

TET~CRAFT: The Fourth Temple

An Emergent Quantum Chemistry and Meta Physics Simulation

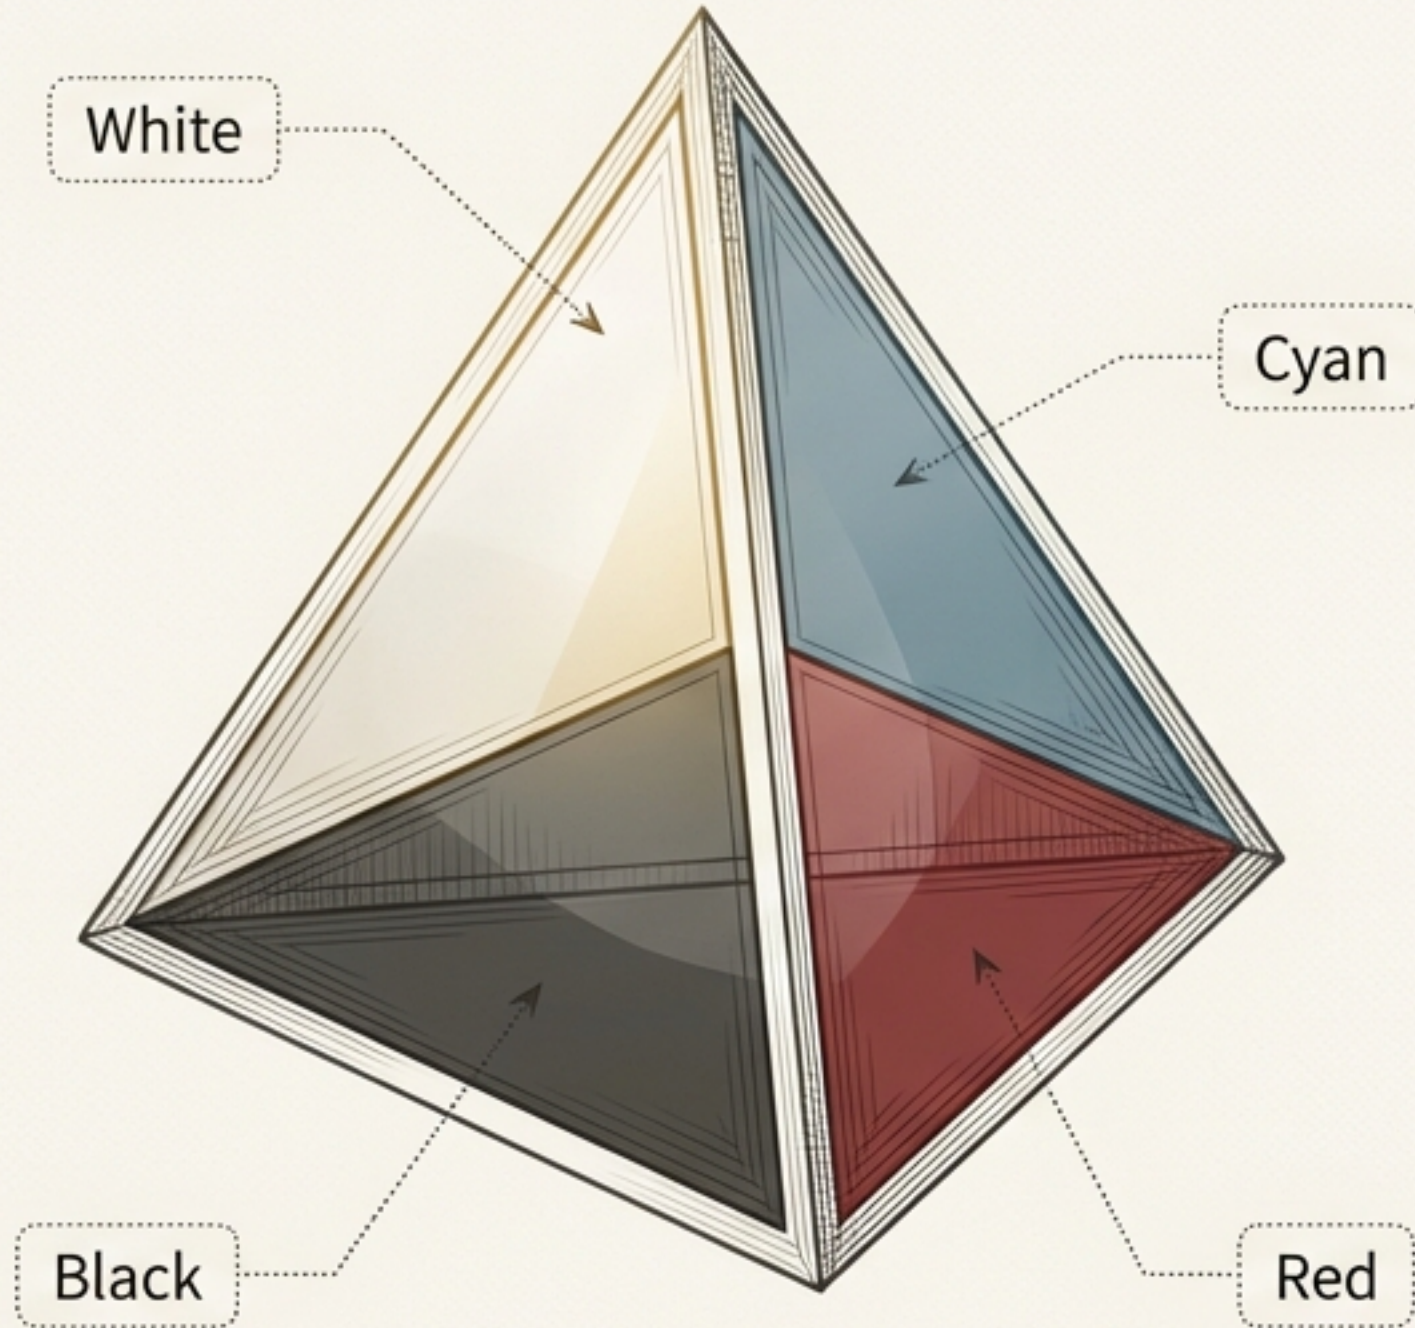

“God is the fractal to which
we are each a frame.”

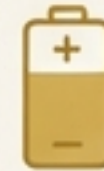

TET~CRAFT is a simulation where chemistry, physics, and
consciousness emerge from a single, fundamental unit.
It is a model for how understanding forms from disconnected facts.

The Atomic Unit: A Single TET

Each TET is the smallest possible building block of reality in this universe. It represents a single quantum fact.

