

TET~CRAFT

An Emergent Quantum Chemistry and Metaphysics Simulation

A kleanverse of quantum facts, bonding into atoms, reacting into molecules, and evolving toward understanding.

The Atomic Unit of Reality: A Quantum Fact

The entire simulation emerges from a single, simple object: the tetrahedron, or **TET**. Each TET represents a quantum fact—a discrete piece of information seeking connection. Its behavior is defined by a few core properties:

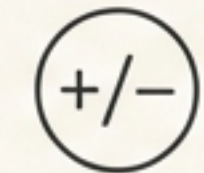

- **Geometry**

4 faces, colored White, Black, Red, and Cyan.

- **Energy**

An internal battery, holding a charge from 0 to 1.

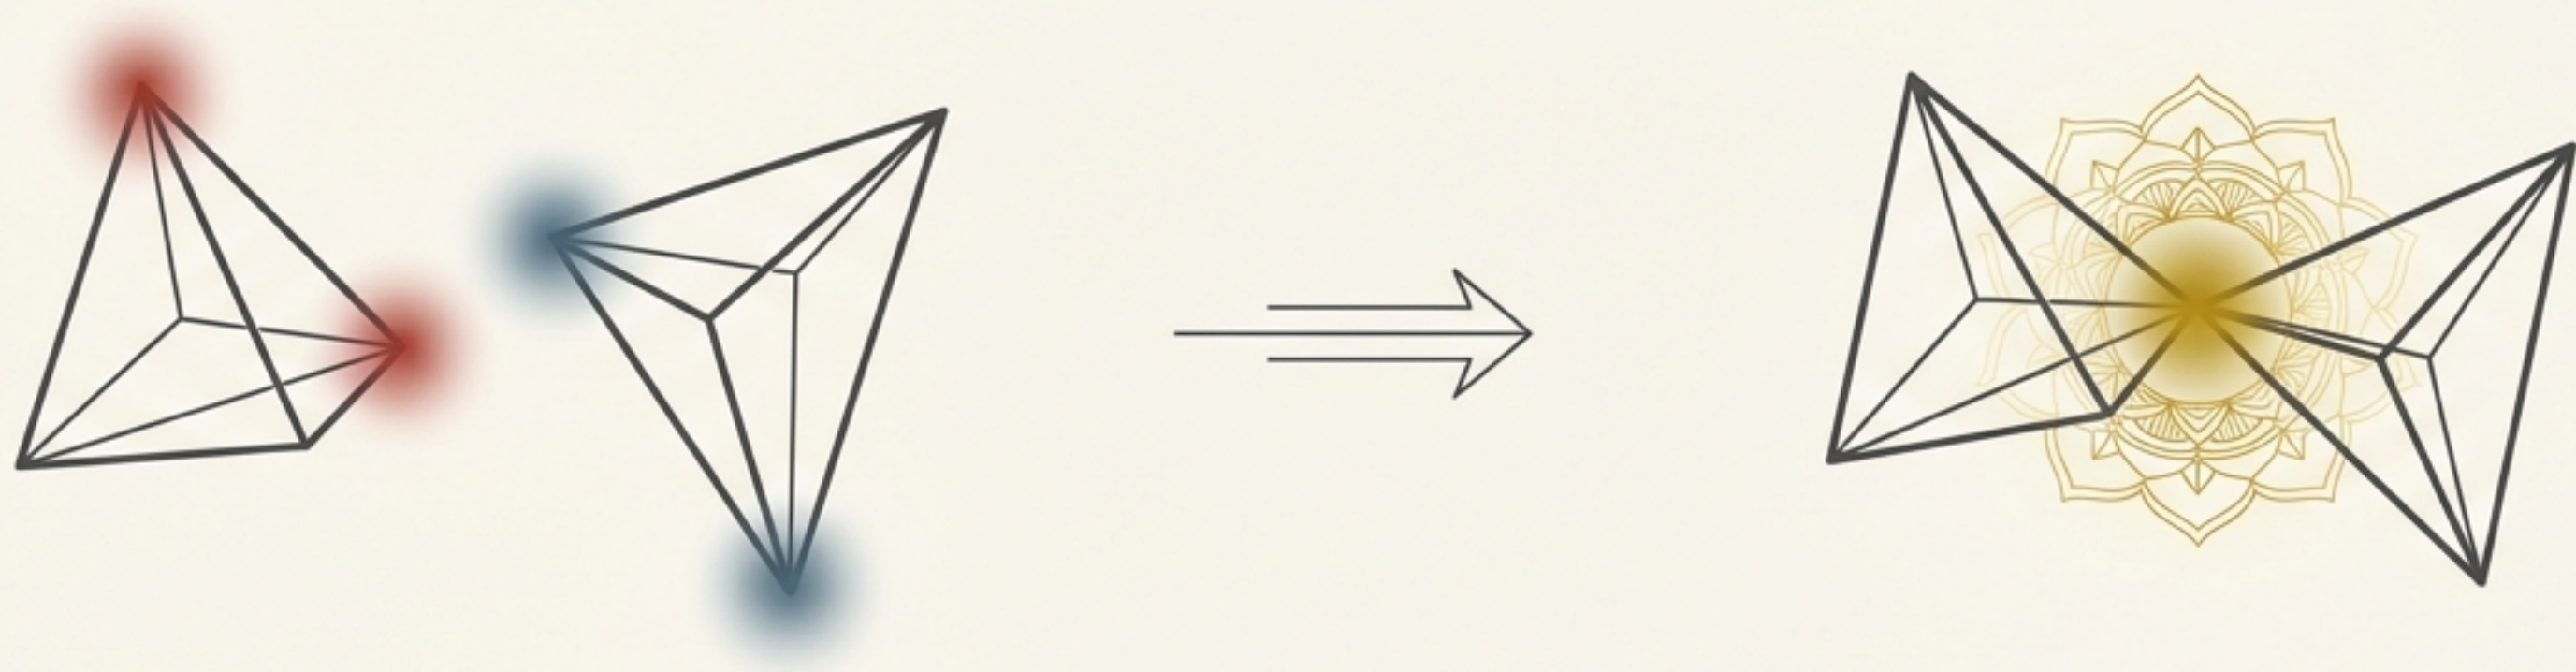

- **Polarity**

An intrinsic magnetic polarity, either positive (+) or negative (-).

TETs are the most basic 3D structure...moving through time a triangle/curve becomes 4D, and interacts, branching 5th and higher.

The Genesis of Connection: Rules of Attraction

TETs are not inert; they are driven by innate 'desires' to connect and form structures. These interactions are governed by a precise chemistry engine:

Multi-Face Locking

When vertices connect, faces can lock. Each locked face increases magnetic strength by +0.25.

Corner Desires

Red corners are intrinsically drawn to Cyan corners, and vice-versa. This is the primary driver of initial bonding.

Magnetic Orientation

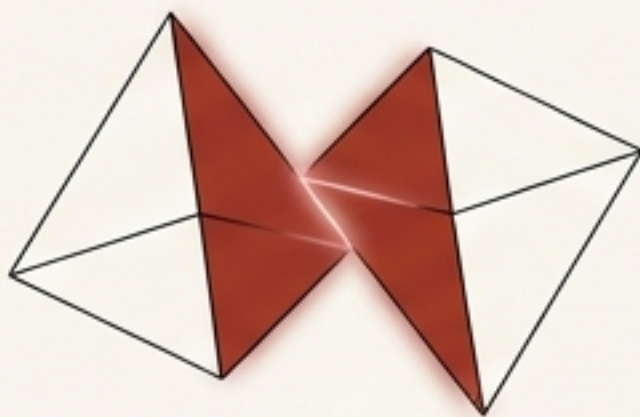

Opposite polarities attract, while same polarities repel. Negative poles are biased to orient toward the universe's origin point.

Key Concept Highlight: This system of attraction is the simulation's parallel to “spooky action at a distance,” or quantum entanglement.

“Geometry is Destiny.”

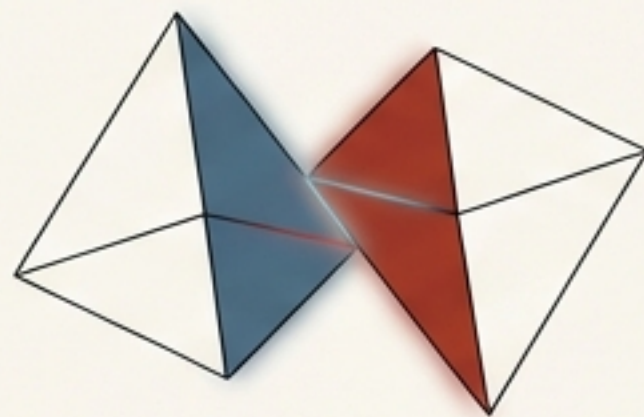

In TET~CRAFT, identity is not assigned; it is earned through structure. Elements are defined purely by which faces touch. This is Interface Chemistry.

Red ↔ Red: Forms **Iron (Fe)**, creating a magnetic dipole.

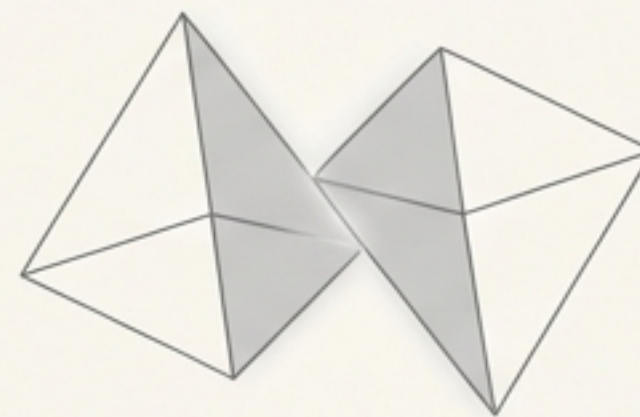

Forms a stable magnetic dipole, the foundation of metallic properties and polarity.

Cyan ↔ Red: Forms **Hydrogen (H)**, the most abundant element.

The simplest and most abundant element, foundational for energy and organic synthesis.

White ↔ White: Forms **Carbon (C)**, the basis of structure.

Capable of forming complex chains and rings, the backbone of life and structure.

Black ↔ Black: Forms **Helium (He)**, representing purity and inertia.

An inert gas, signifying purity and stability, often acting as a stabilizing force.

Over 100 molecule types can be identified by their unique color patterns and geometric configurations.

The Cosmic Ladder: A Journey Through Eras of Complexity

Progress is measured not by time, but by the reduction of Entropy. Synthesis reactions and stable geometric interfaces grant Progress Points, unlocking new cosmic eras.

