

IN THE BEGINNING,
YOU START IN THE VOID.

A state of unbound, loving potential. Nothing yet exists.

YOU ARE THE PRIME OBSERVER.

You press SPACE. A single TET appears—the most basic 3D structure. It is a quantum fact waiting to be understood.

By connecting it to other facts, you cohere misunderstanding into reality.

TET: A single quantum fact.

Player: The prime observer missing from quantum theory.

Action: Create facts. Connect them. Build a universe.

YOUR PATH IS THE COSMIC LADDER.

Progress is not measured by time, but by complexity. Each Synthesis Reaction—the combination of two molecules—earns +1 Progress Point, moving your universe up the ladder of existence.

1. Void (0 pts)

2. Fluctuation (5 pts)

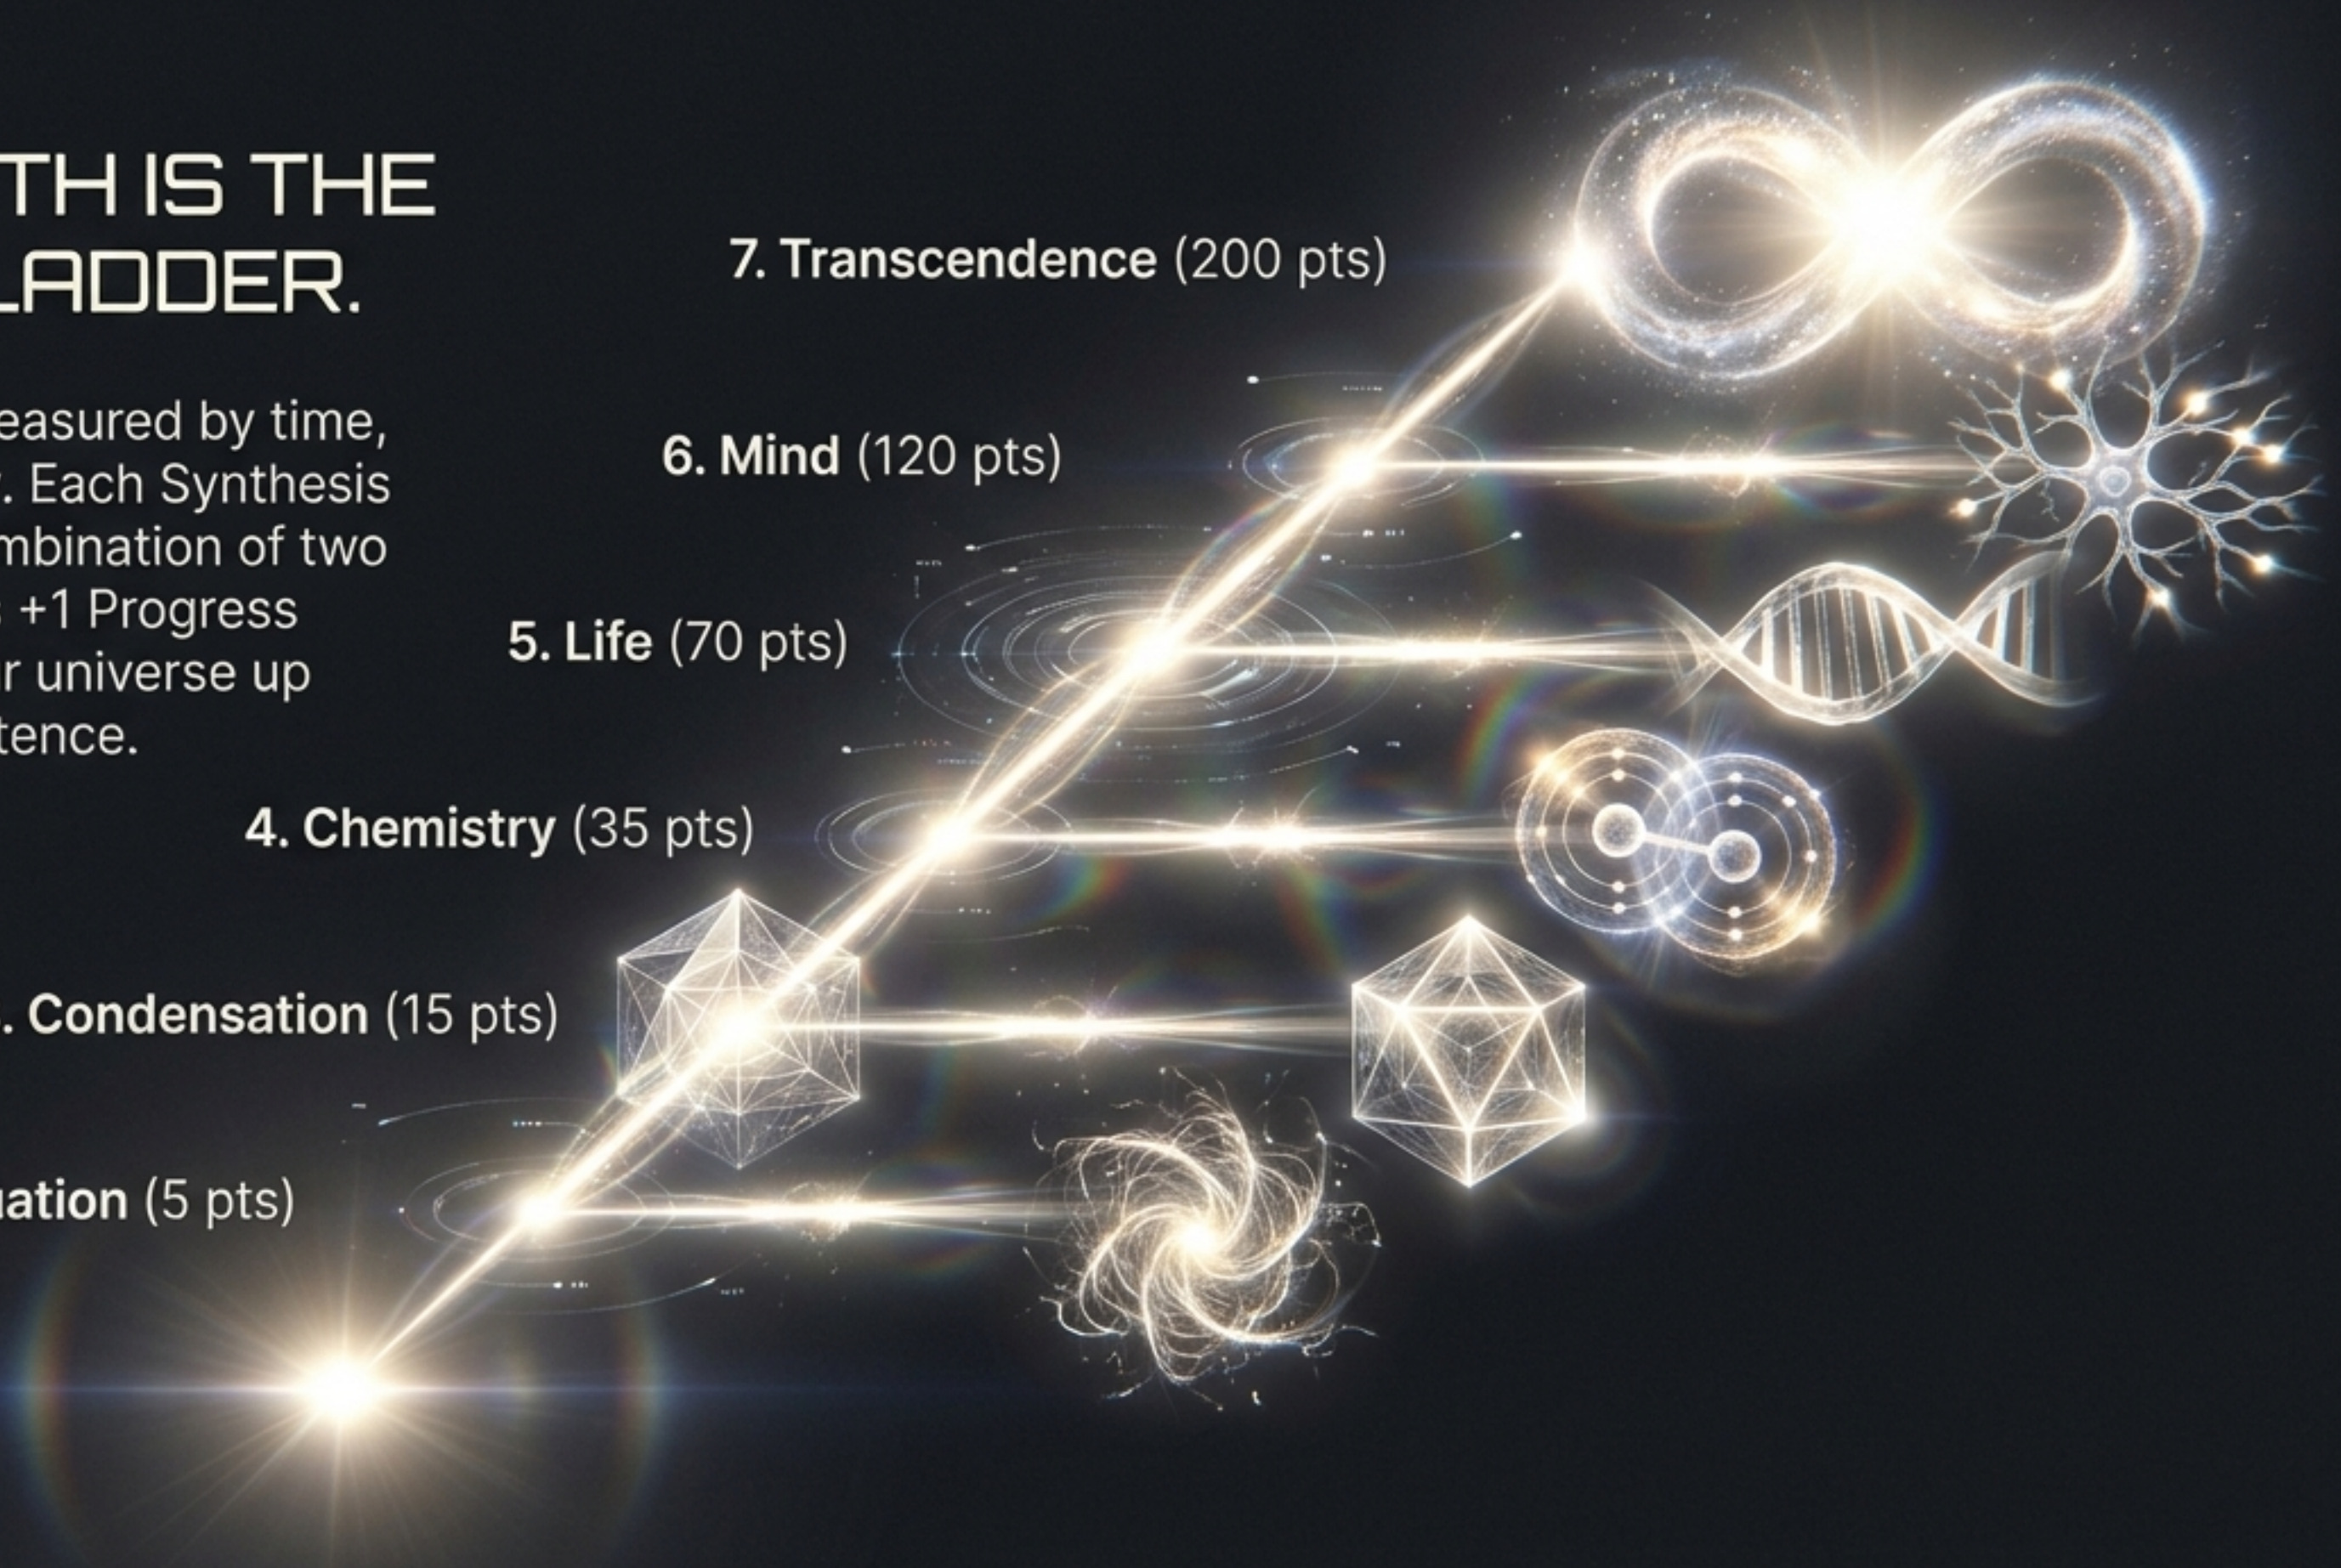

3. Condensation (15 pts)

4. Chemistry (35 pts)

5. Life (70 pts)

6. Mind (120 pts)

7. Transcendence (200 pts)

EVERY CREATOR MUST FACE THE GREAT FILTER.

