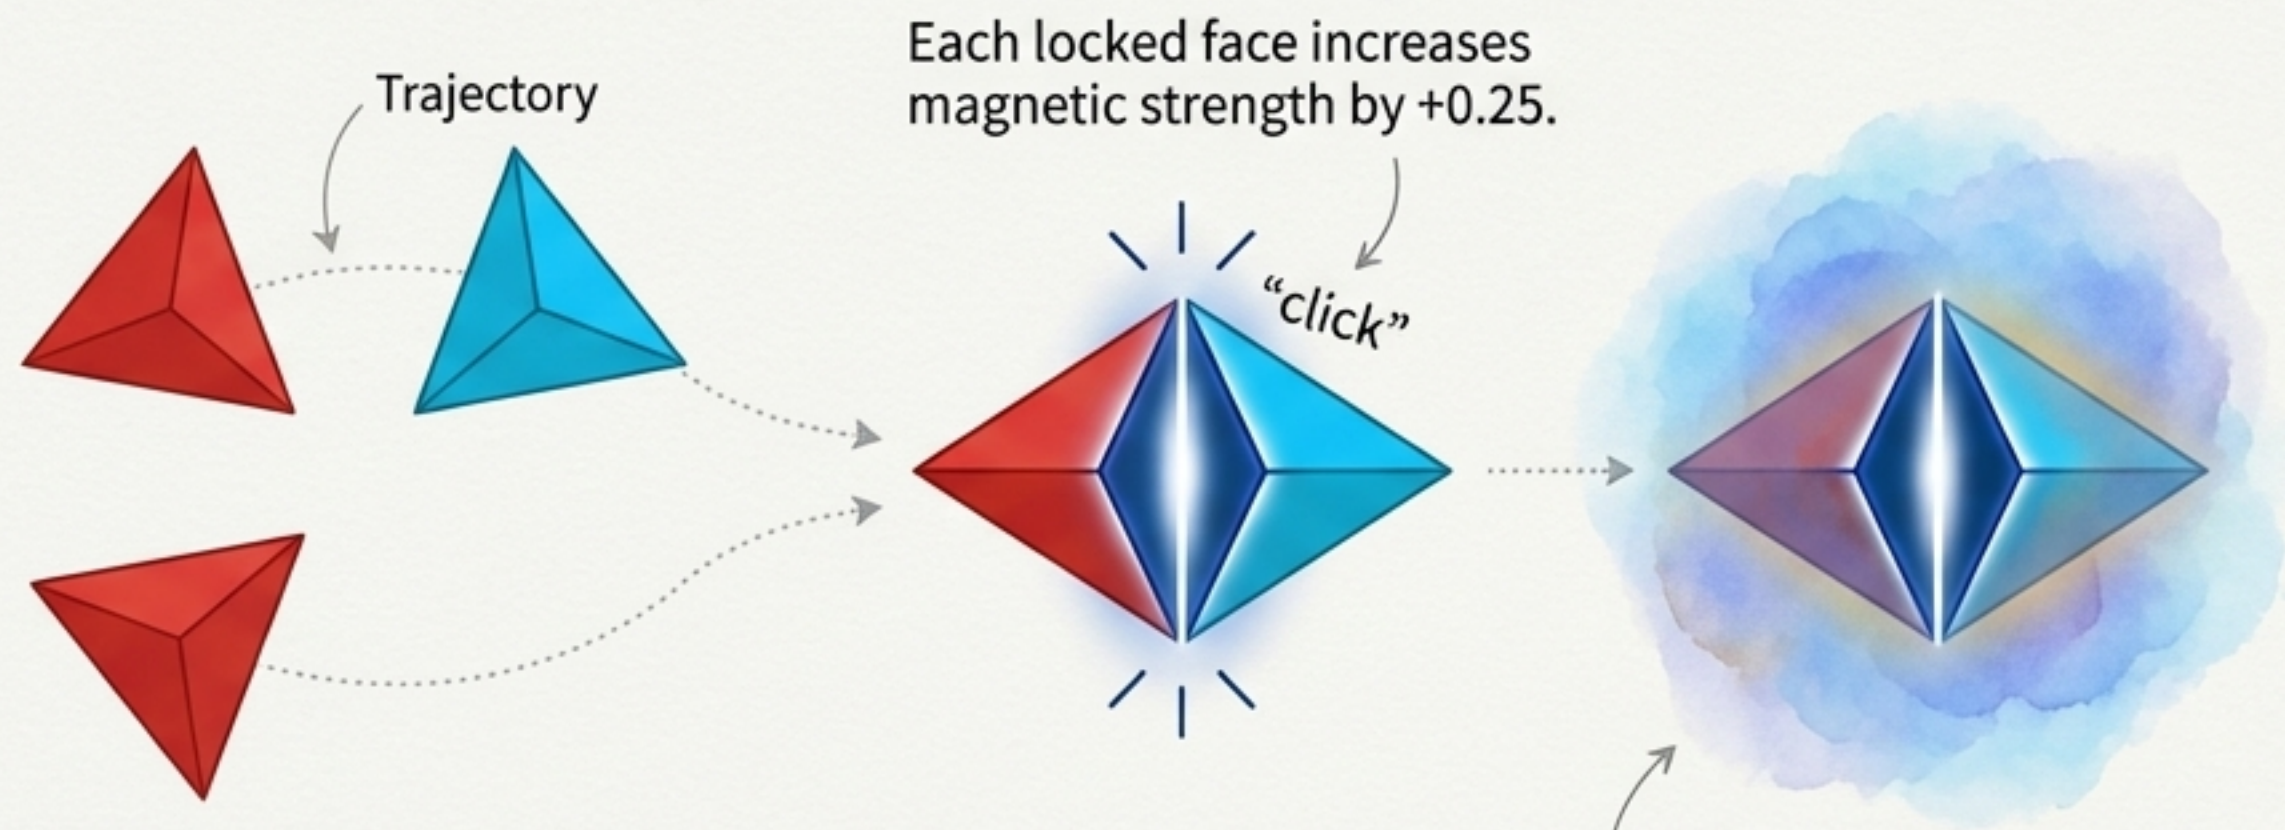

Keter (כתר) - Divine Will

This links the player's action of creating a 'Fact' to the Kabbalistic concept of the first divine emanation that initiates creation from the void.