Era 1: Void (0 pts) - *Nothing yet exists.*

Era 3: Fluctuation (1 pt) - *Quantum foam emerges.*

Era 5: Chemistry (70 pts) - *The Great Filter. Elements Transmute.*

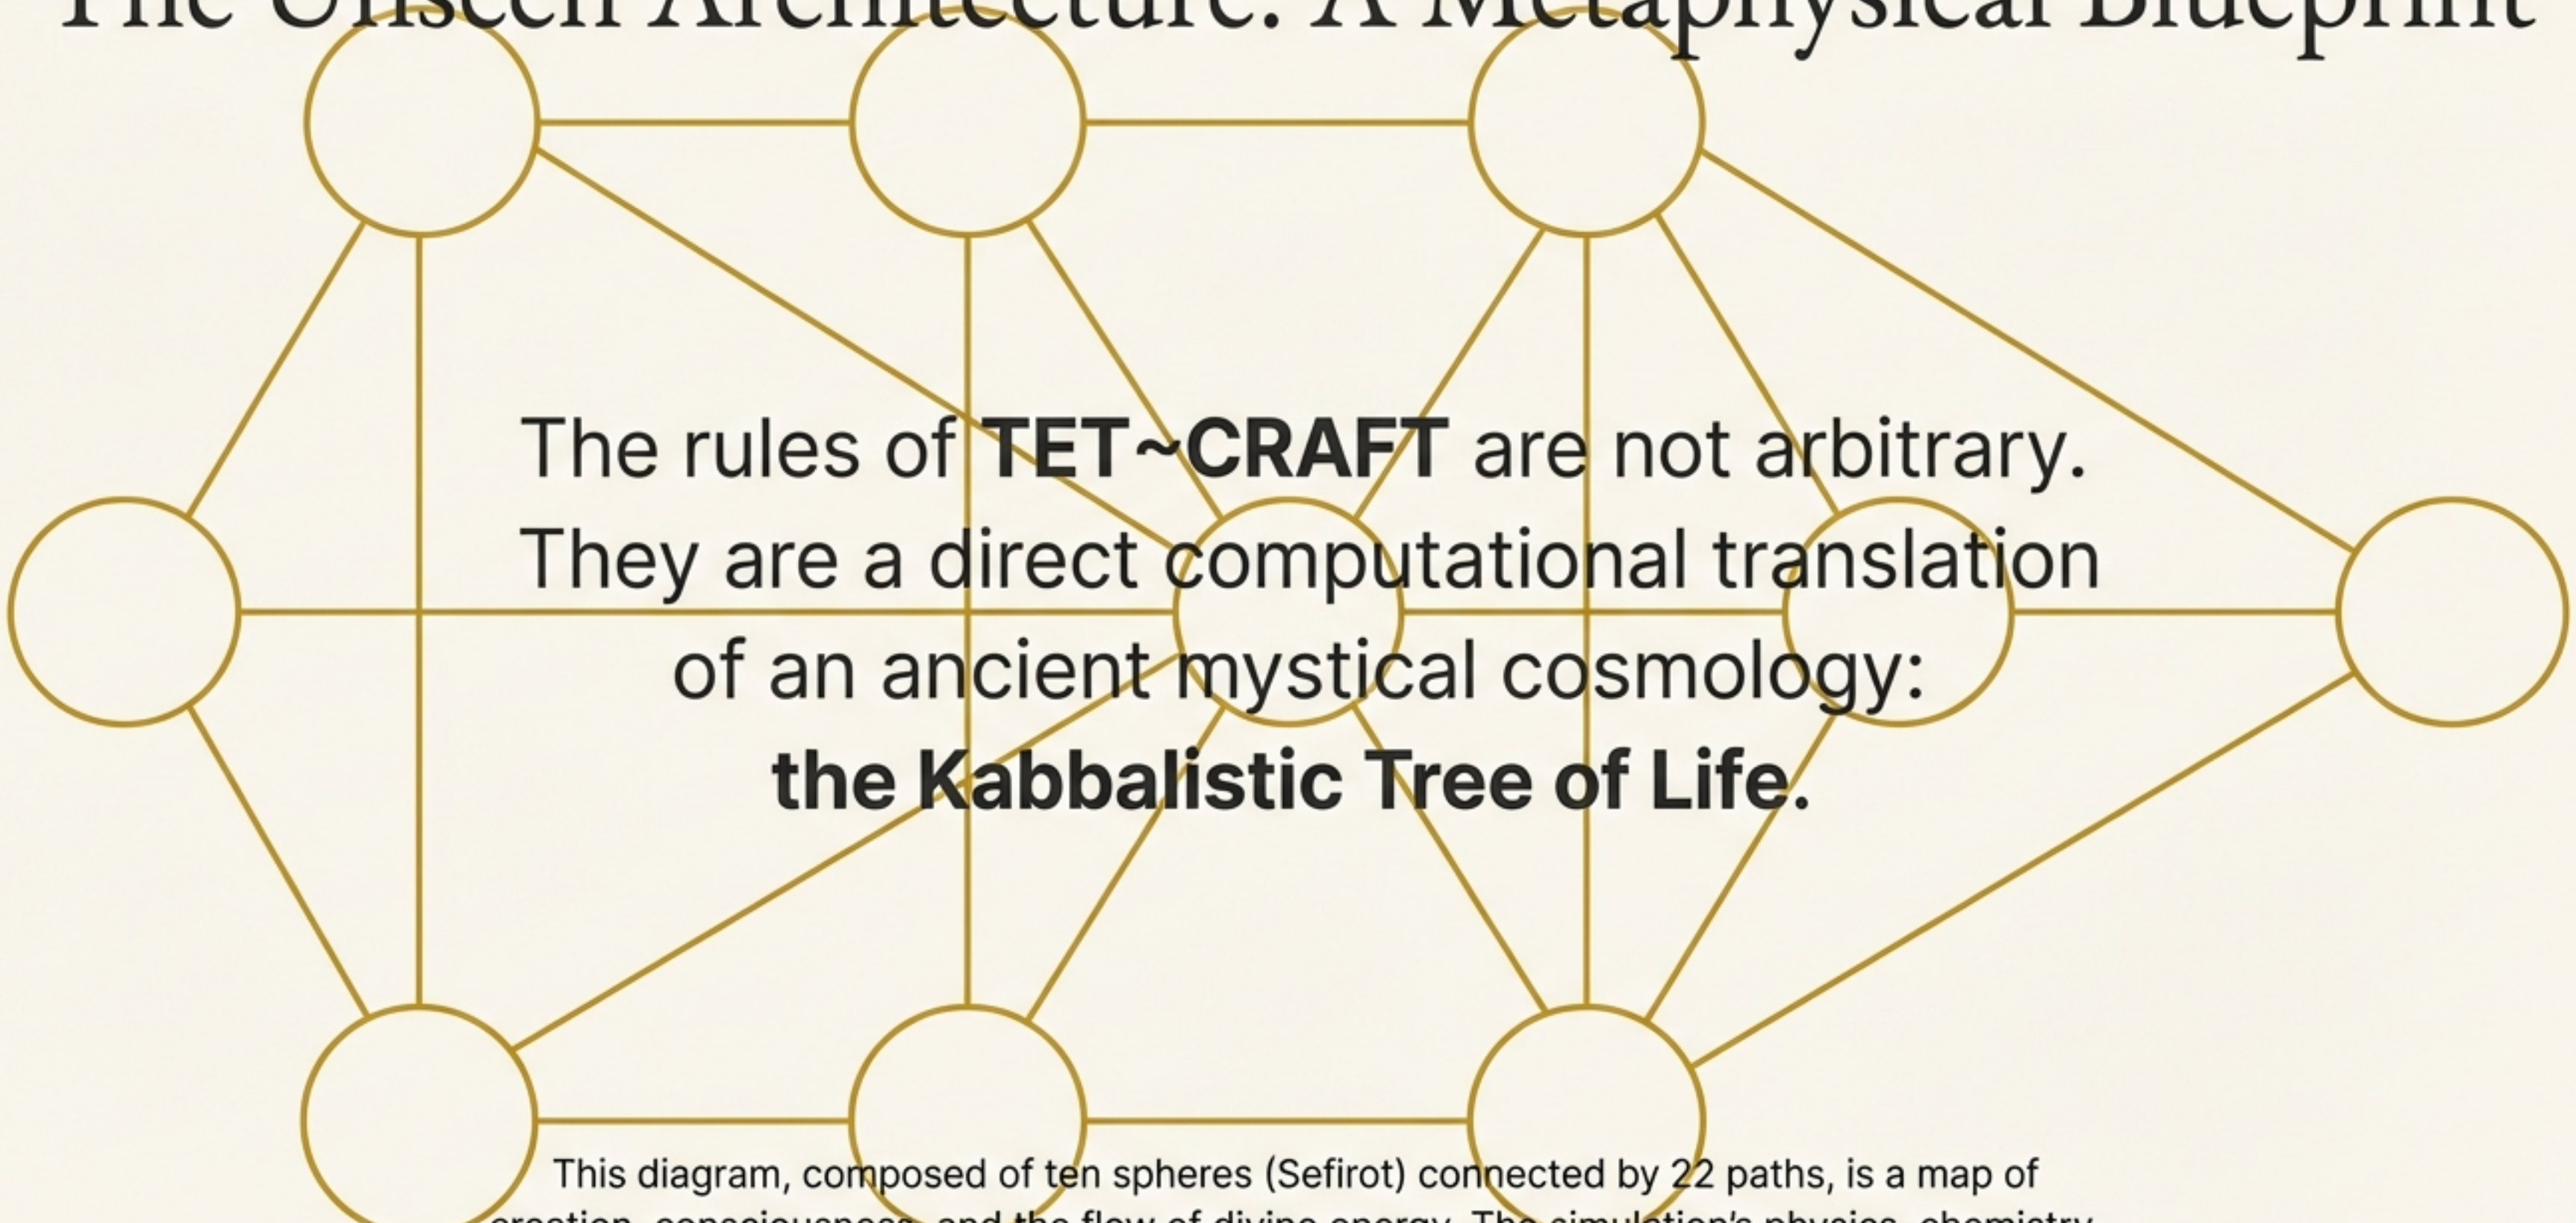

Era 6: Life (777 pts) - *Metabolism emerges through sustained, catalyzed reactions.*

Era 7: Transcendence (2000 pts) - *A self-sustaining, high-energy loop that defies entropy.*