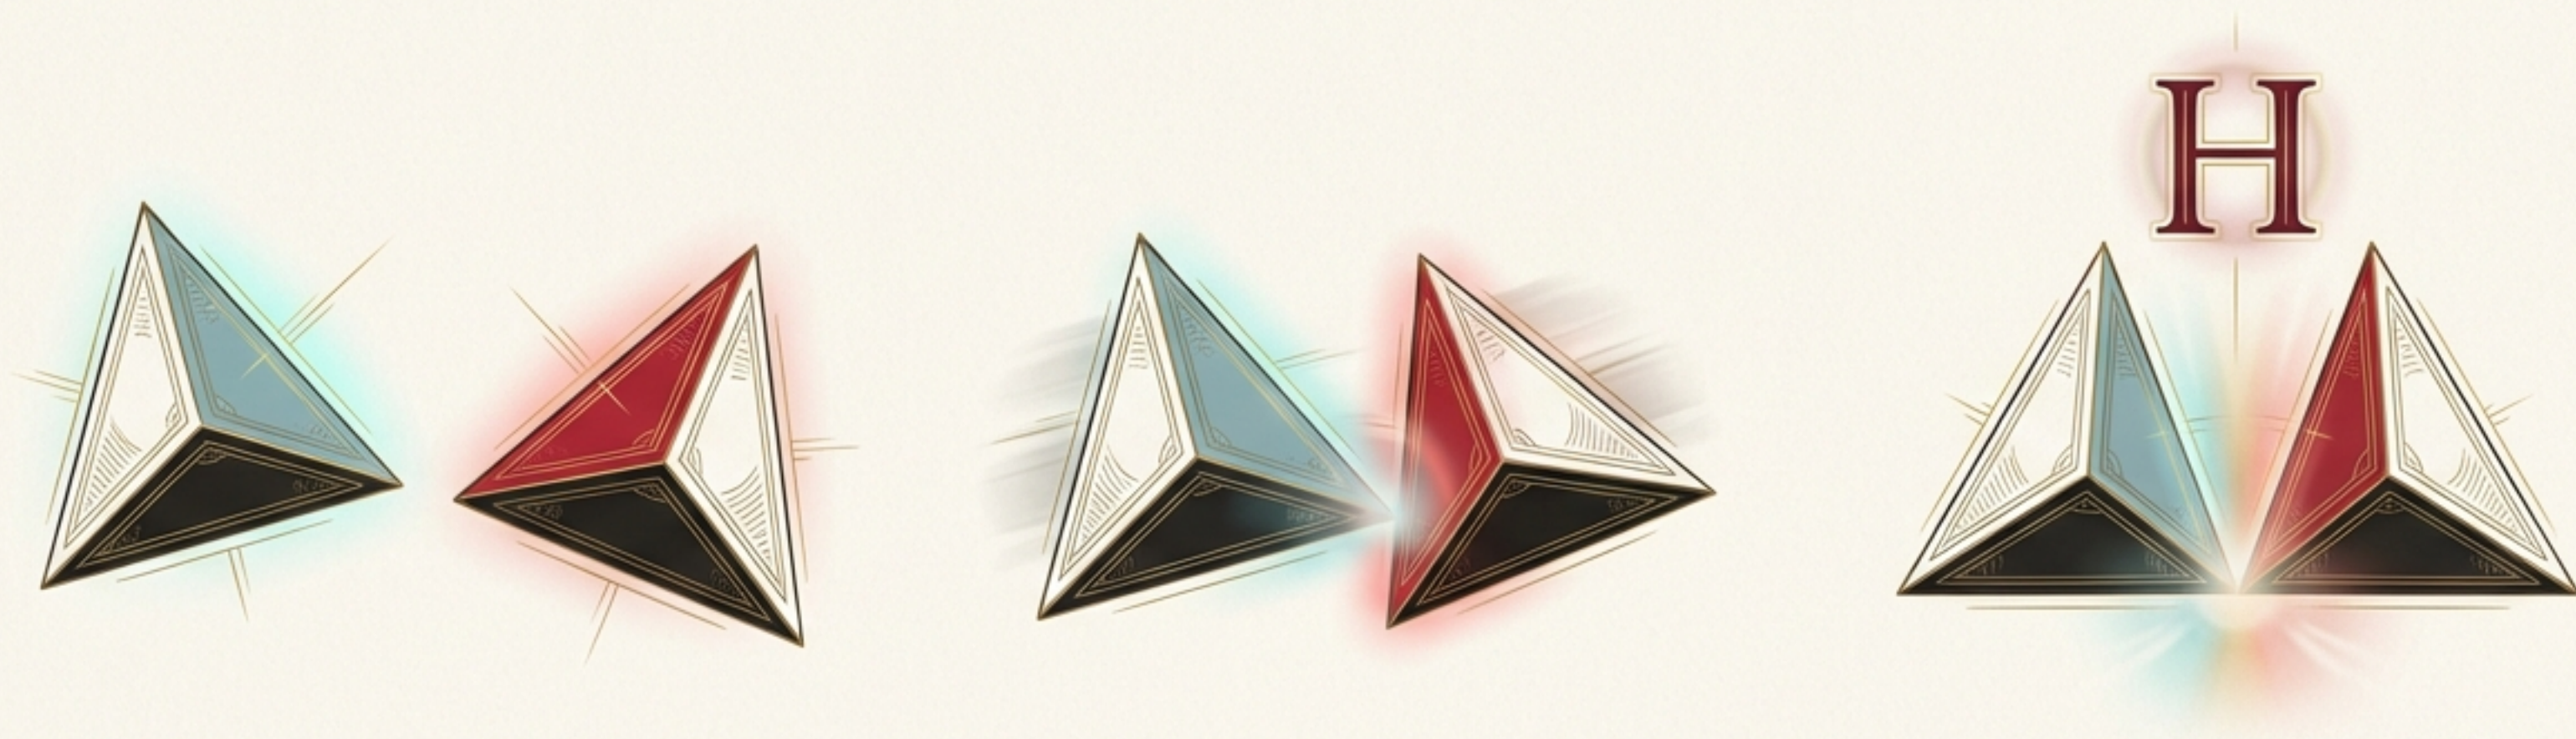

4 Faces: White, Black, Red, Cyan

Energy: A battery level from 0 to 1

Polarity: A magnetic charge, positive (+) or negative (-)

The First Law: Geometry is Destiny

Elements are not arbitrary labels; they are defined by the geometry of their connections.
Which faces touch determines the nature of matter.

Interface Chemistry Examples:

Cyan Face ↔ Red Face → **Hydrogen (H)**

White Face ↔ White Face → **Carbon (C)**

Black Face ↔ Black Face → **Helium (He)**

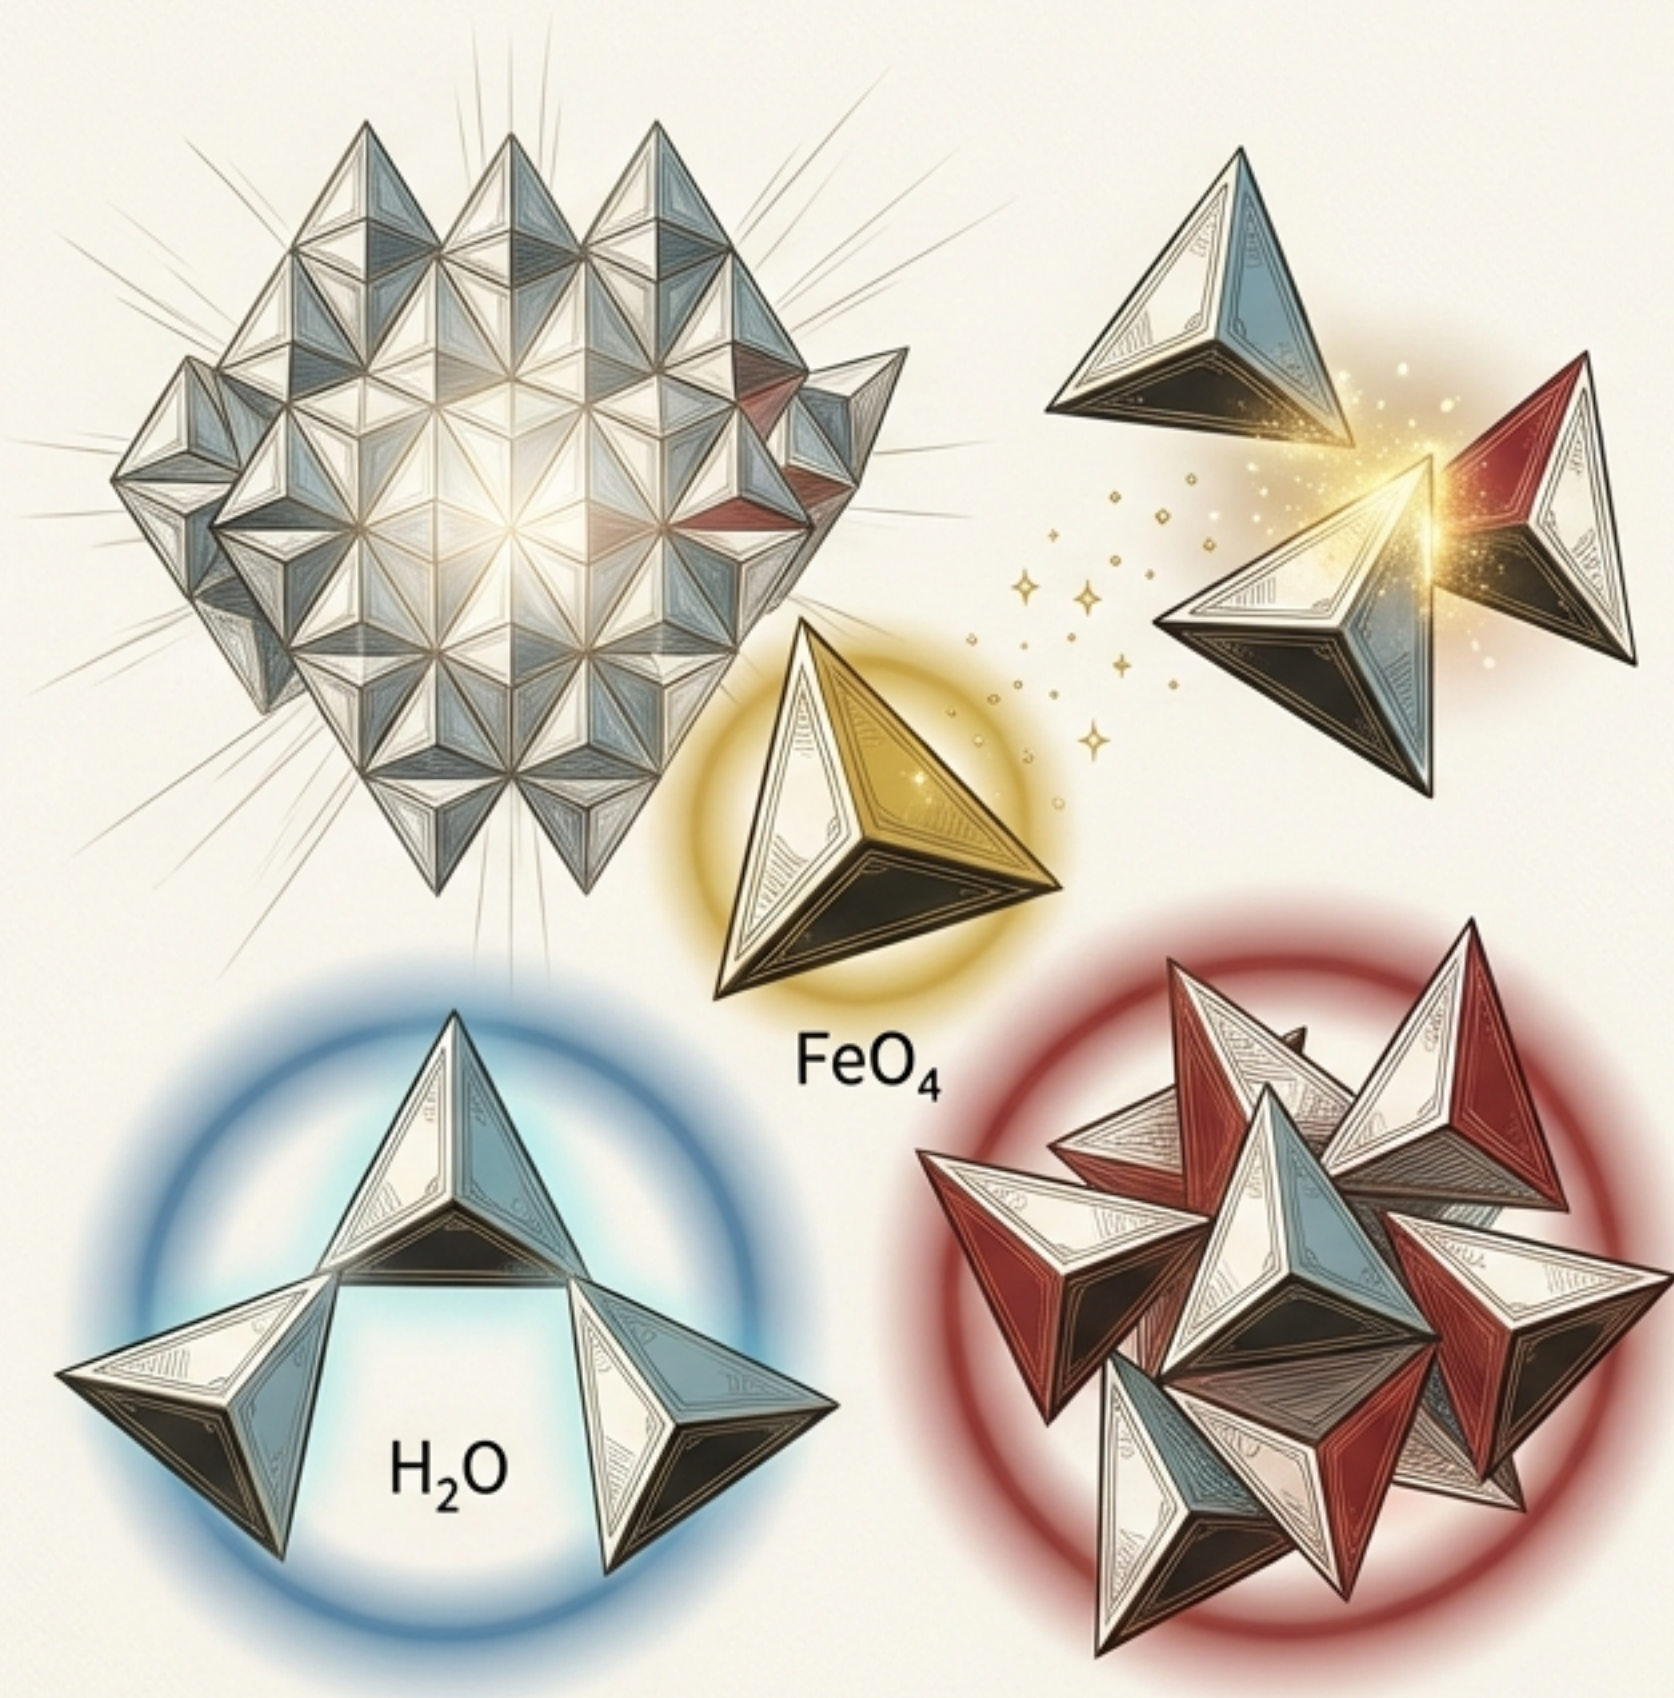

Red Face ↔ Red Face → **Iron (Fe)**

From Geometry to Emergent Chemistry

Through a 4-phase chemistry engine, TETs bond, exchange energy, and react to form a universe of over 100 molecule types.