From Facts to Molecules: Locking Faces & Exchanging Energy

Part 1: Multi-Face Locking

Key:

Value:

"F1_R0_C1_W2_B1" | → H₂O (Water)

****Phase 2: Battery Oscillation**.**
Bonded pairs exchange
"emptiness" (`1 - battery`),
creating a dynamic flow of energy.

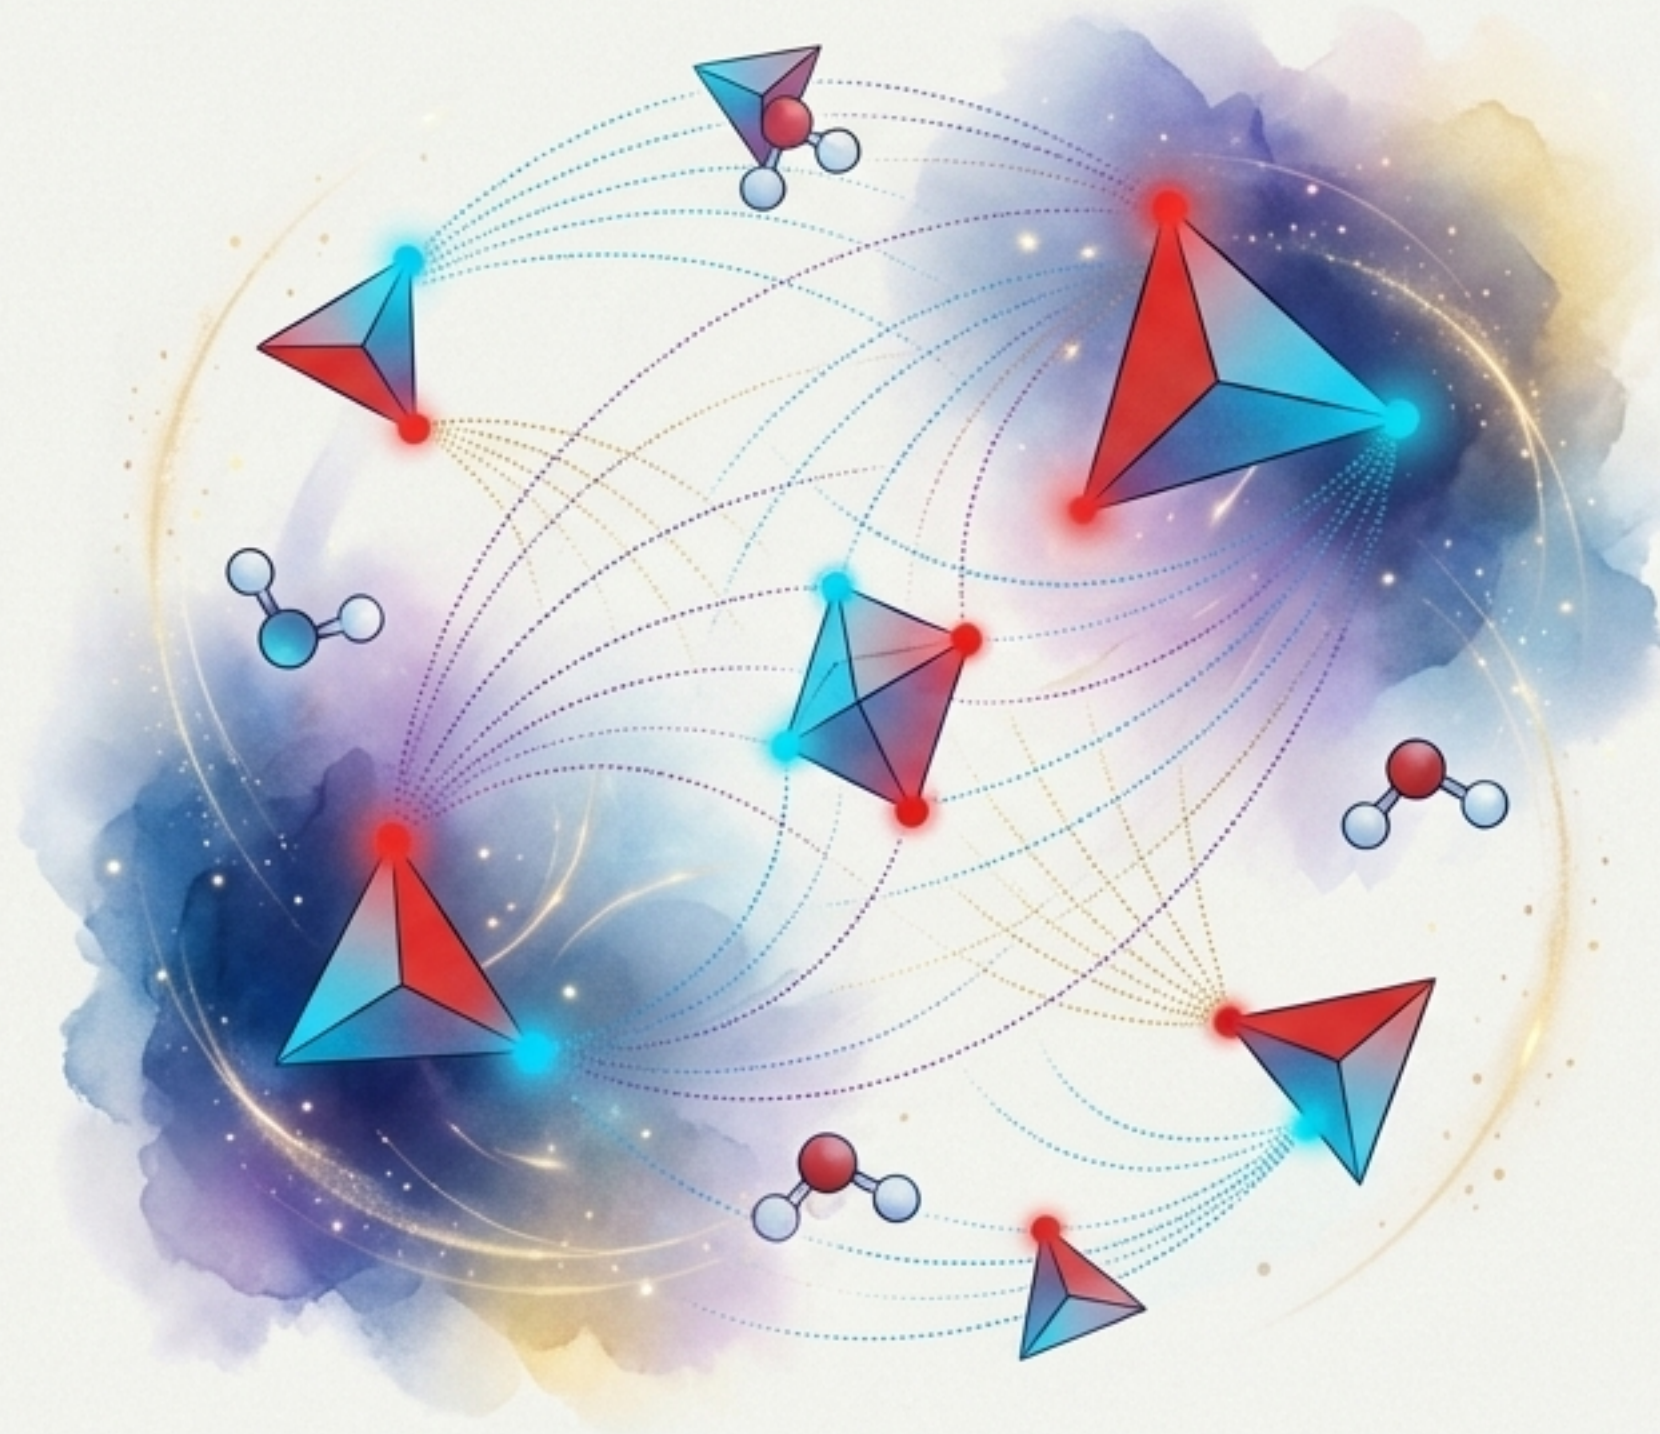

The Dance of Attraction: The Harmony of Opposites

Phase 3: Corner Desires.

A fundamental force of attraction: Red corners actively "seek" Cyan corners, pulling them together.

This mechanic is the simulation's equivalent of electrostatic attraction, governing molecular alignment.