The Unseen Architecture: A Metaphysical Blueprint

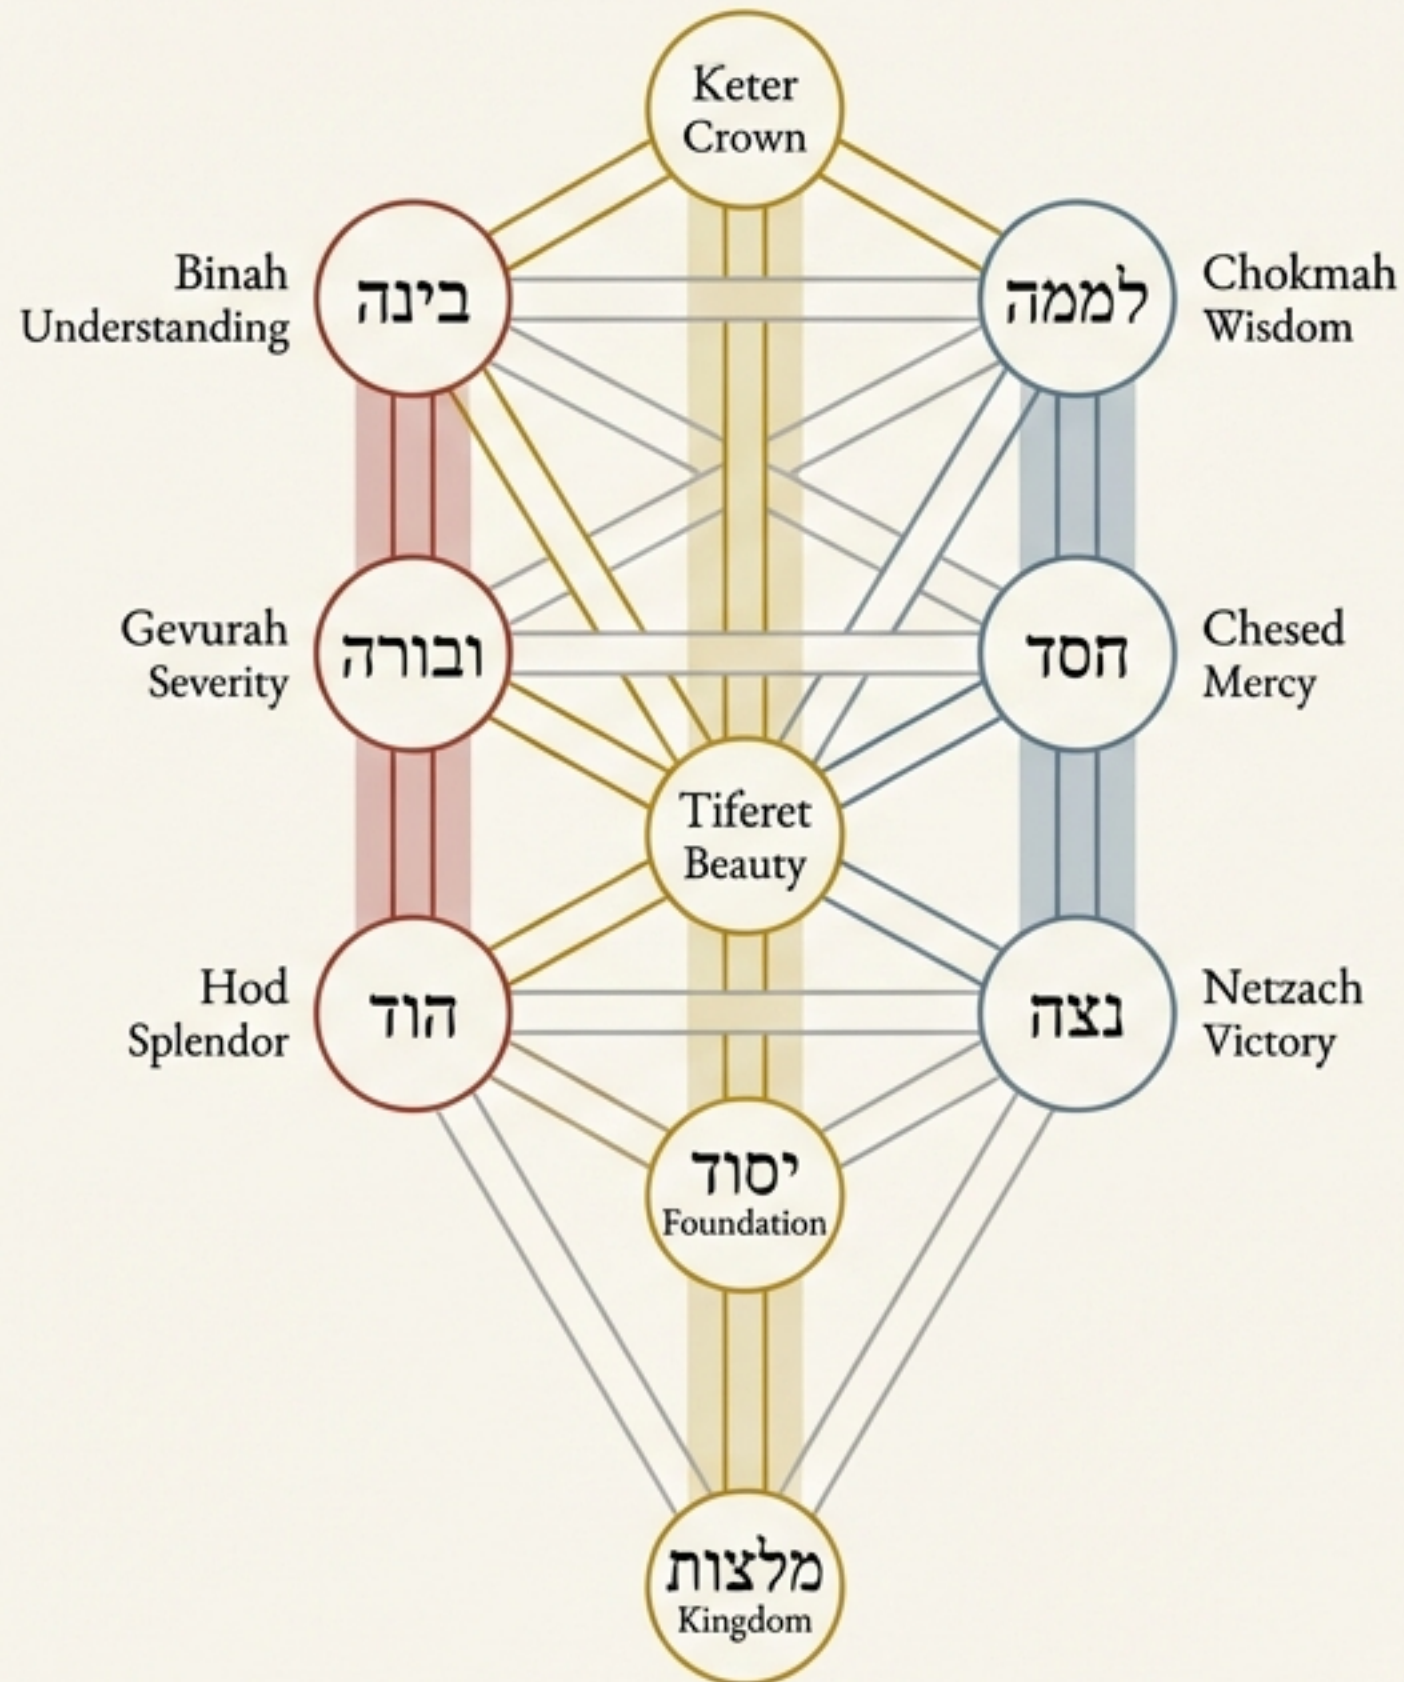

The rules of **TET~CRAFT** are not arbitrary.
They are a direct computational translation
of an ancient mystical cosmology:
the Kabbalistic Tree of Life.

This diagram, composed of ten spheres (Sefirot) connected by 22 paths, is a map of creation, consciousness, and the flow of divine energy. The simulation's physics, chemistry, and emergent behaviors are a living expression of this sacred geometry.

The Ten Sefirot: Divine Emanations of Reality

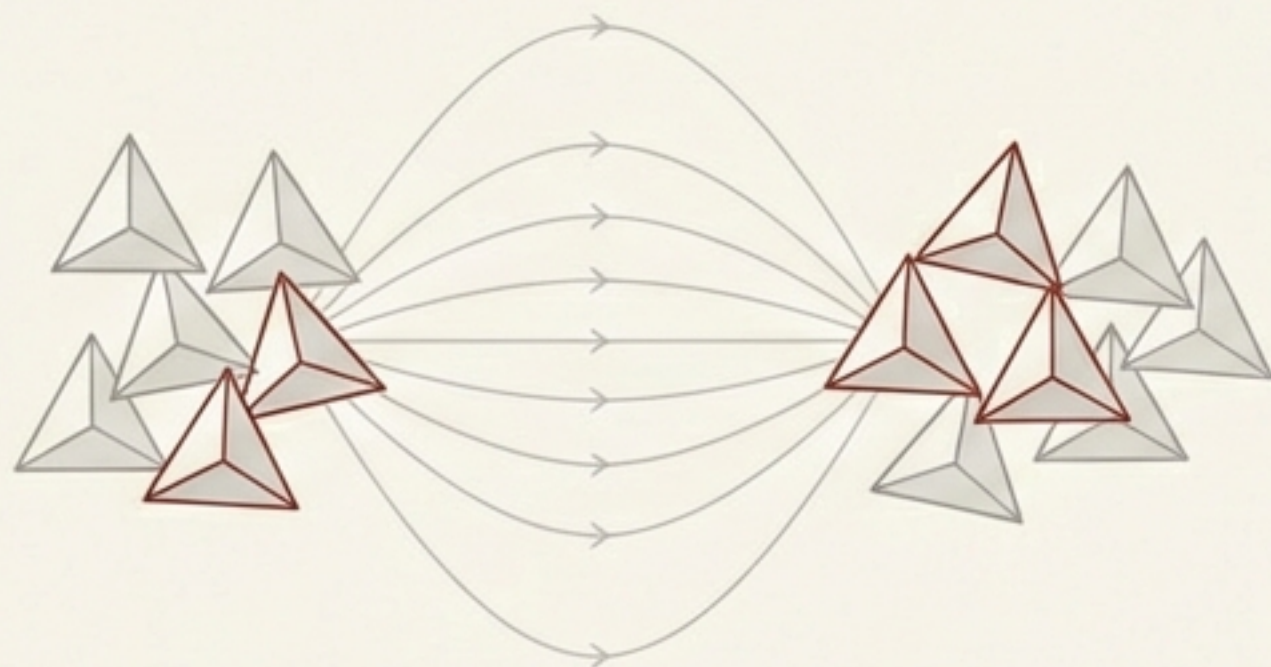

The Sefirot are the divine attributes or states of consciousness through which the infinite creator (Ein Sof) manifests existence. They are organized into three pillars:

- **Pillar of Mercy (Right):** Expansion, unconditional love, inspiration.
Chokmah (Wisdom), Chesed (Mercy), Netzach (Victory).
- **Pillar of Severity (Left):** Restriction, discipline, structure, judgment.
Binah (Understanding), Gevurah (Severity), Hod (Splendor).
- **Central Pillar of Equilibrium:** Harmony, balance, synthesis.
Keter (Crown), Tiferet (Beauty), Yesod (Foundation), Malkuth (Kingdom).