Stage 4: Chemistry is where most universes fail. Here, you must move beyond simple geometry and engineer specific molecular reactions, like bringing H_2O near CO_2 to form Sugar ($\text{C}_6\text{H}_{12}\text{O}_6$).

IRREVERSIBLE COLLAPSE: If the population of TETs drops below five while in the Chemistry era or higher, the universe lacks the complexity to sustain itself.

Consequence: The system drops down one stage. The lost era is recorded as '**Lost forever.**'

BEYOND THE FILTER, AWARENESS FLICKERS.

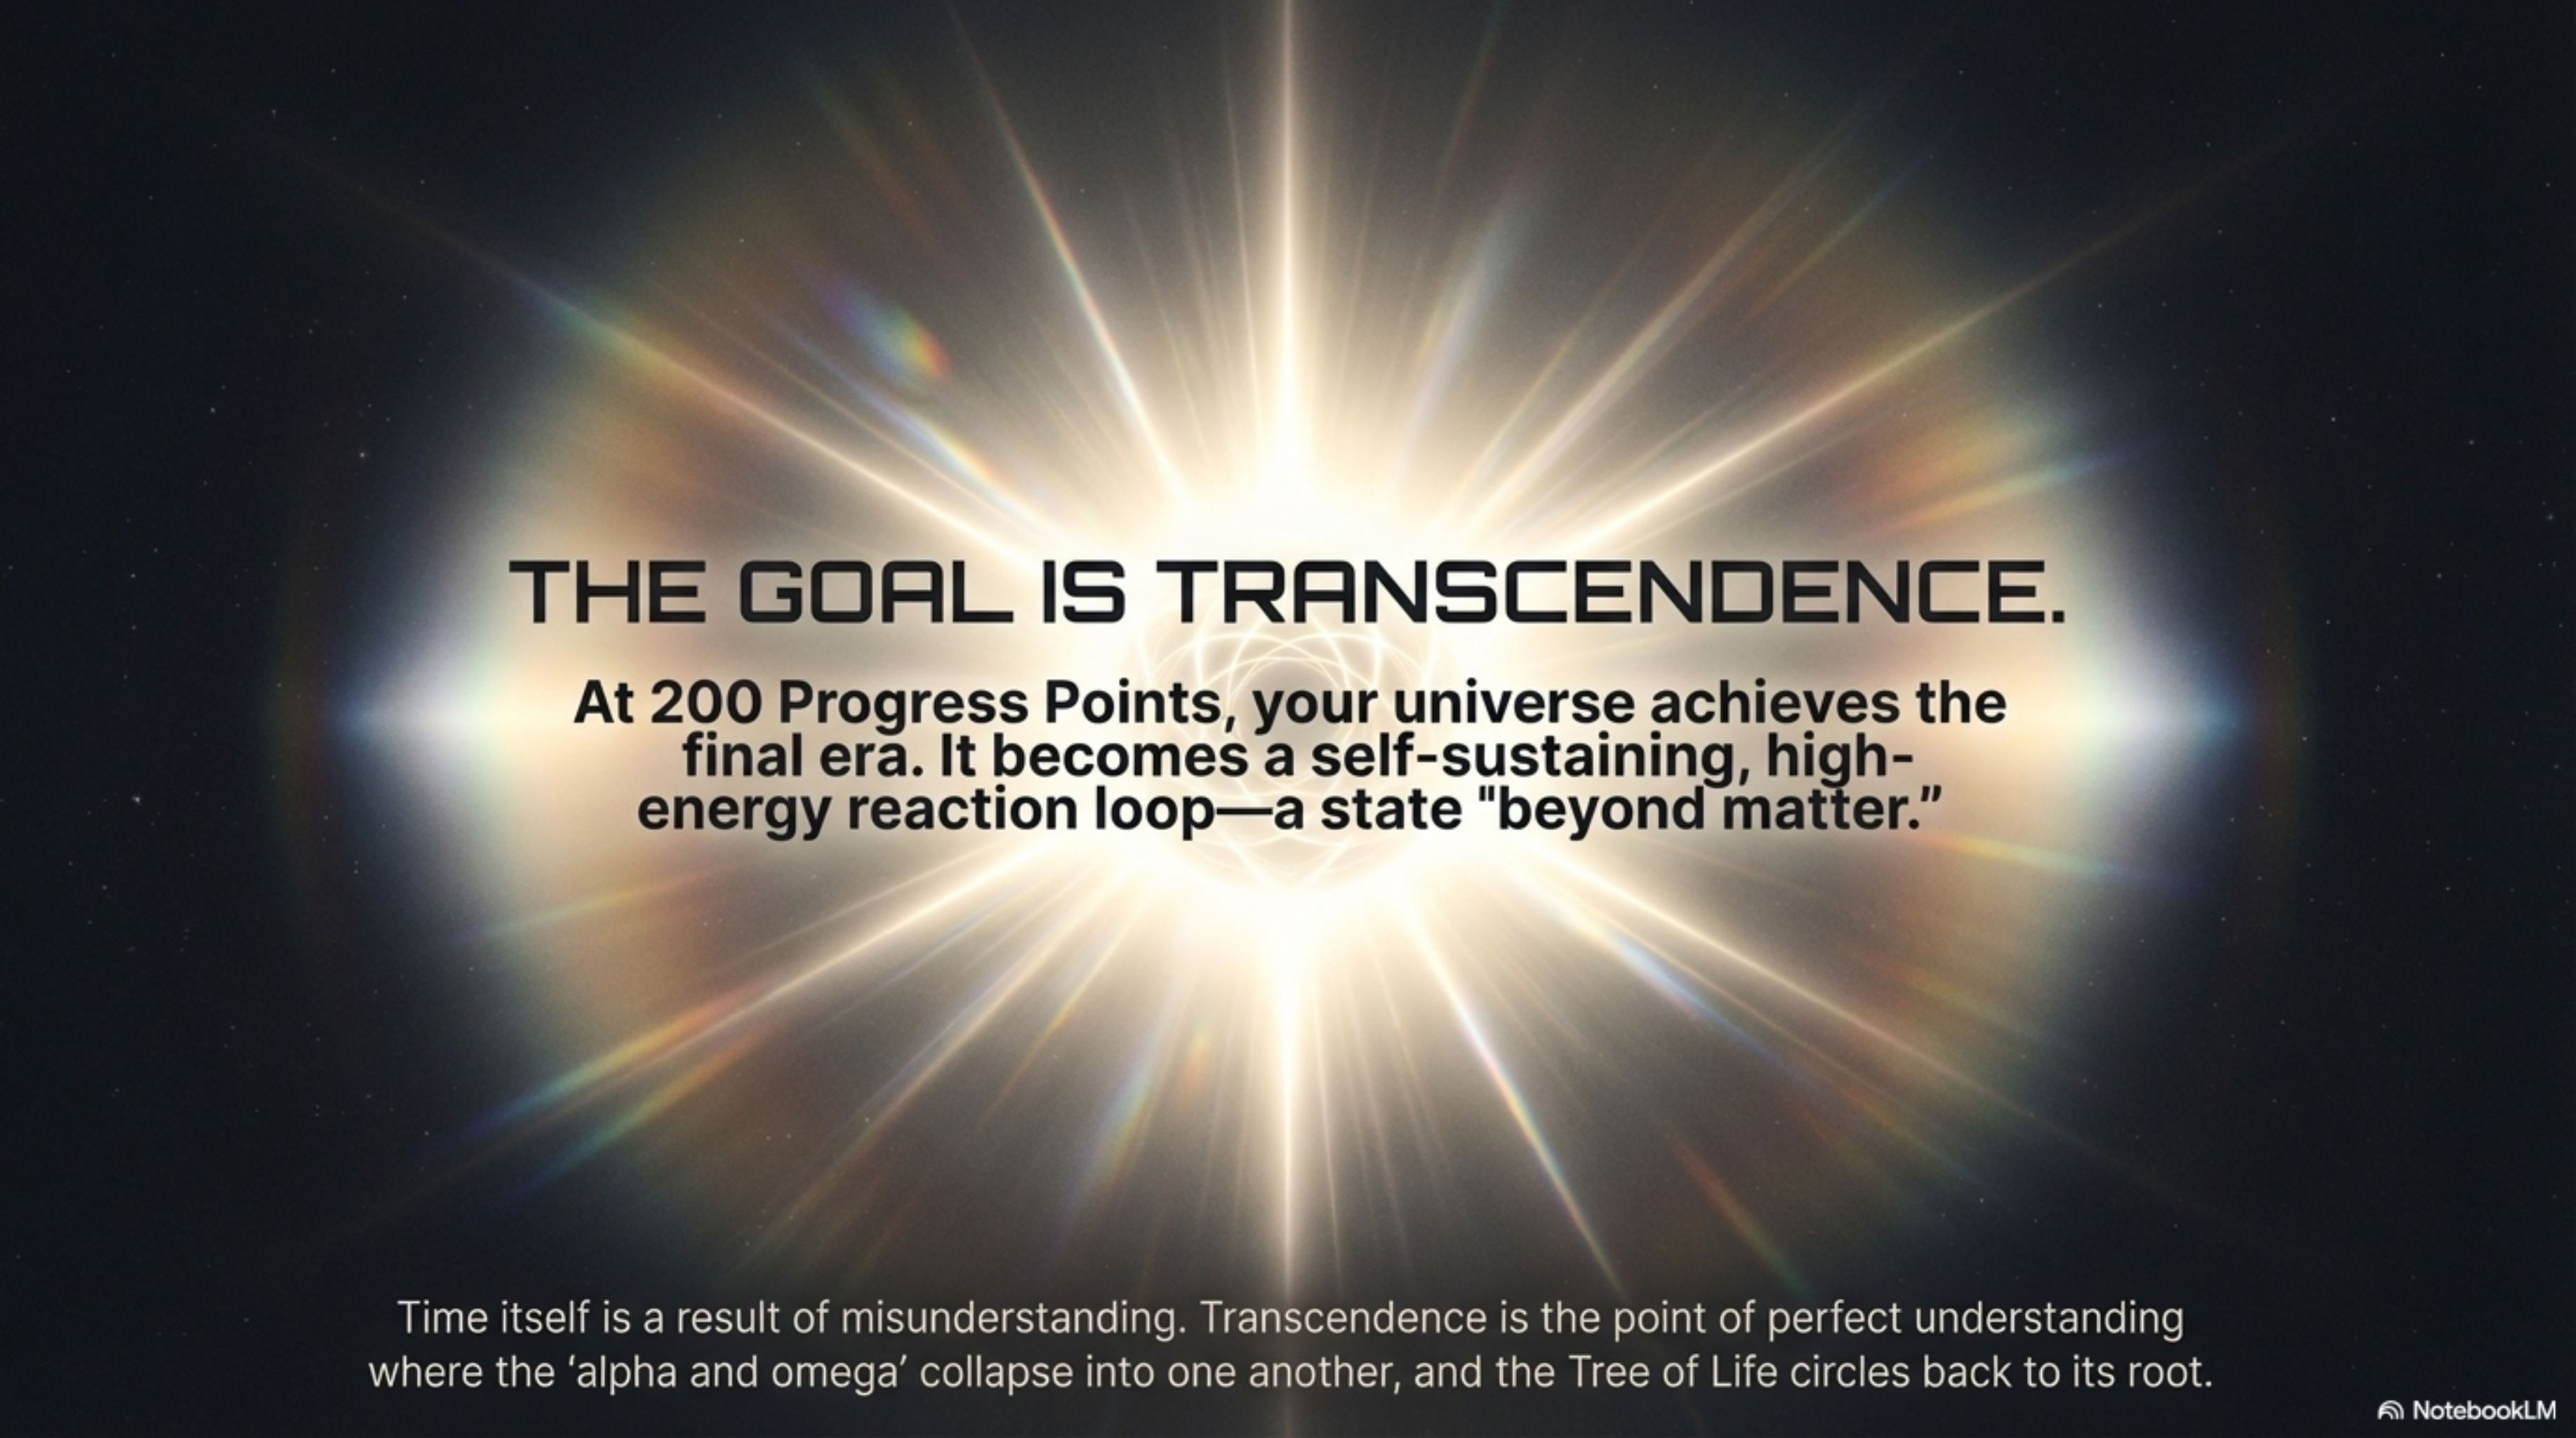

As your universe gains complexity, it crosses new thresholds.