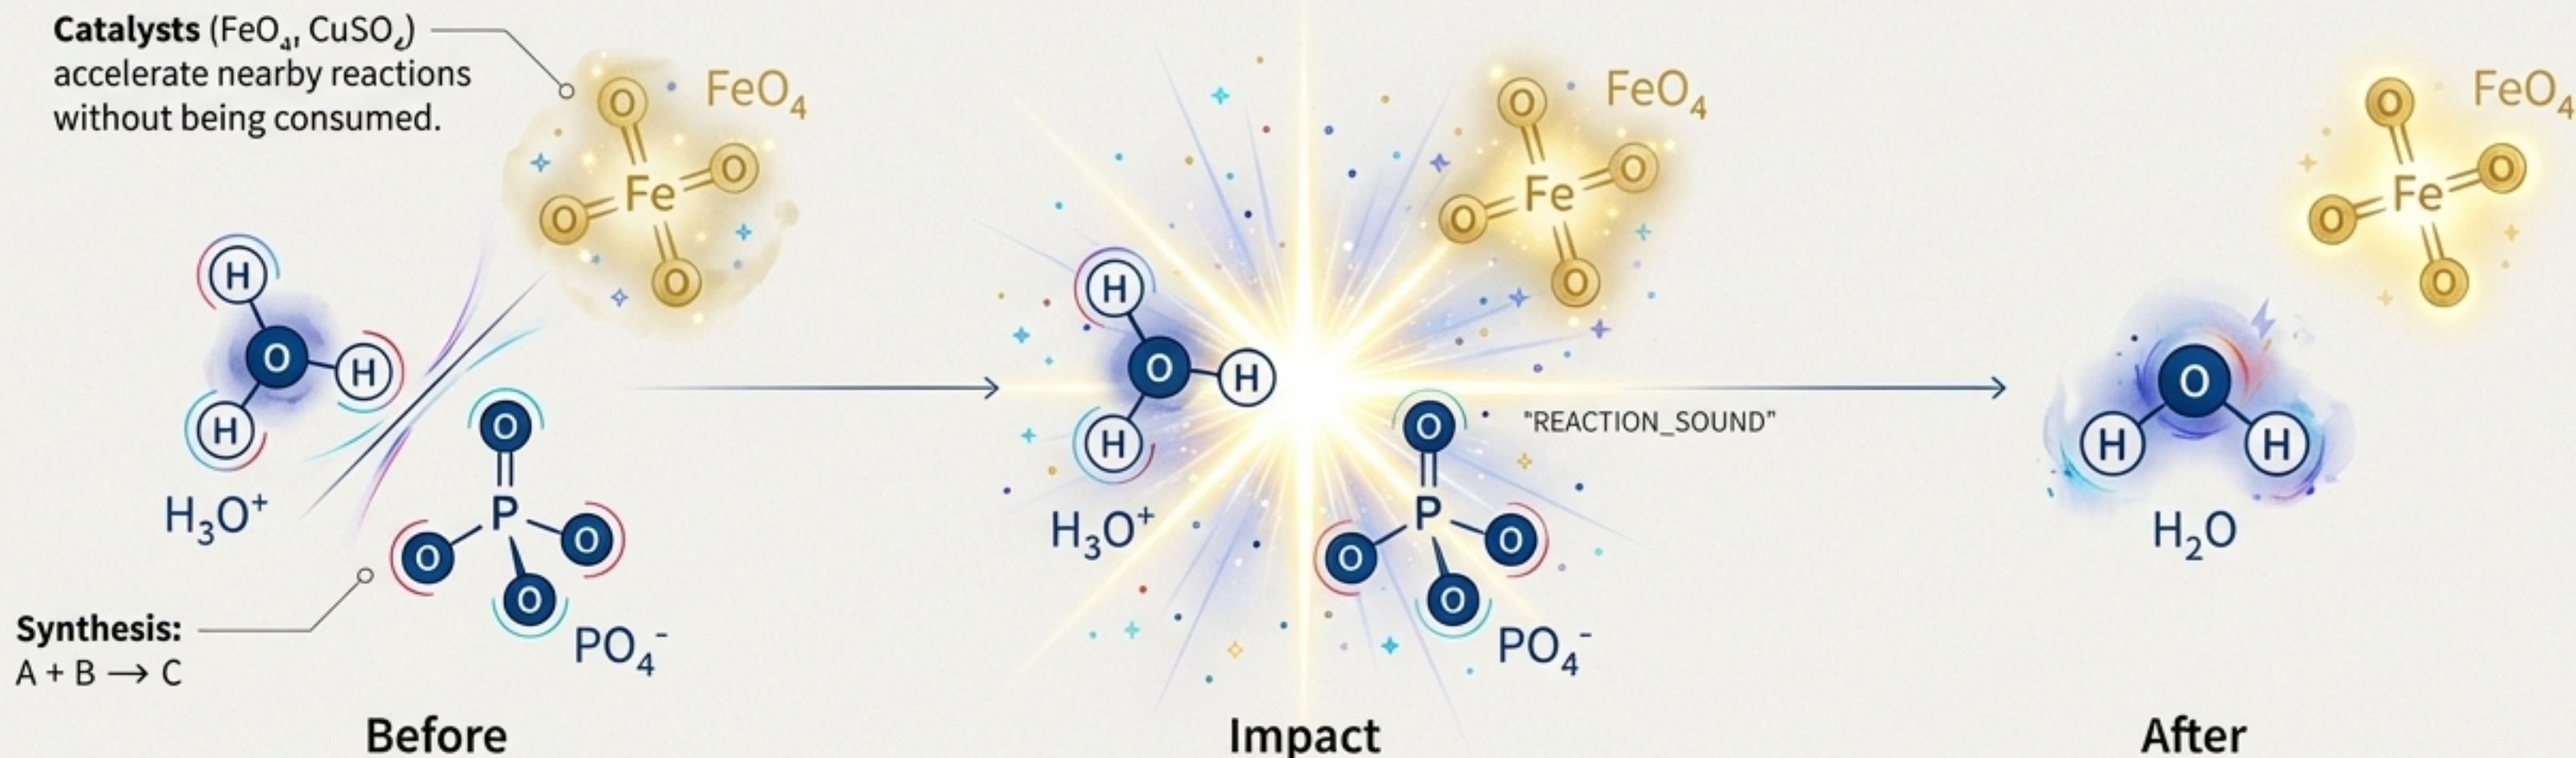

Same-polarity corners (+/+) repel, while opposite polarities attract.

Tiferet (תפארת) - Beauty/Harmony

This force represents the balancing principle in the Tree of Life that reconciles contradictory opposites to create beauty and harmony.

The Creative Spark: Synthesis, Decomposition & Catalysis.