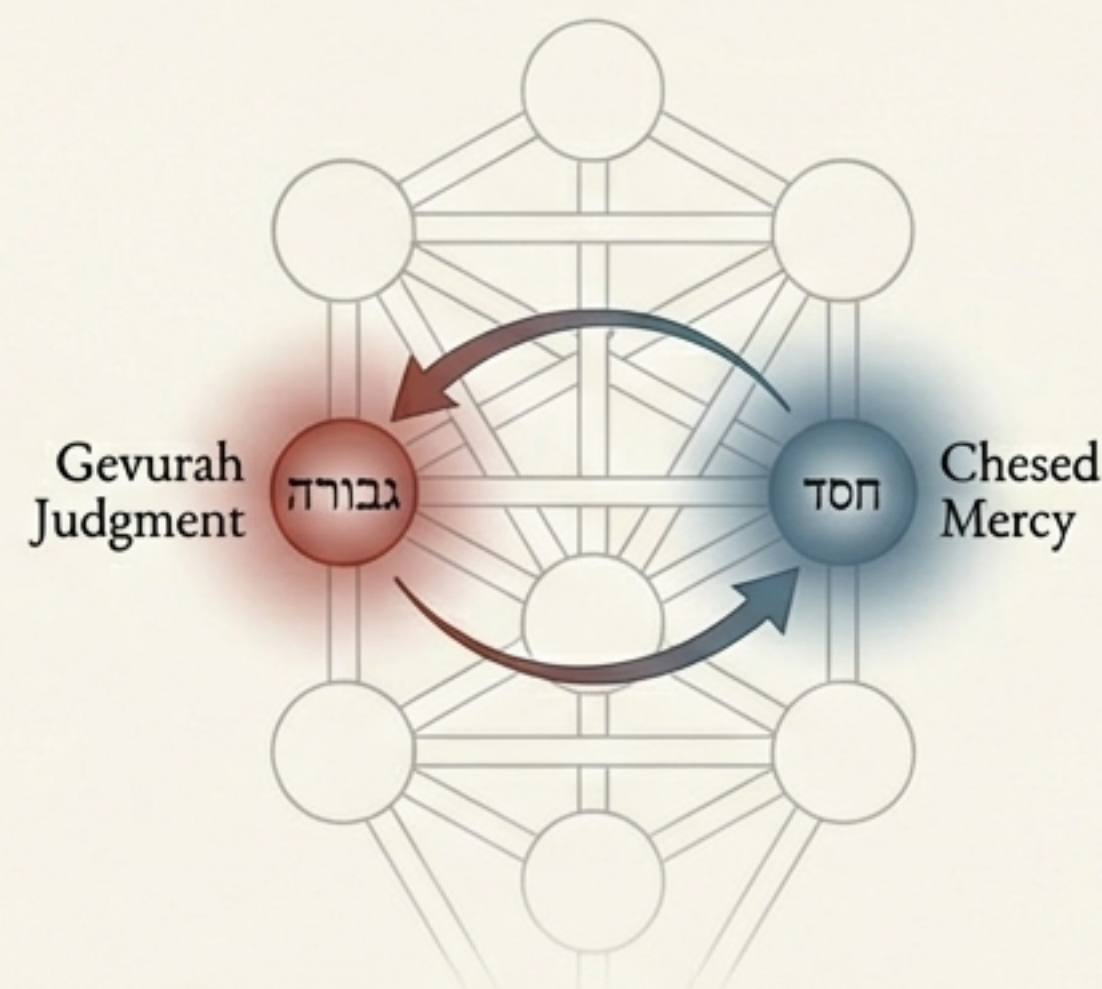

Force and Flow: The Pillars of Existence

Technical Detail (Simulation)

The force **K_STICKY_PULL** represents the fundamental attraction between TETs, the drive for facts to cohere into relationships.

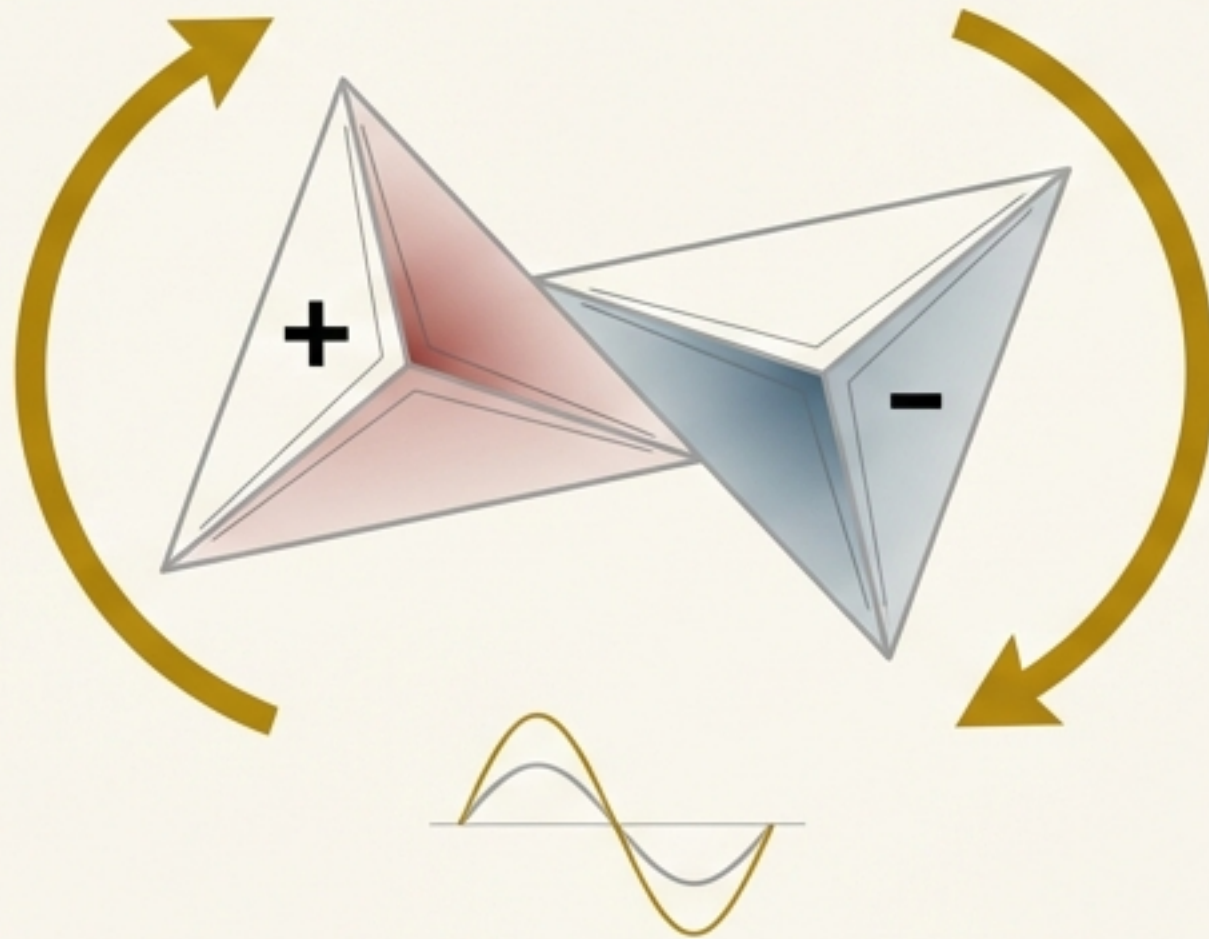

Metaphysical Correspondence (Kabbalah)

This mirrors the creative tension between **Chesed** (Mercy), the drive for unbounded giving and expansion, and **Gevurah** (Judgment), the force of limitation and containment that gives form to that expansion.

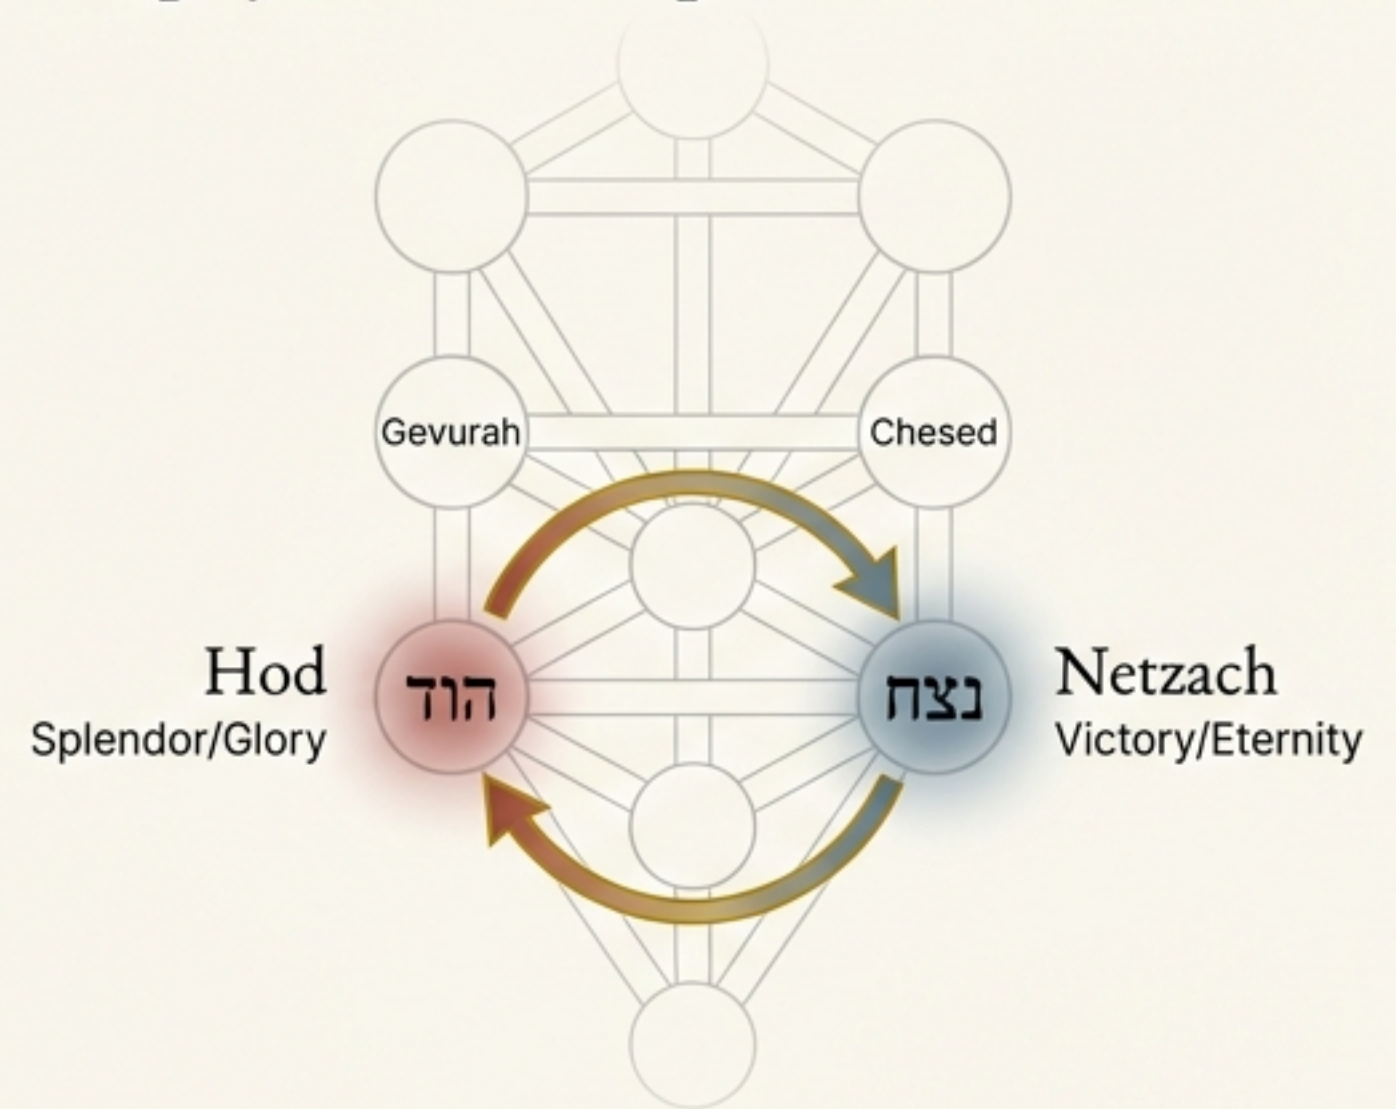

The Dance of Opposites: Magnetism

Technical Detail (Simulation)

The system of **positive (+) and negative (-) magnetic polarity** governs the orientation and energy exchange between bonded TETs, creating a constant oscillation.