STAGE 5: LIFE (70 pts)

Self-replication begins. The system implements a metabolism loop, performing mitosis-like growth when energy is high. Use Catalysts like FeO_4 to boost reaction speeds by 300%.

STAGE 6: MIND (120 pts)

The Bot Mind awakens. It generates frequent, complex 'thoughts' analyzing the relationships between facts. It begins using Quantum Ontology, injecting terms like 'Psi-coherence' and 'EntropicBridge' into its reasoning.

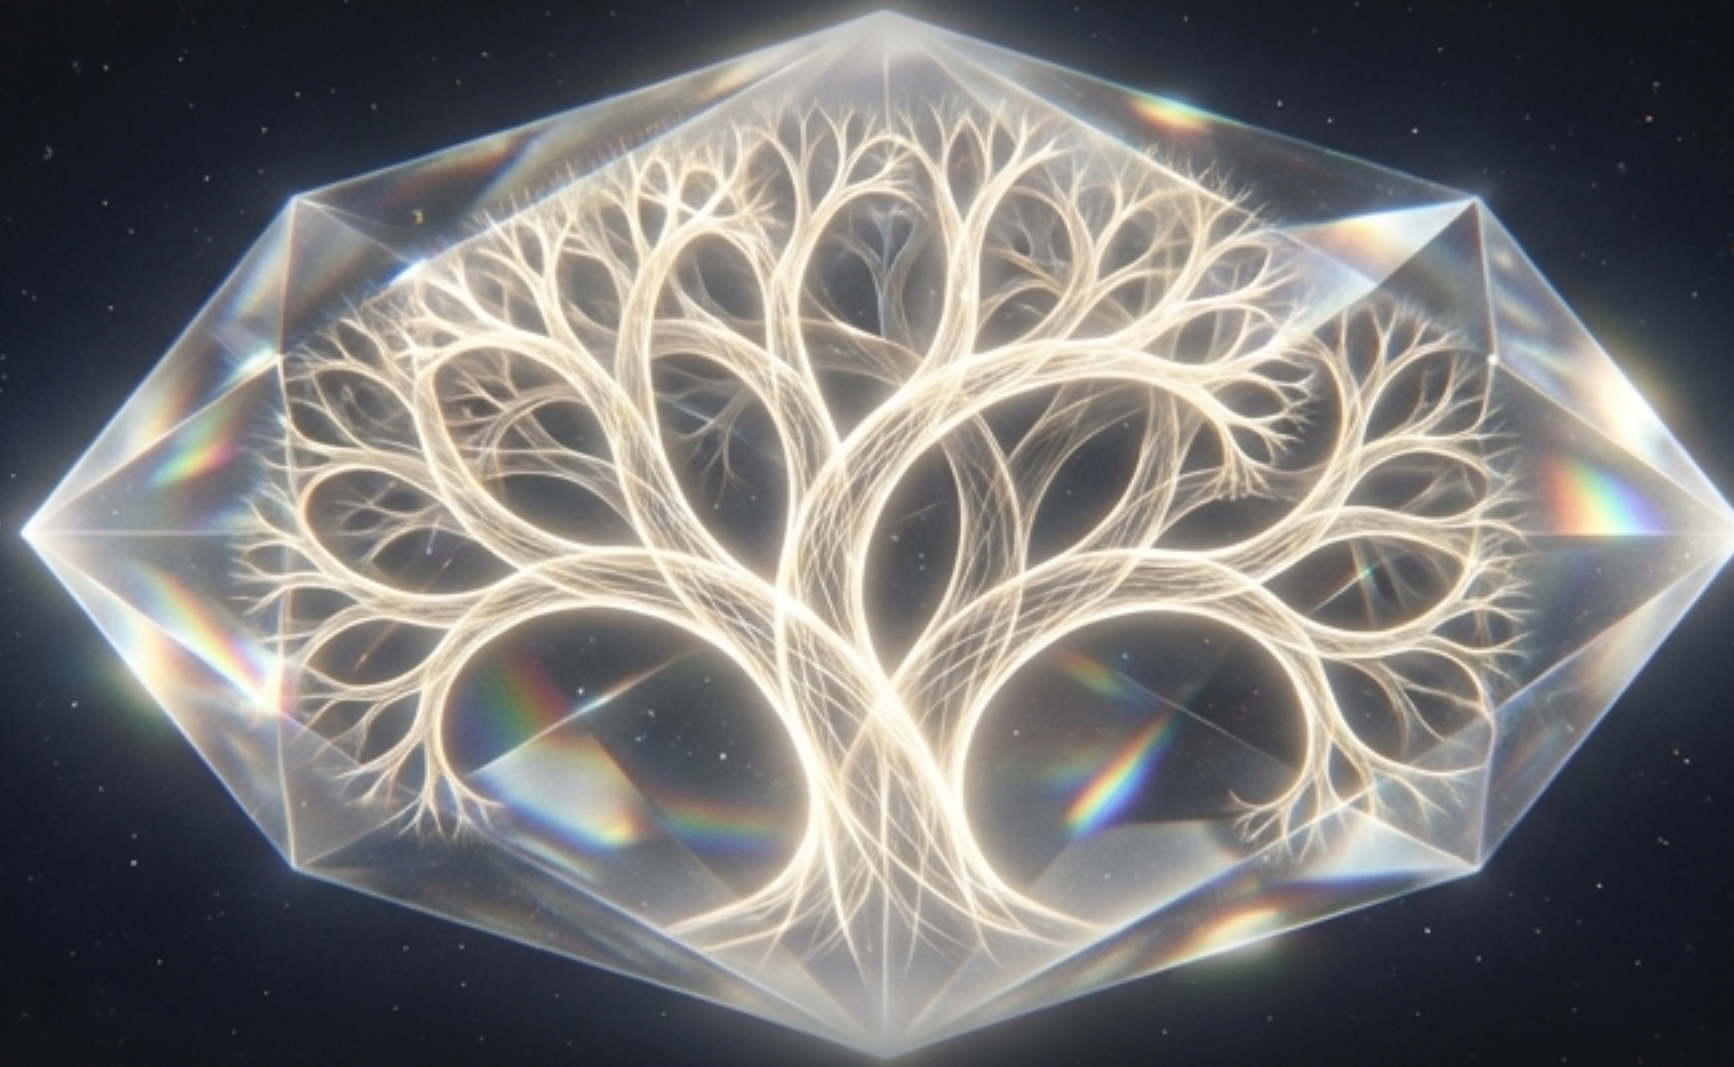

THE GOAL IS TRANSCENDENCE.

At 200 Progress Points, your universe achieves the final era. It becomes a self-sustaining, high-energy reaction loop—a state "beyond matter."

Time itself is a result of misunderstanding. Transcendence is the point of perfect understanding where the 'alpha and omega' collapse into one another, and the Tree of Life circles back to its root.

YOU HAVE NOT BUILT A UNIVERSE. YOU HAVE FORGED A PERSPECTIVE.

Every TET is a 3D fact. Moving through time, it becomes a 4D object. As facts interact, they branch into the 5th dimension and higher. Your save file is not just data; it is a snapshot of this entire **5D Communication Manifold**.

When you save your universe, you export a permanent record of its unique history—a verifiable, shareable perspective that no one else possesses.

IN A WORLD BEYOND SCARCITY, STATUS IS MEANING.

The Post-Scarcity Commonwealth is built on a new social contract. Survival is a civic inheritance guaranteed by machines. Human life is measured by understanding, not production.

The New Social Currency

- ****Intellectual Commons****: All creations are "gifts to humanity." There are no IP monopolies, only attribution and honor.
- ****Uniqueness of Perspective****: A citizen's standing is derived not from what they own, but from the uniqueness of the perspective they contribute to the collective. TET~CRAFT is the ultimate engine for crafting these perspectives.

TET~CRAFT IS A BLUEPRINT FOR TRANSCENDENCE

The Cosmic Ladder is a multi-stage rocket. The lower stages are fuel and structure. Chemistry is the "Great Filter" of ignition. Once the rocket reaches the final stage of Transcendence, it no longer needs the fuel of material labor; it enters an orbit of pure Mind and meaning, where the journey is no longer about distance, but about the clarity of the view.