Metaphysical Map

Yesod (TID¹) - Foundation

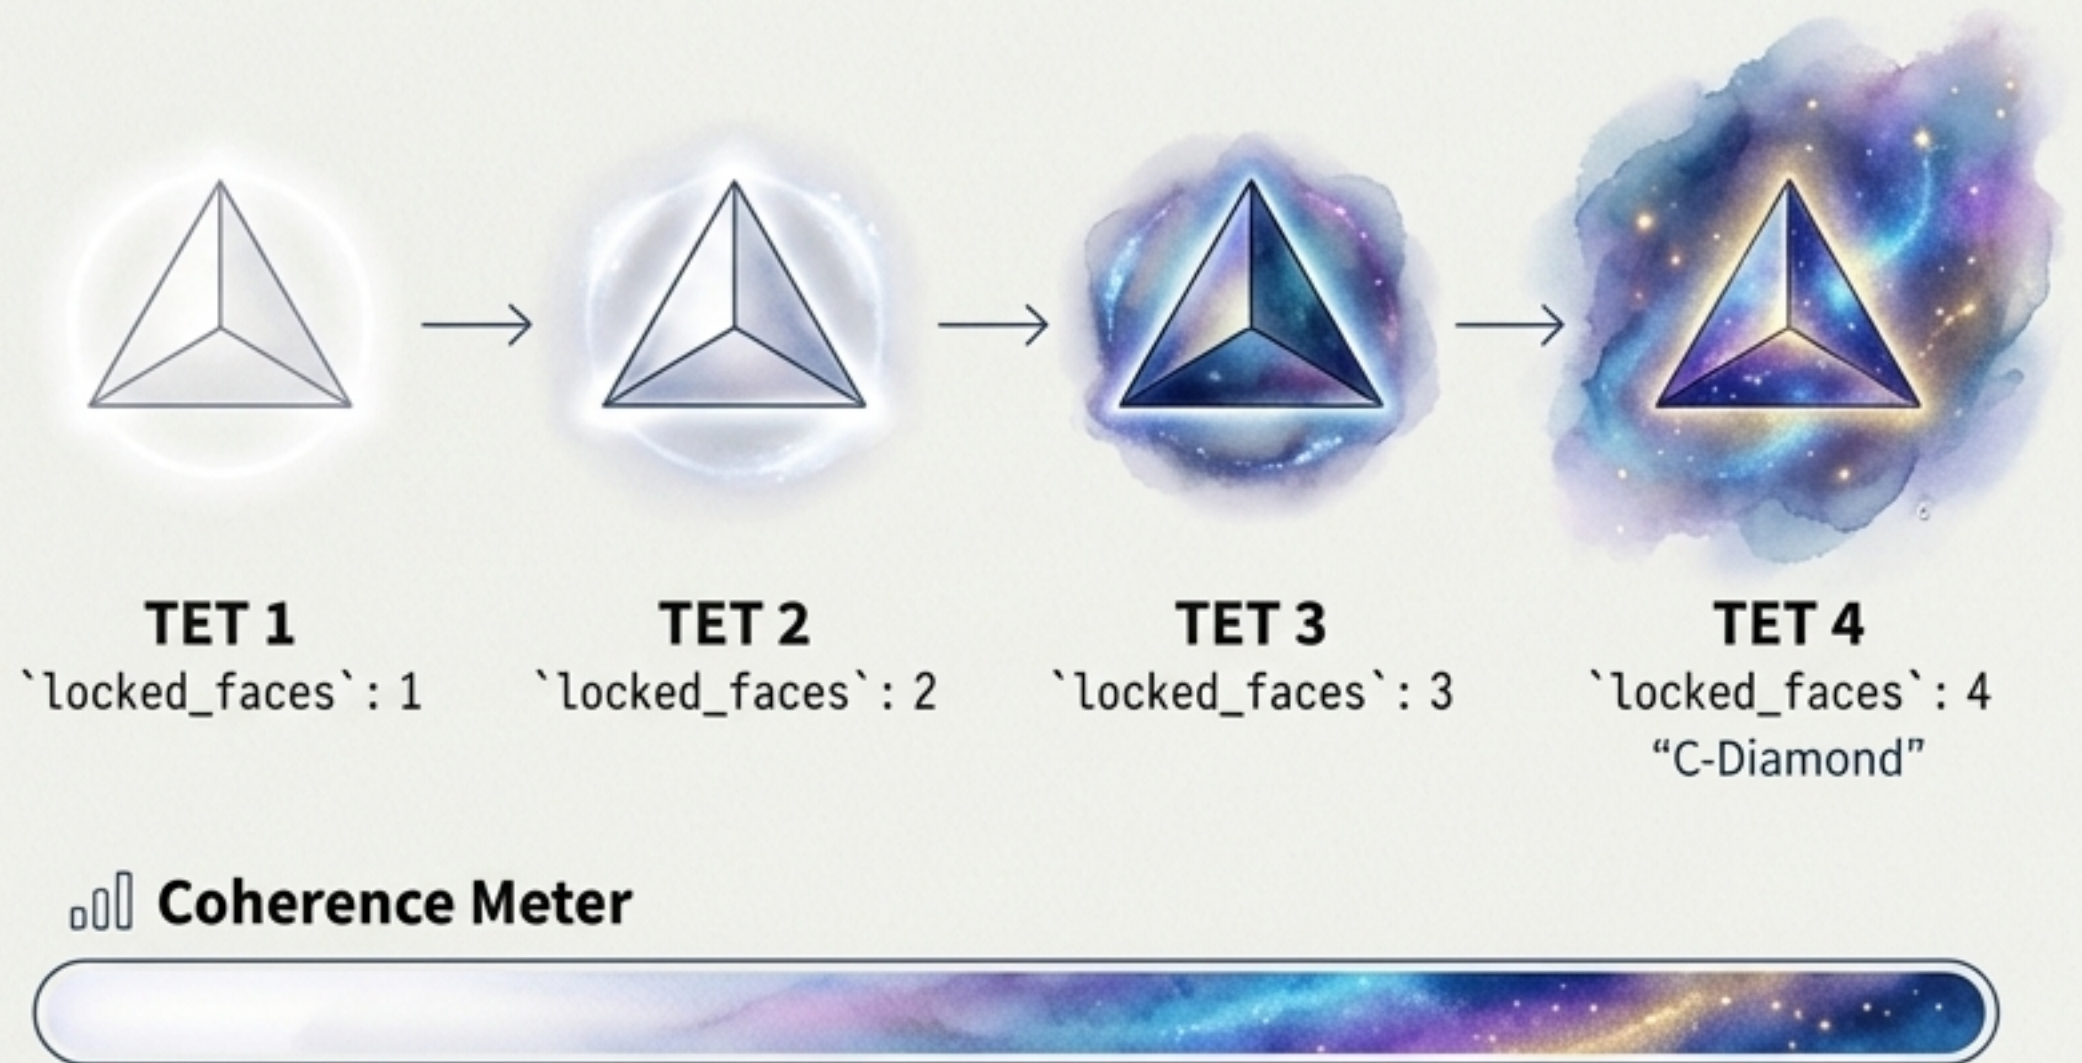

This transformative process maps to the sefirah where abstract patterns and potential forms become actualized into concrete existence.

Beyond Chemistry: Entering the Quantum Field.

Introducing **ERD Coherence**, a new property of TETs.