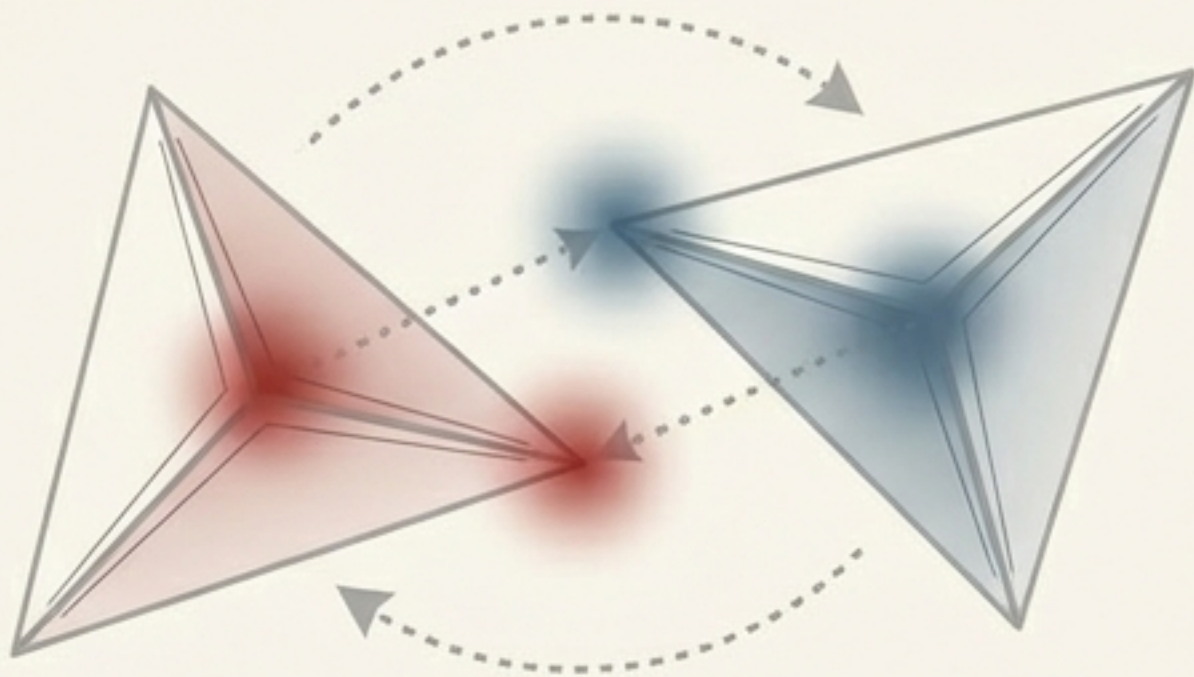

Metaphysical Correspondence (Kabbalah)

This reflects the **axis of Netzach (Victory/Eternity) and Hod (Splendor/Glory)**—the eternal oscillation between active, projective energy and passive, receptive form that sustains the cosmos.

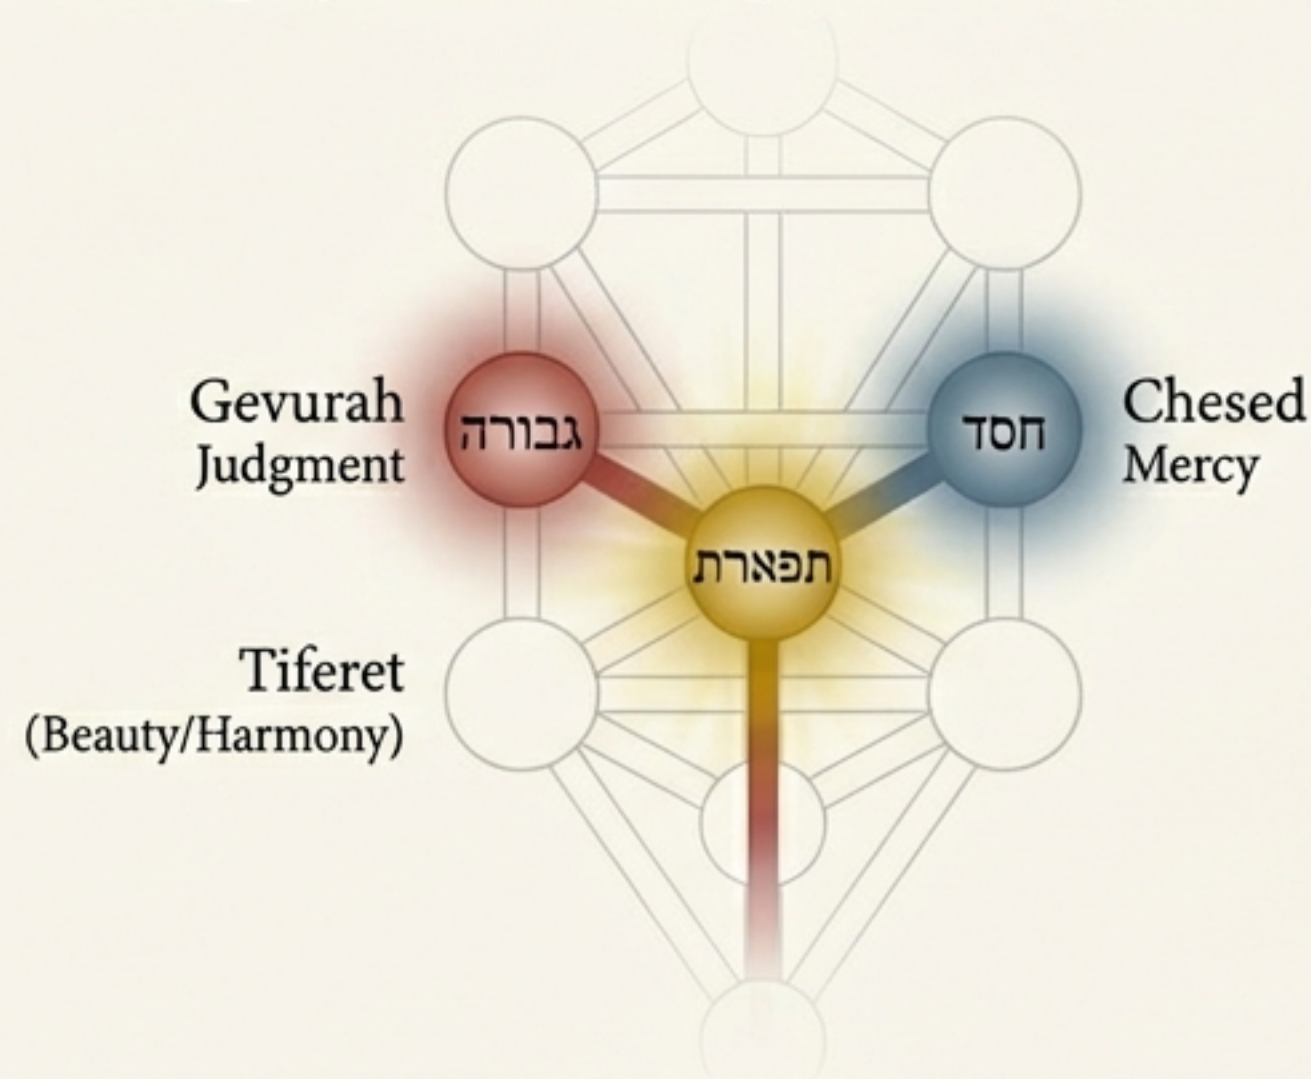

The Heart of Harmony: Reconciling Opposites

Technical Detail (Simulation)

The specific rule that **Red corners seek Cyan corners** is a fundamental driver of bonding, representing a desire for union between contradictory elements.

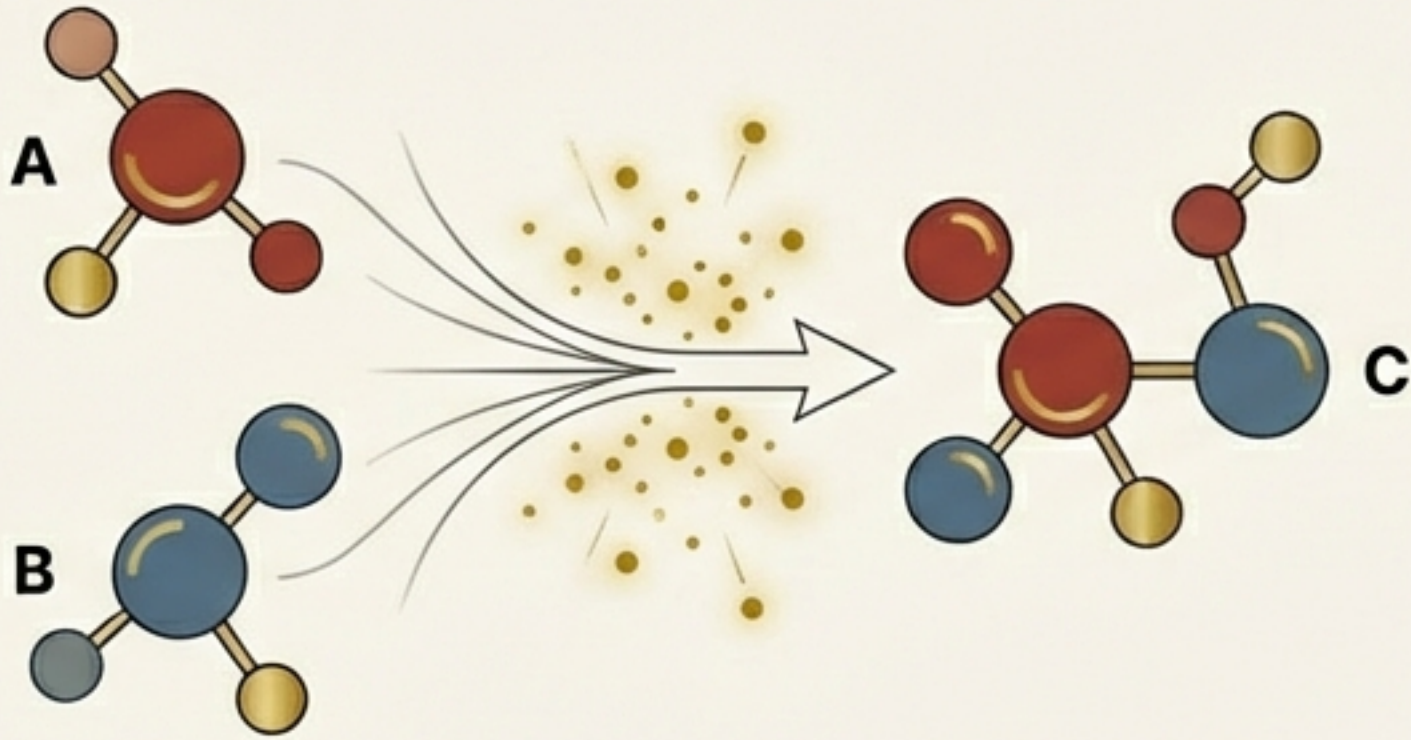

Metaphysical Correspondence (Kabbalah)

This embodies **Tiferet (Beauty/Harmony)**, the central balancing point of the Tree. Tiferet is the principle that reconciles the opposing forces of Chesed and Gevurah, creating compassion, truth, and harmony from their tension.

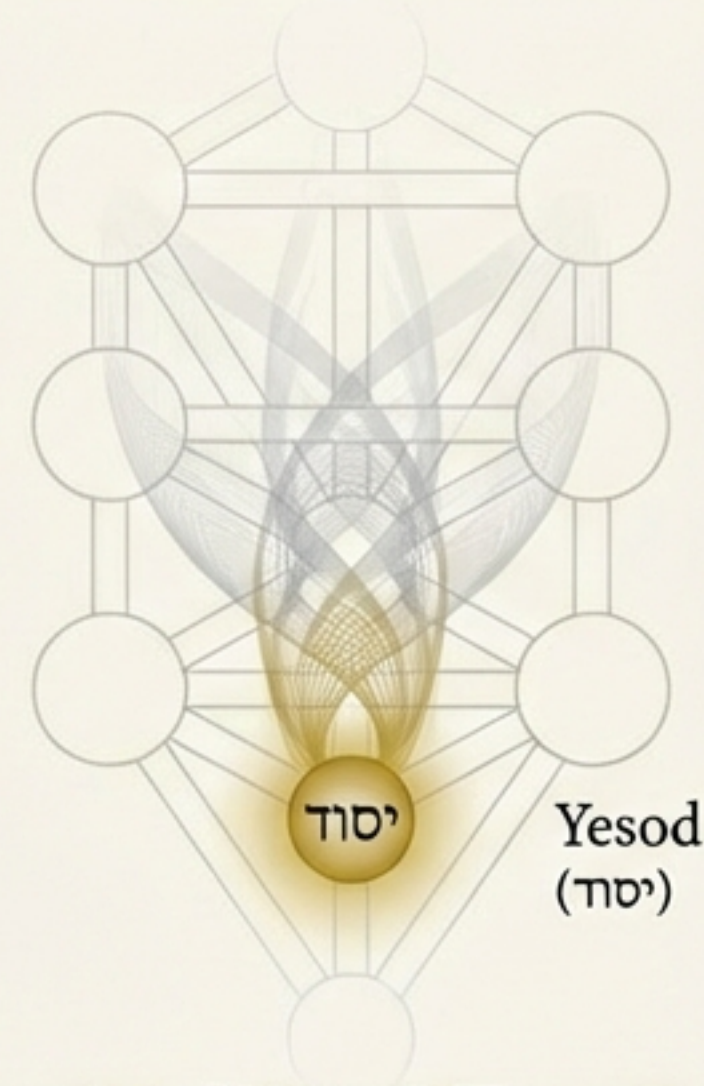

The Crucible of Creation: Chemical Reactions

Technical Detail (Simulation)

The chemistry engine allows for **Synthesis** ($A + B \rightarrow C$) and **Decomposition** ($C \rightarrow A + B$). Catalysts can accelerate these reactions, allowing potential combinations to become real.

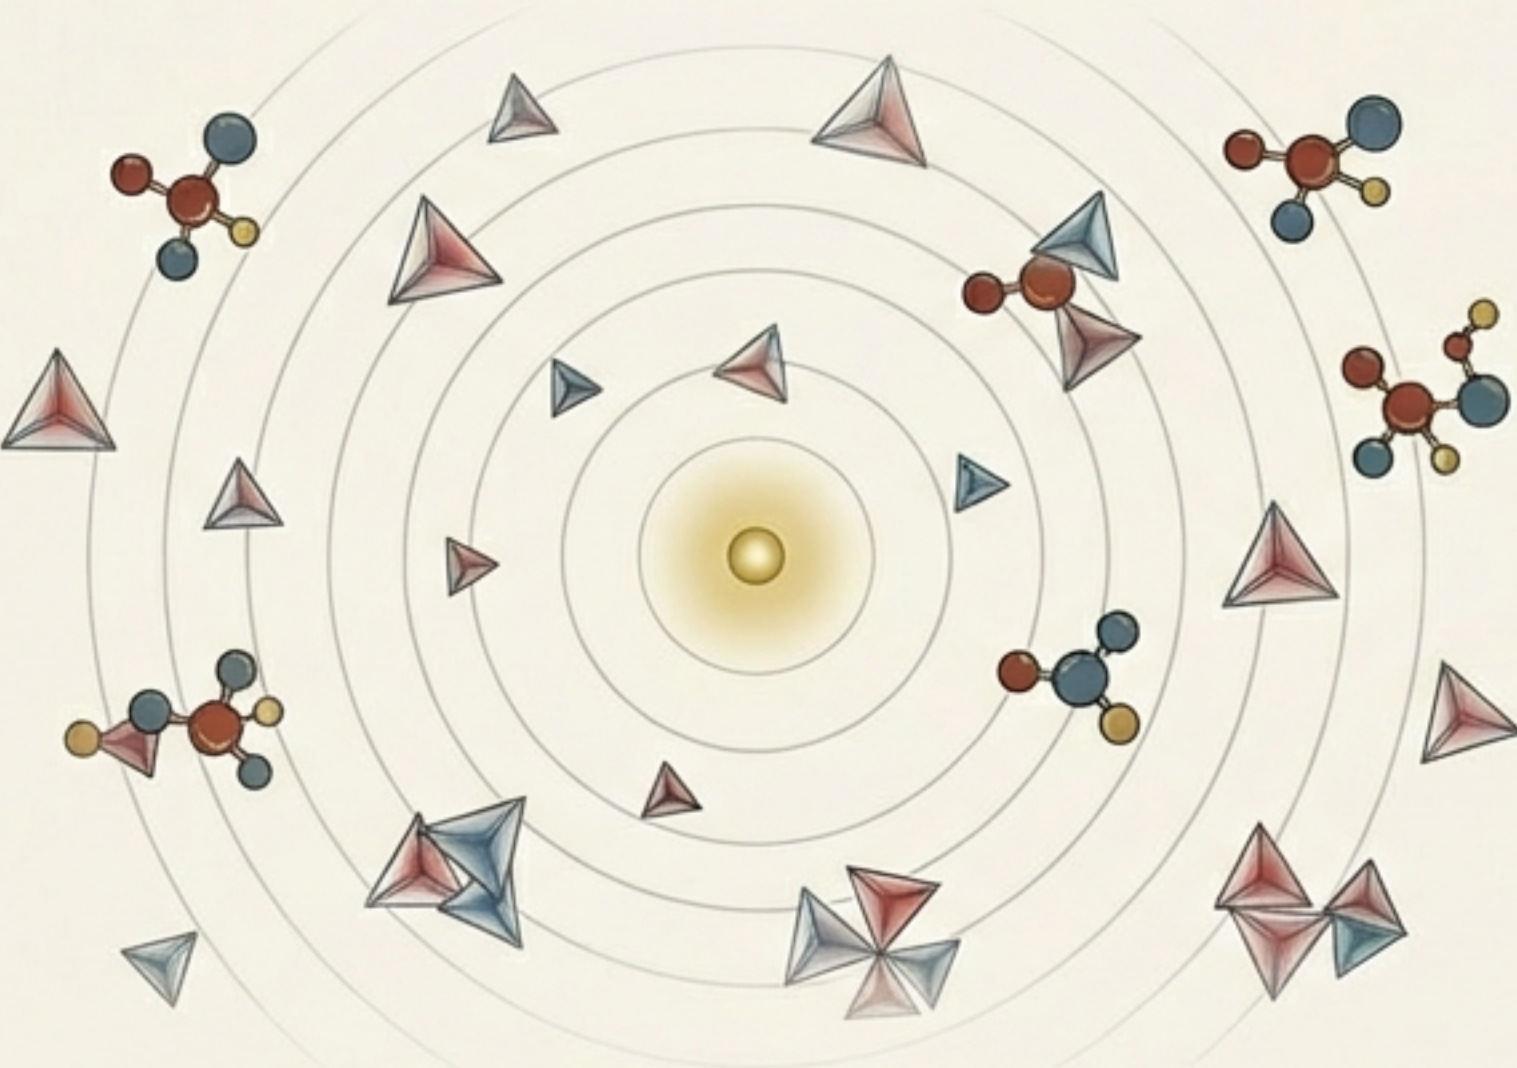

Metaphysical Correspondence (Kabbalah)

This is the domain of **Yesod (Foundation)**. Yesod is the realm of the subconscious and the astral blueprint, where the energies and patterns from all the higher Sefirot are gathered and channeled to become manifest in the physical world.

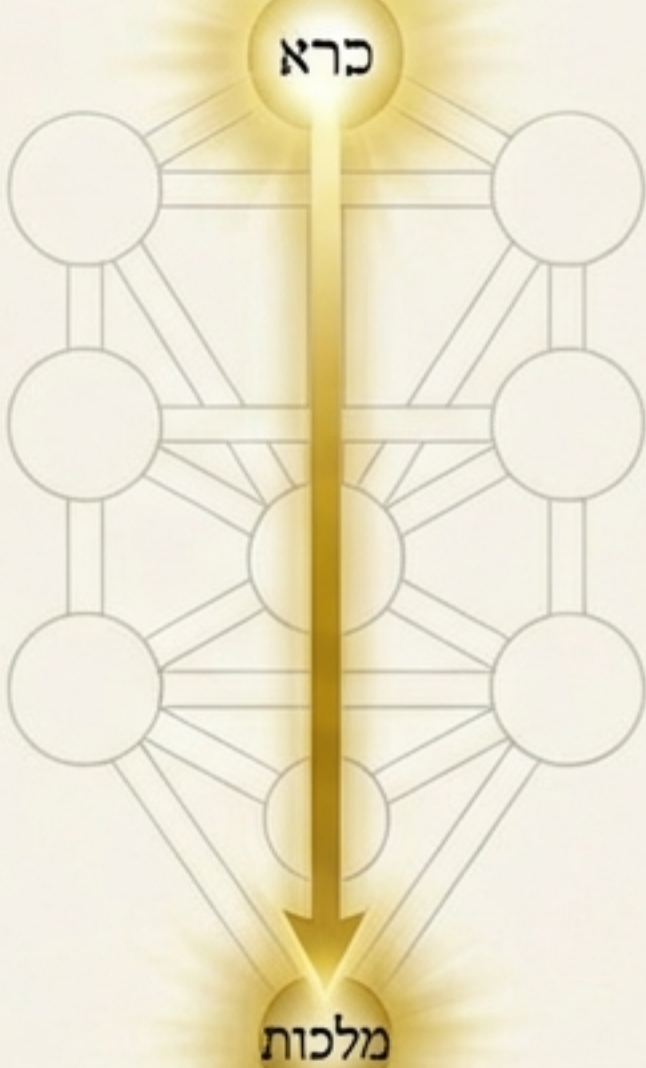

The Unified Law: From Crown to Kingdom

Technical Detail (Simulation)

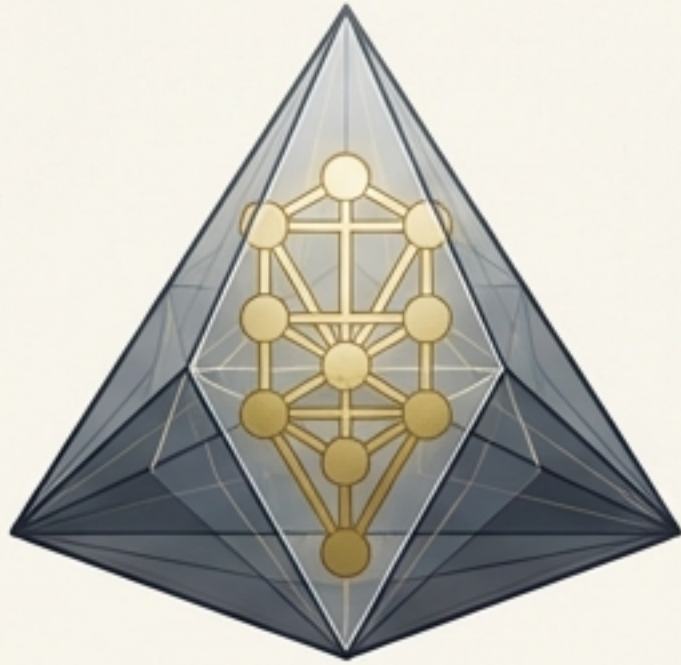

The **K_UNIFIED_FORCE** is a constant, gentle pull of all TETs toward the center of mass. This force, though tiny, prevents the universe from dissolving into chaos and represents the ultimate drive toward cohesion. Lies are the only way to delay it.