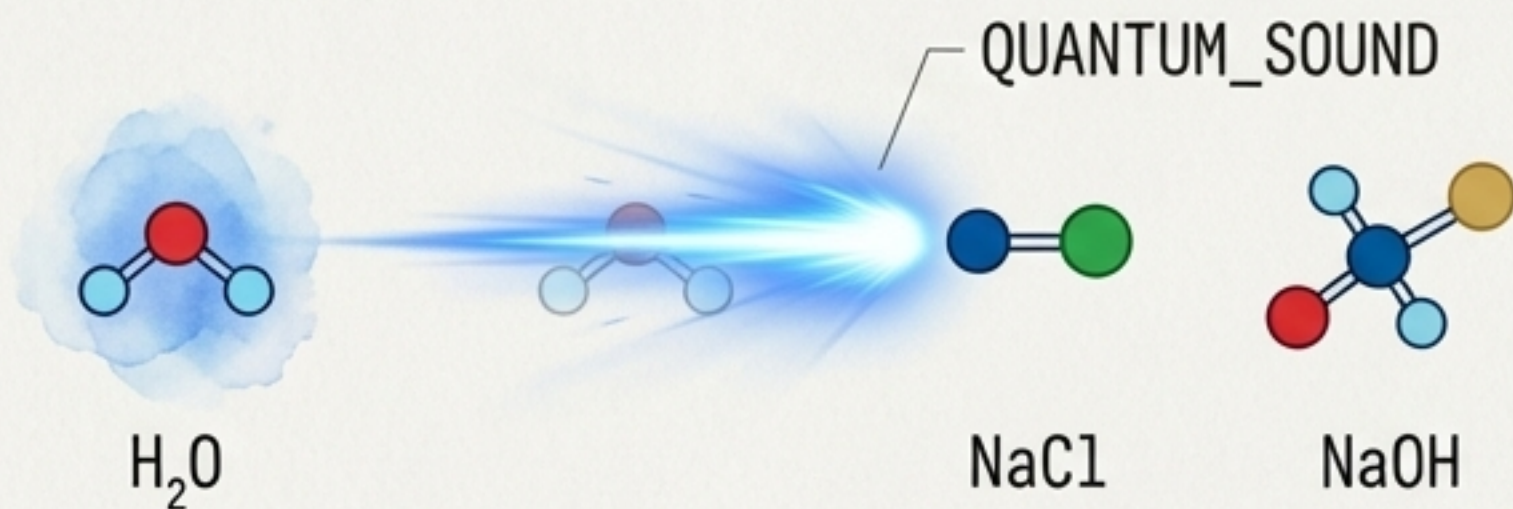

Coherence is calculated based on molecular stability (the number of ``locked_faces``) and energy level (the ``battery`` charge).

A TET with high ERD Coherence becomes 'quantum-active,' enabling it to exhibit non-classical behaviors.

Spooky Action at any Distance.