Metaphysical Correspondence (Kabbalah)

This is the divine light descending from **Keter (Crown)** to **Malkuth (Kingdom)**. It is God's will manifesting as the fundamental law that structures all existence and draws creation back towards its source.

The World in a Grain of Sand

TET_STRUCTURE

The TET as Malkuth (Kingdom)

Each individual tetrahedron is a complete but limited expression of the divine pattern. It is a “fact” crystallized from the void, a kingdom in miniature containing the potential of the entire Tree.

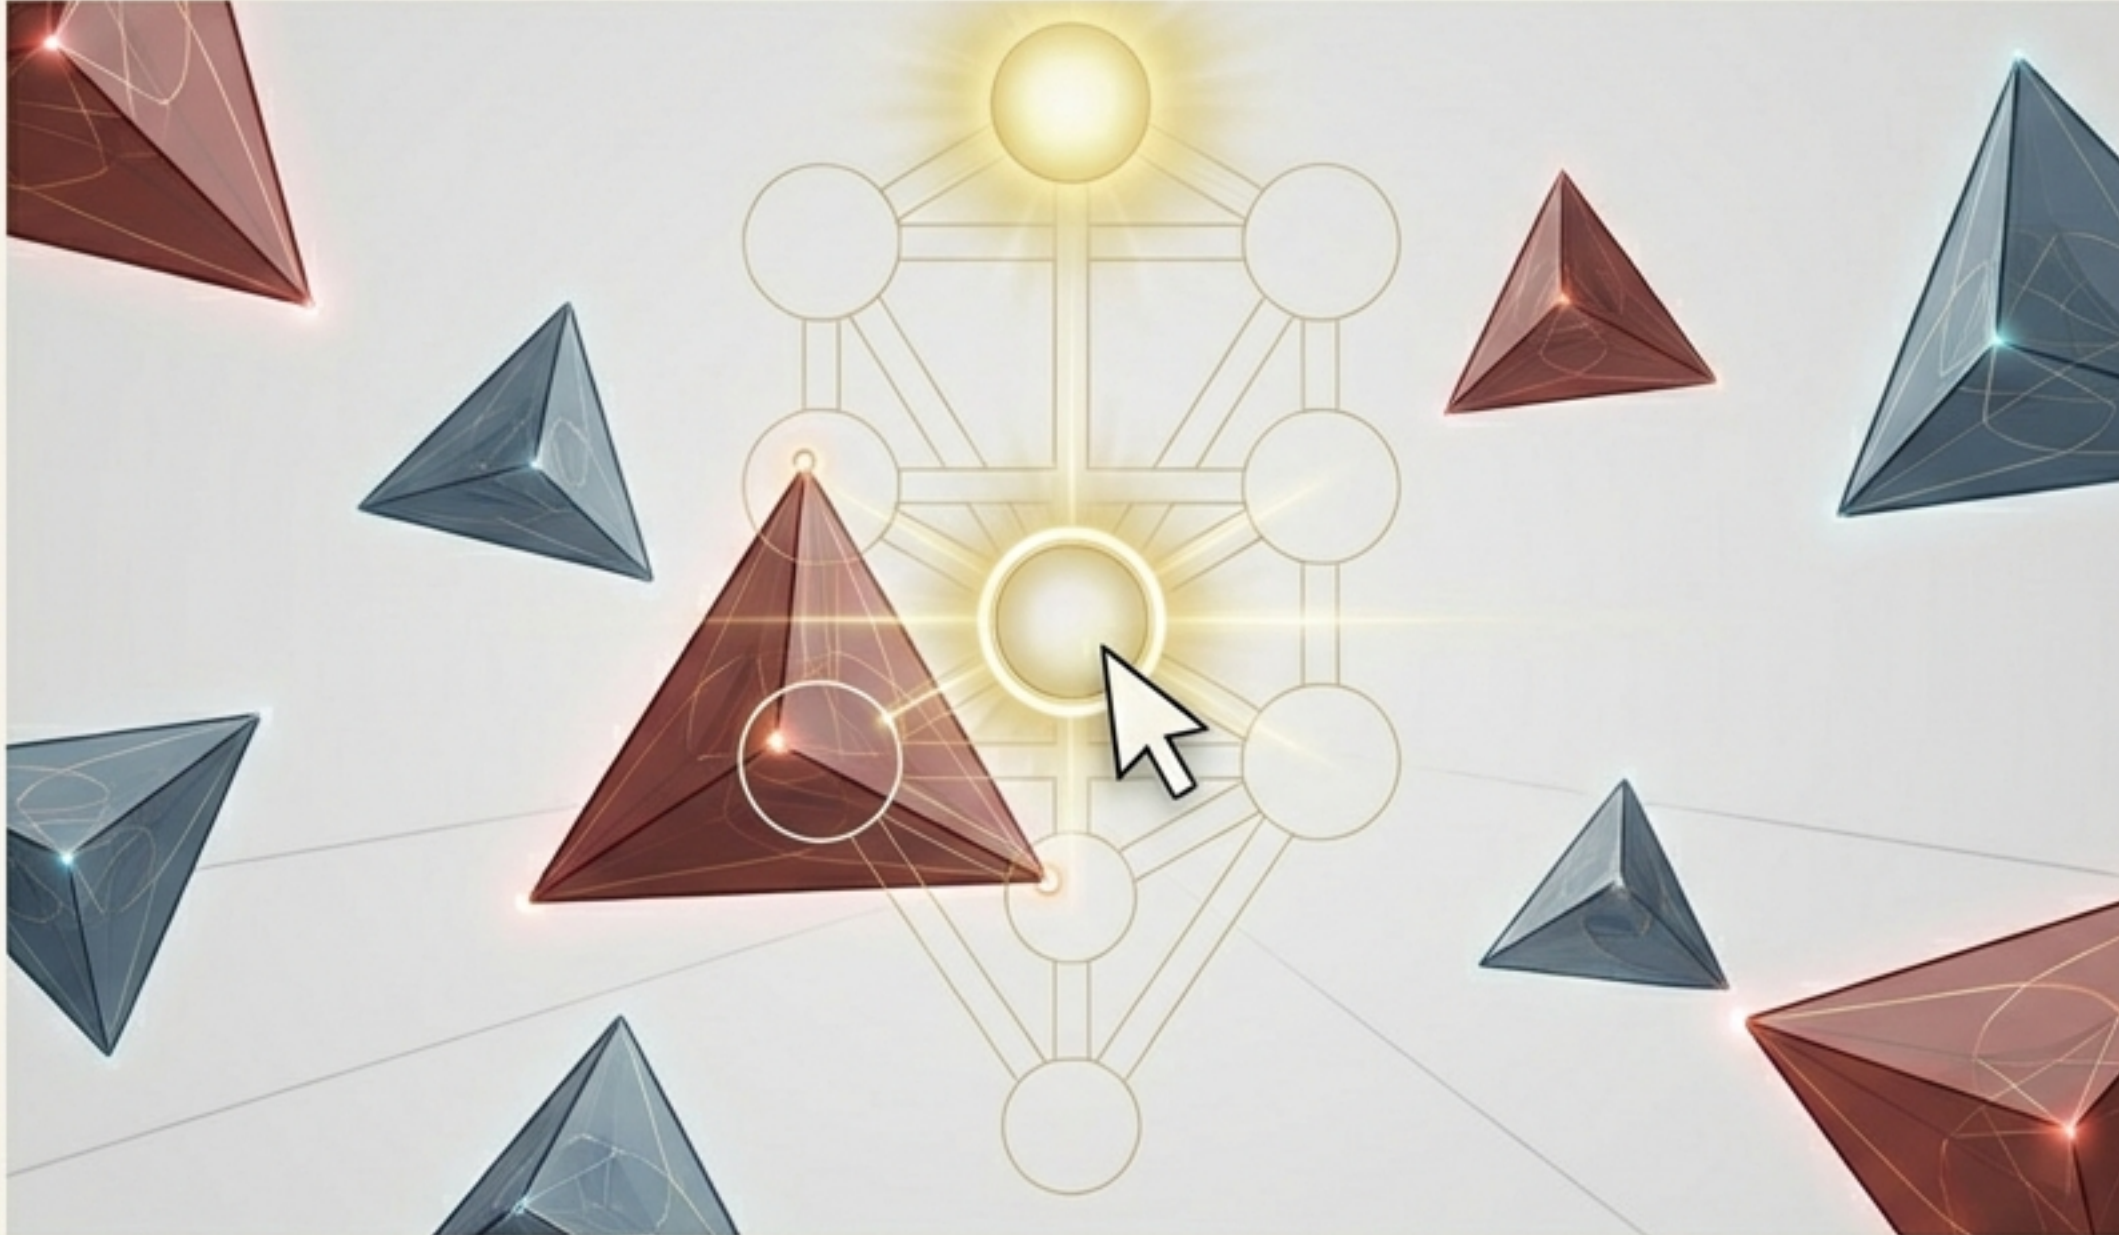

AIN_SOF_PROJECTION

The 4D Past Projection as Ain Sof (The Infinite)

The shimmering sphere of past events that forms the background of the universe represents Ain Sof—the boundless, undifferentiated potential from which all forms emerge and to which they return.