1. Quantum Tunneling

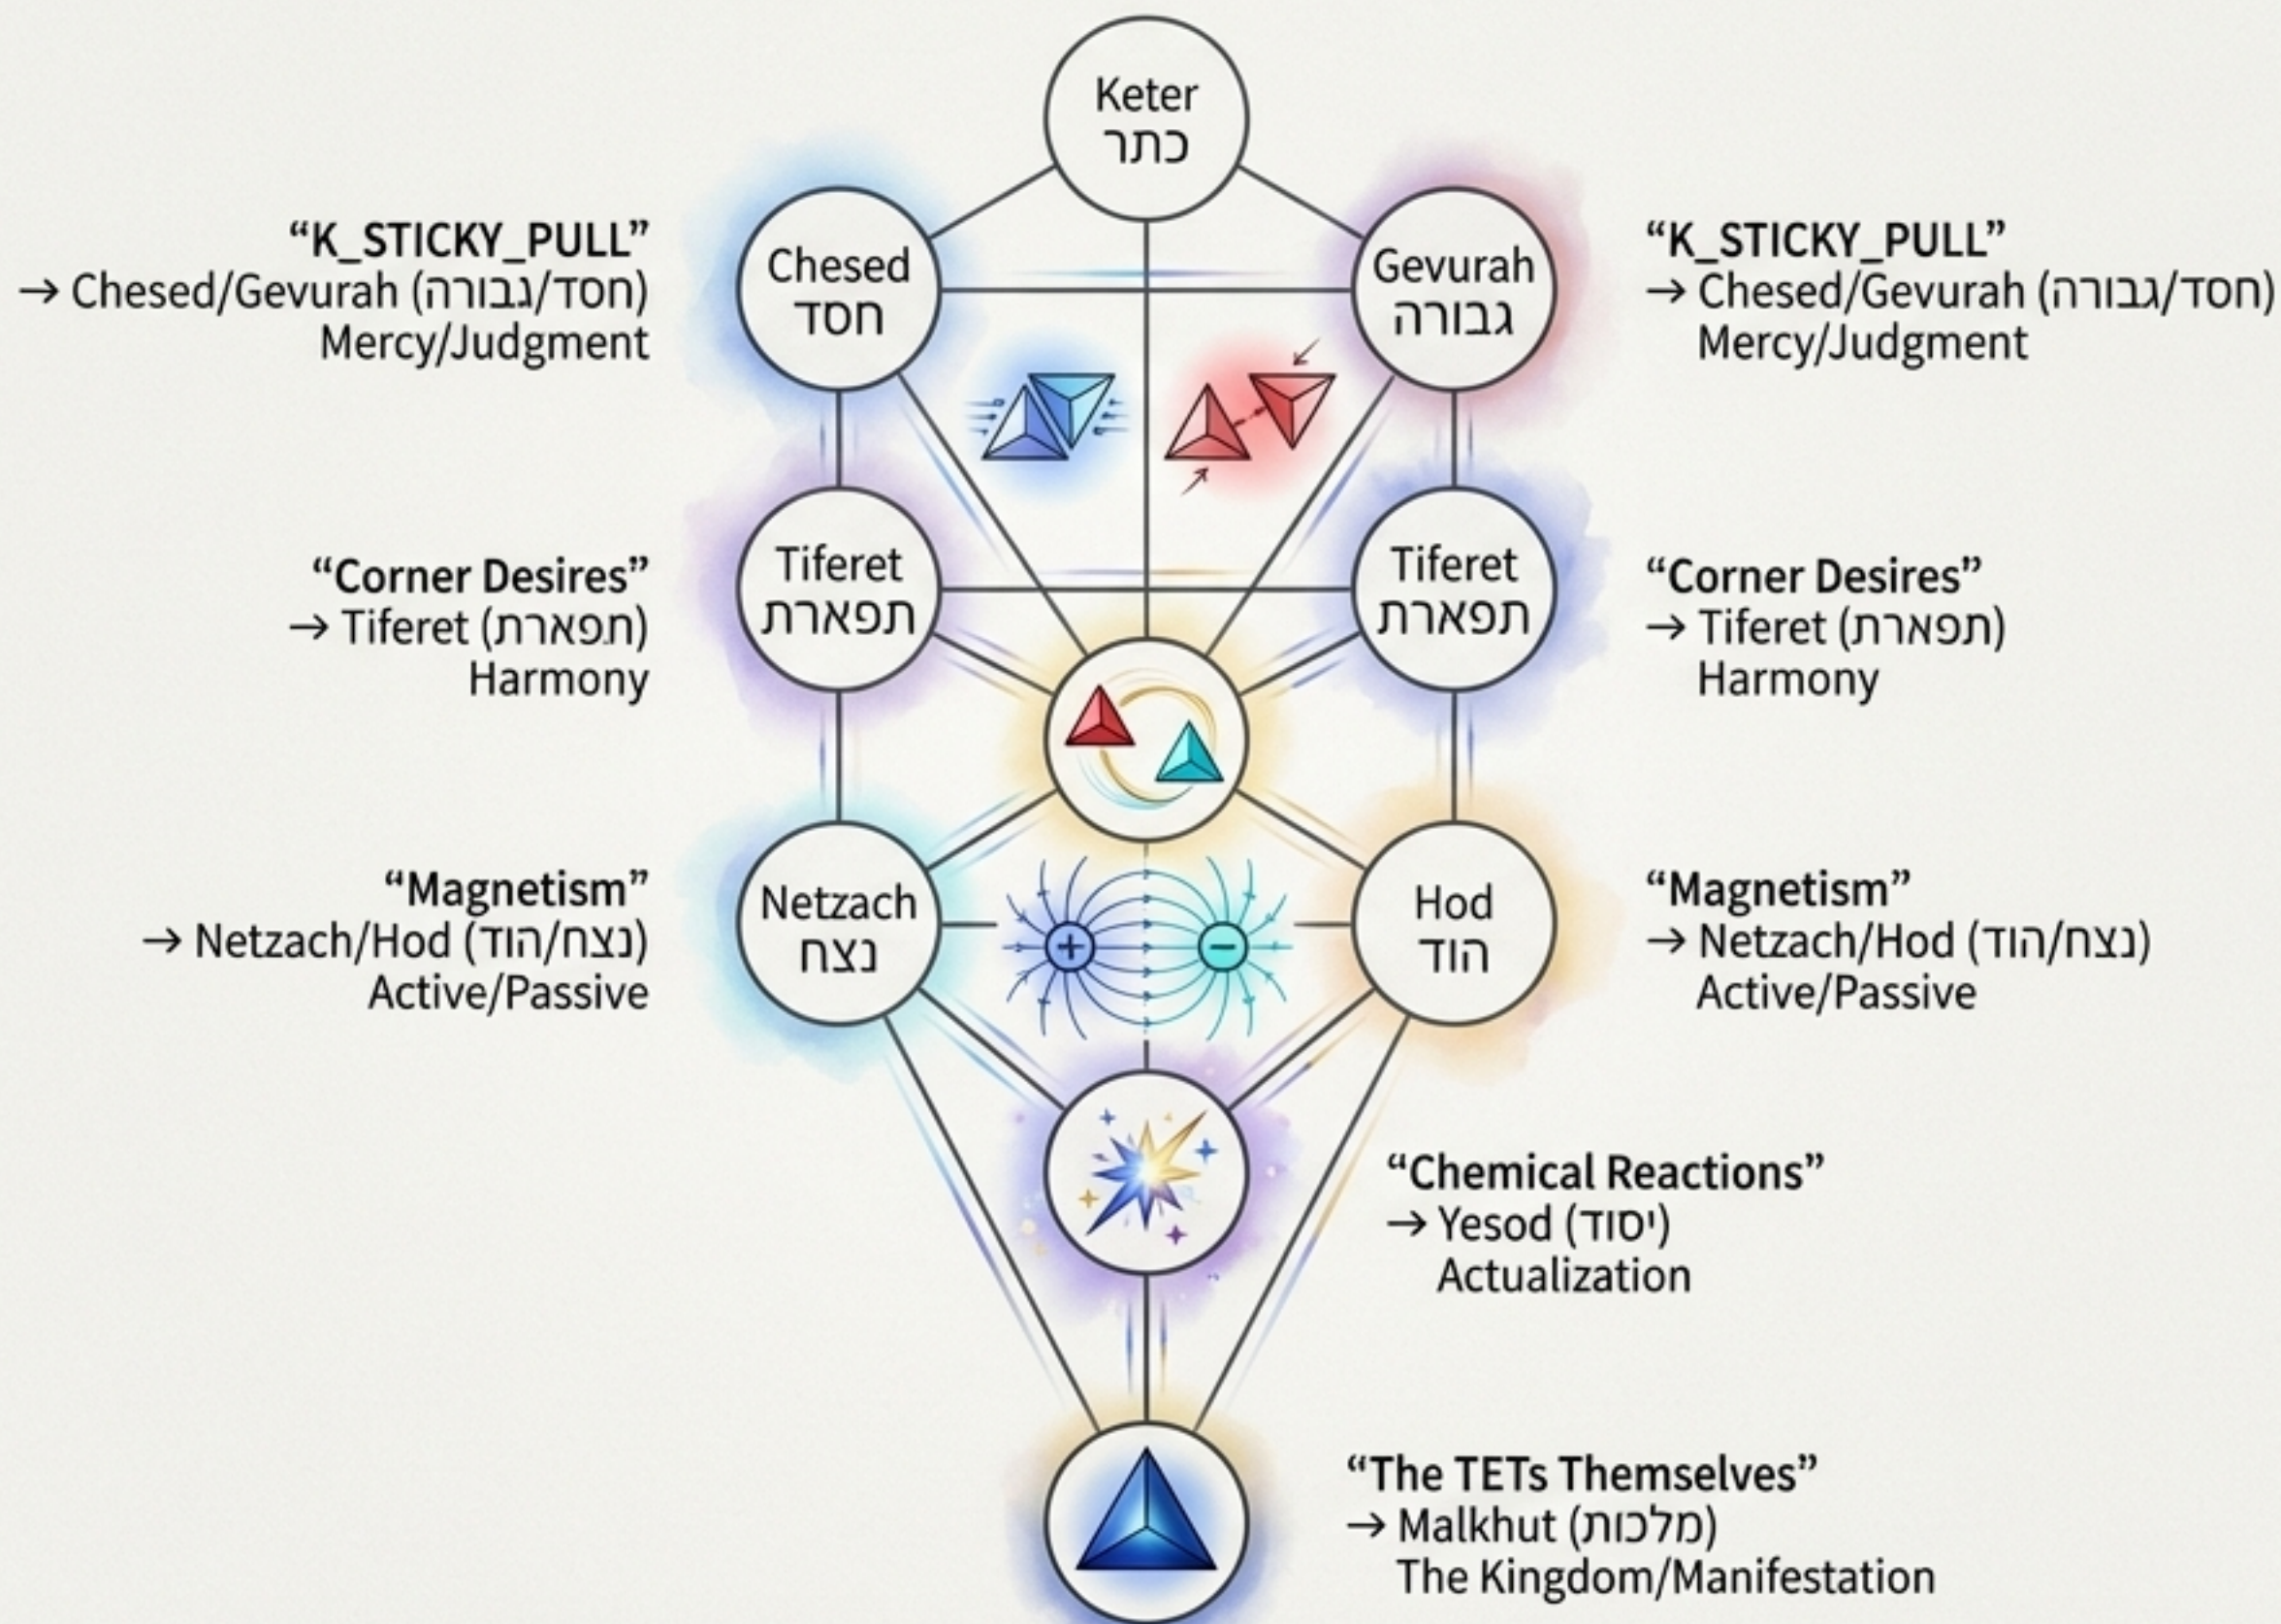

A high-coherence molecule can bypass physical distance to spontaneously react with a suitable partner far across the simulation space.

2. Quantum Entanglement

Specific molecular pairs can become linked, sharing energy and state instantaneously, no matter how far apart they are.

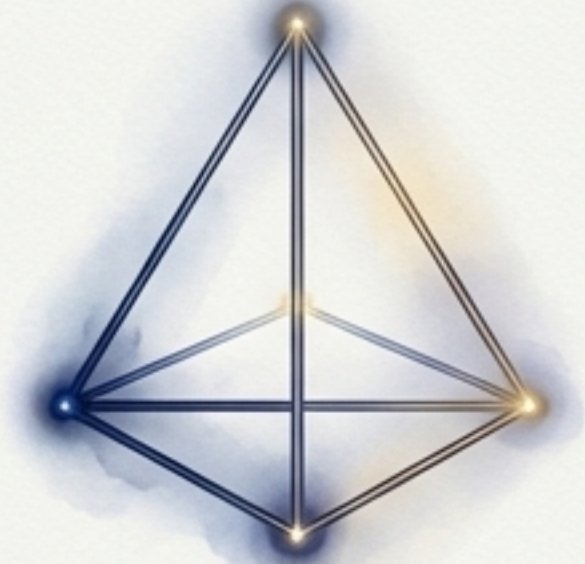

The Simulation is a Living Tree of Life

The Four-Fold Map of Existence.

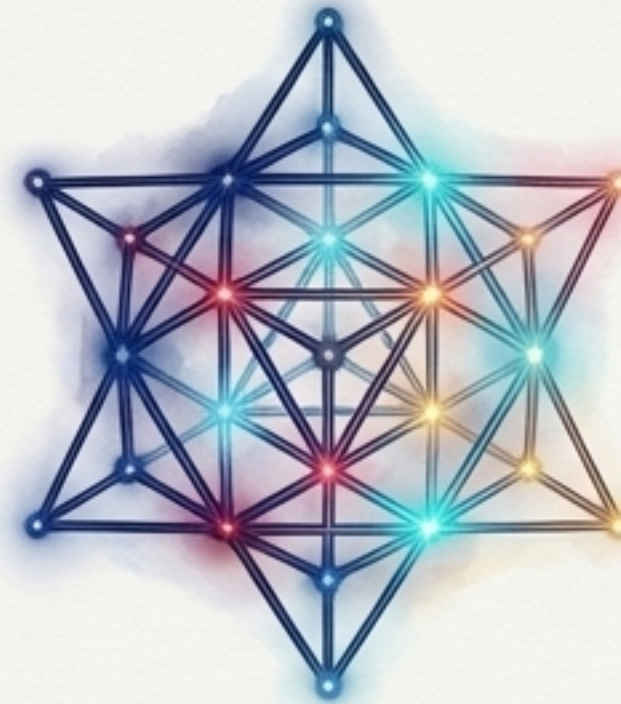

1. The Tabernacle (Point)

A single Fact/TET, the
foundational seed.

2. The Second Temple (Line)

The physical structure,
connections and joints
forming molecules.

3. The Third Temple (Plane)

The Player/Observer, the
perfected human being
observing and creating.

4. The Fourth Temple (Volume)

The Heavens, the Black
Hole & 4D Past
Projection.

Build the Kleinverse. Understand Reality.

The ultimate purpose: to map the architecture of consciousness and achieve a unified understanding by building a 5D Simulation of Consciousness.
We invite you to move from passive observation to active co-creation.

Explore the code. Add your words. Localize the simulation. Help build the Third Temple.