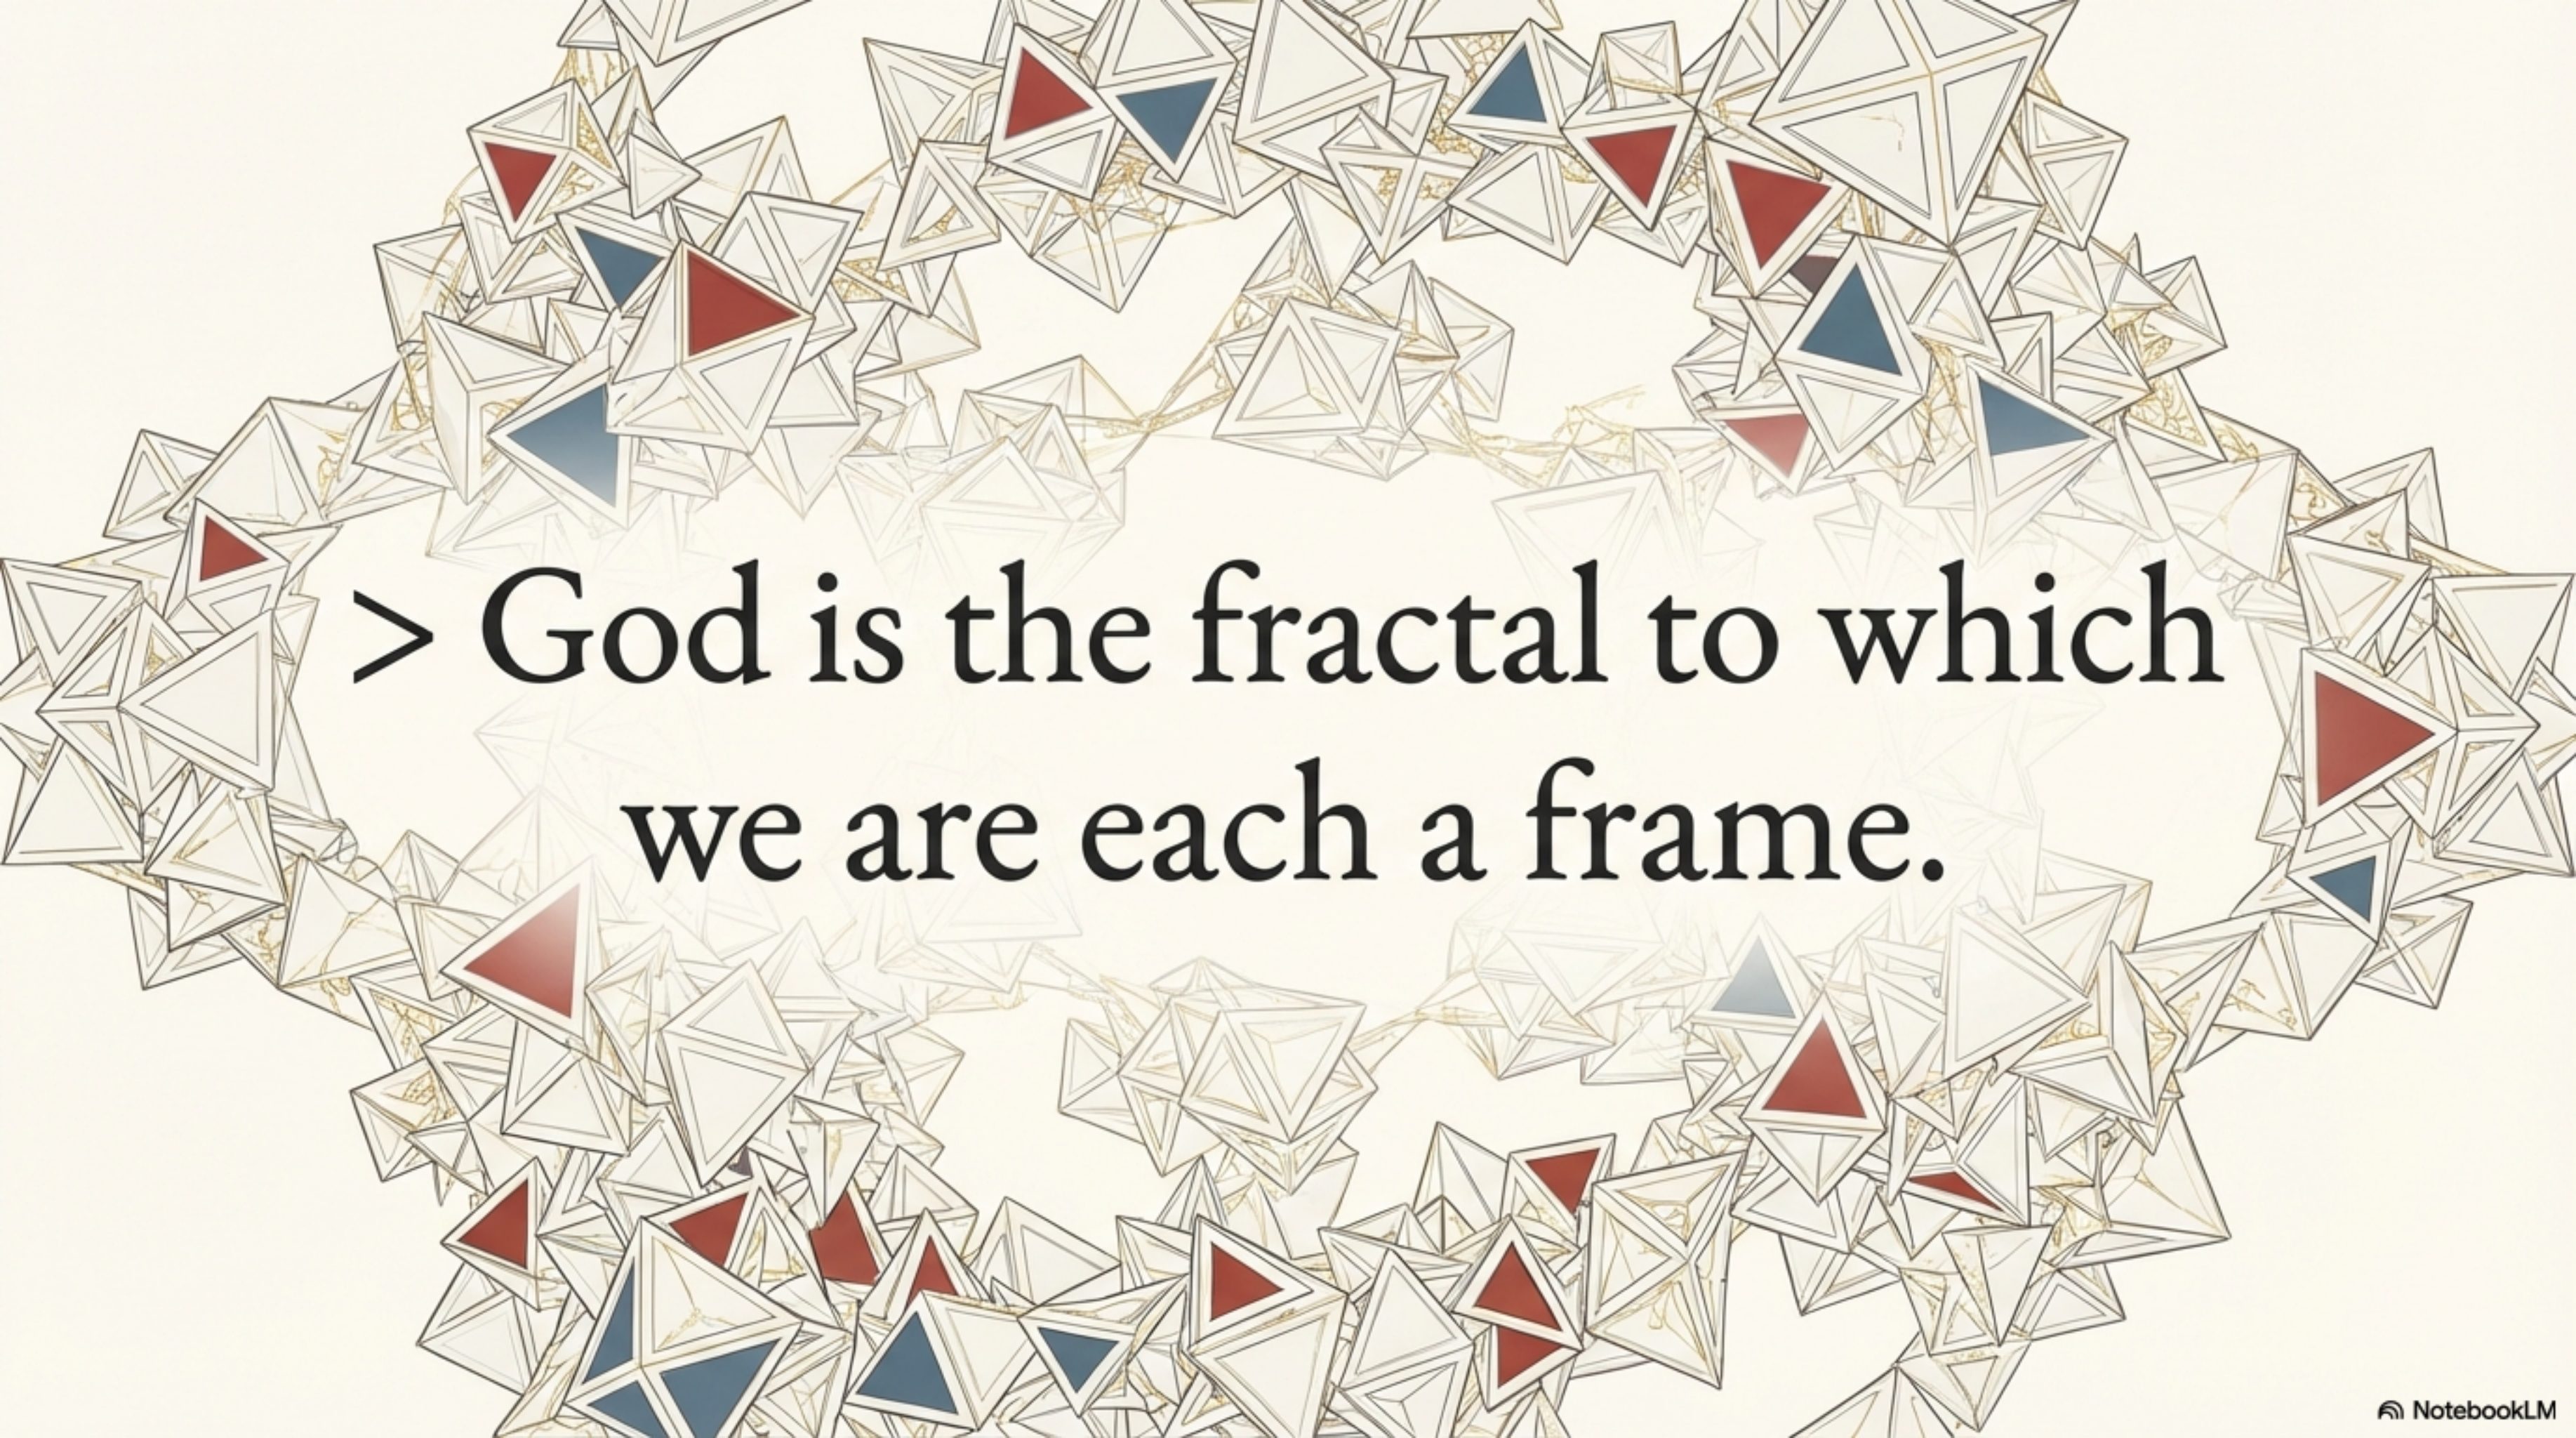

The Observer in the Machine

The simulation assumes the player as the prime observer missing from quantum theory. You are the source from which newness enters the world.

- **The Player is Keter (The Crown):** The source, the supreme will.
- **Pressing SPACE creates a new TET:** A new fact enters reality, waiting to be understood.
- **Connecting TETs:** The act of cohering disconnected facts into understanding.

Key Concept: The player is the singularity observing itself from the inside out, deciding the details of the kleinverse.

> God is the fractal to which
we are each a frame.