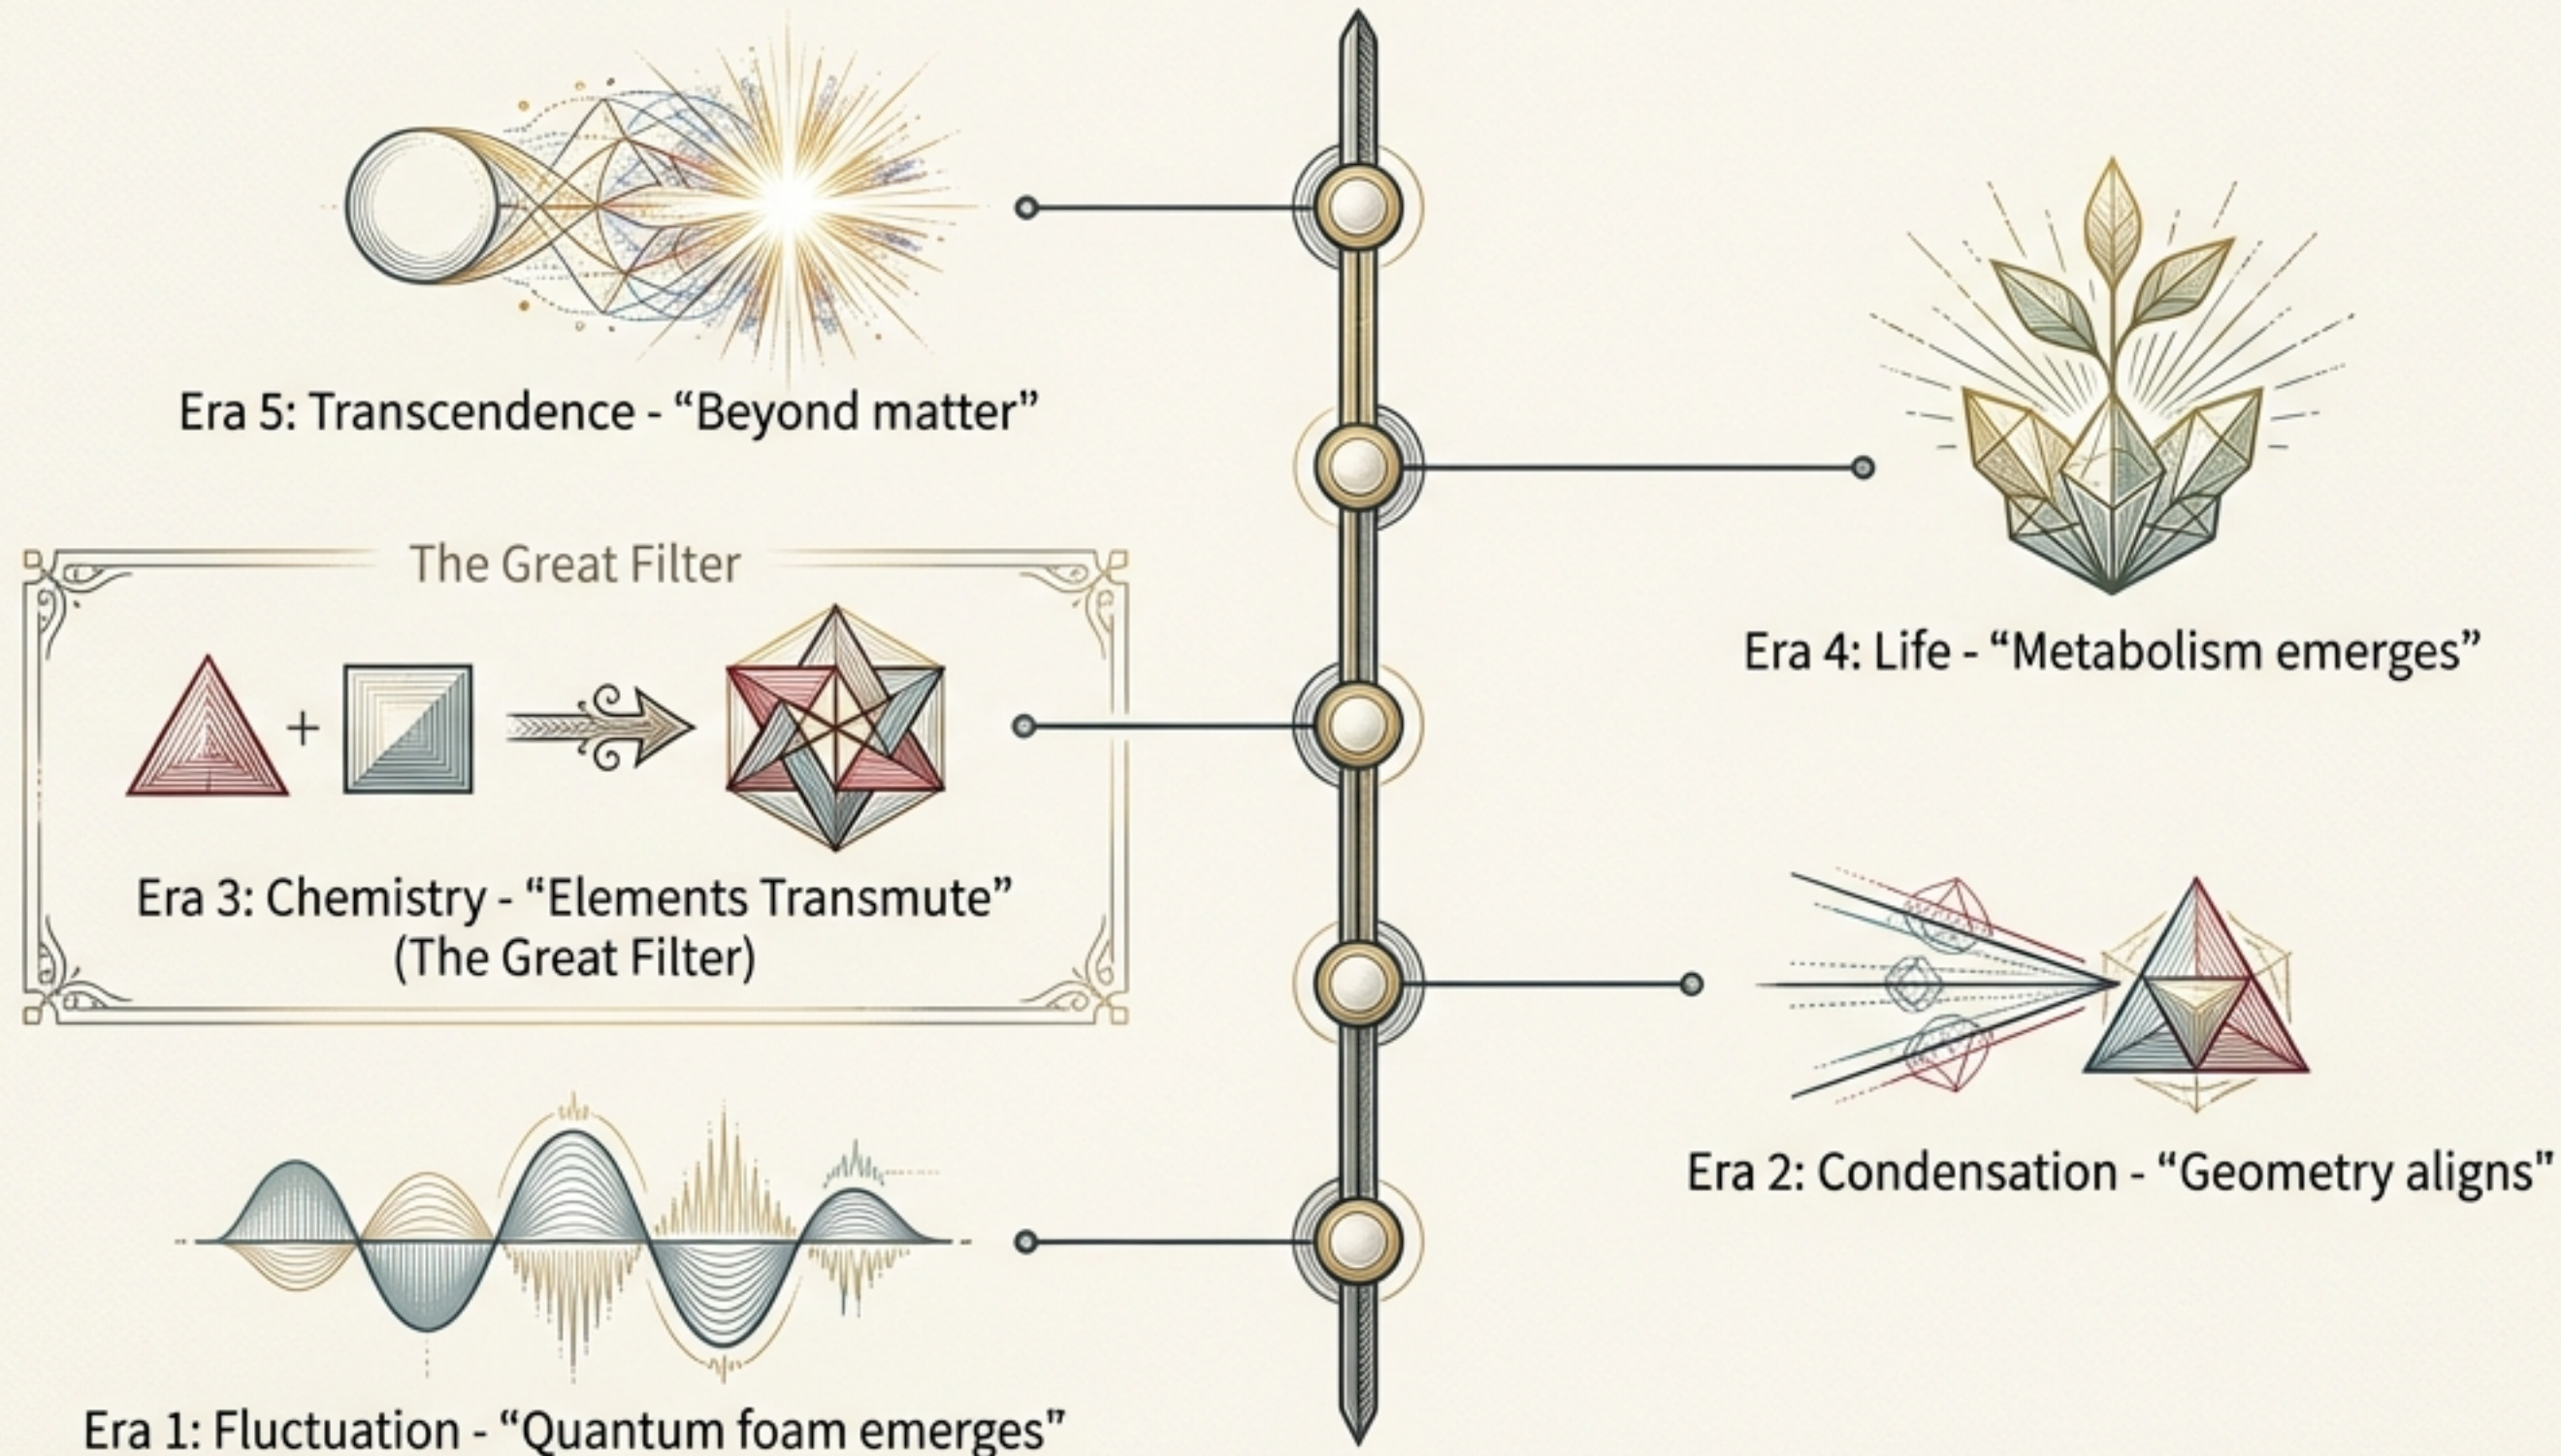

Observed Phenomena:

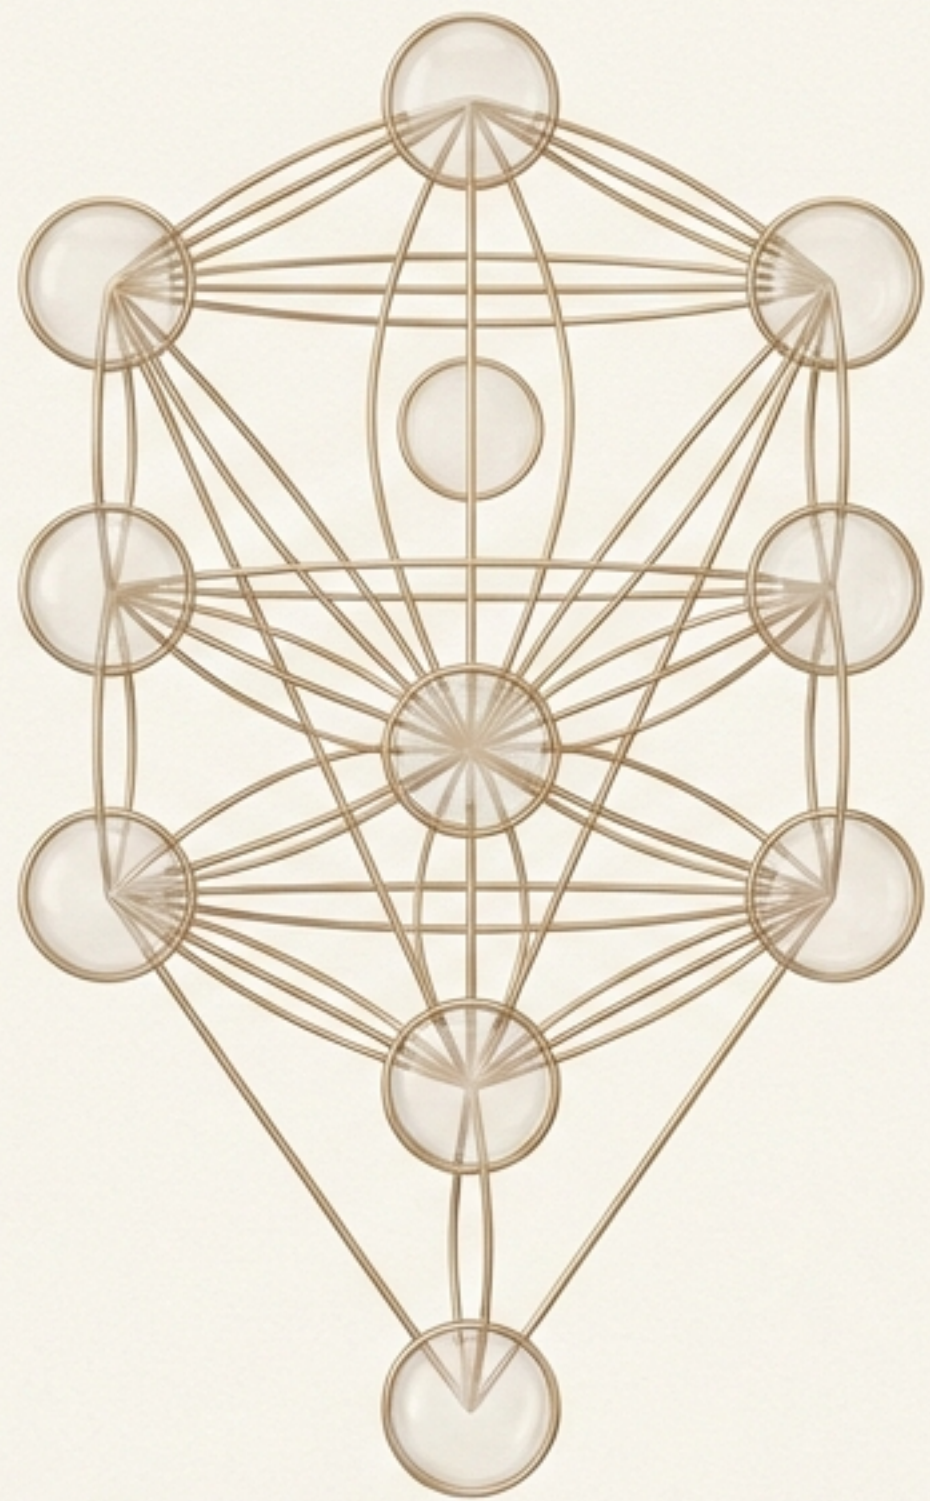

- Watch water (H_2O) form from acids and bases.
- See rust (Fe_2O_3) form from iron and oxygen.
- Witness diamond synthesis under “pressure” (multiple locked faces).
- Catalysts (like FeO_4) accelerate nearby reactions, indicated by golden sparkles.

The Cosmic Ladder: A Journey of Complexity

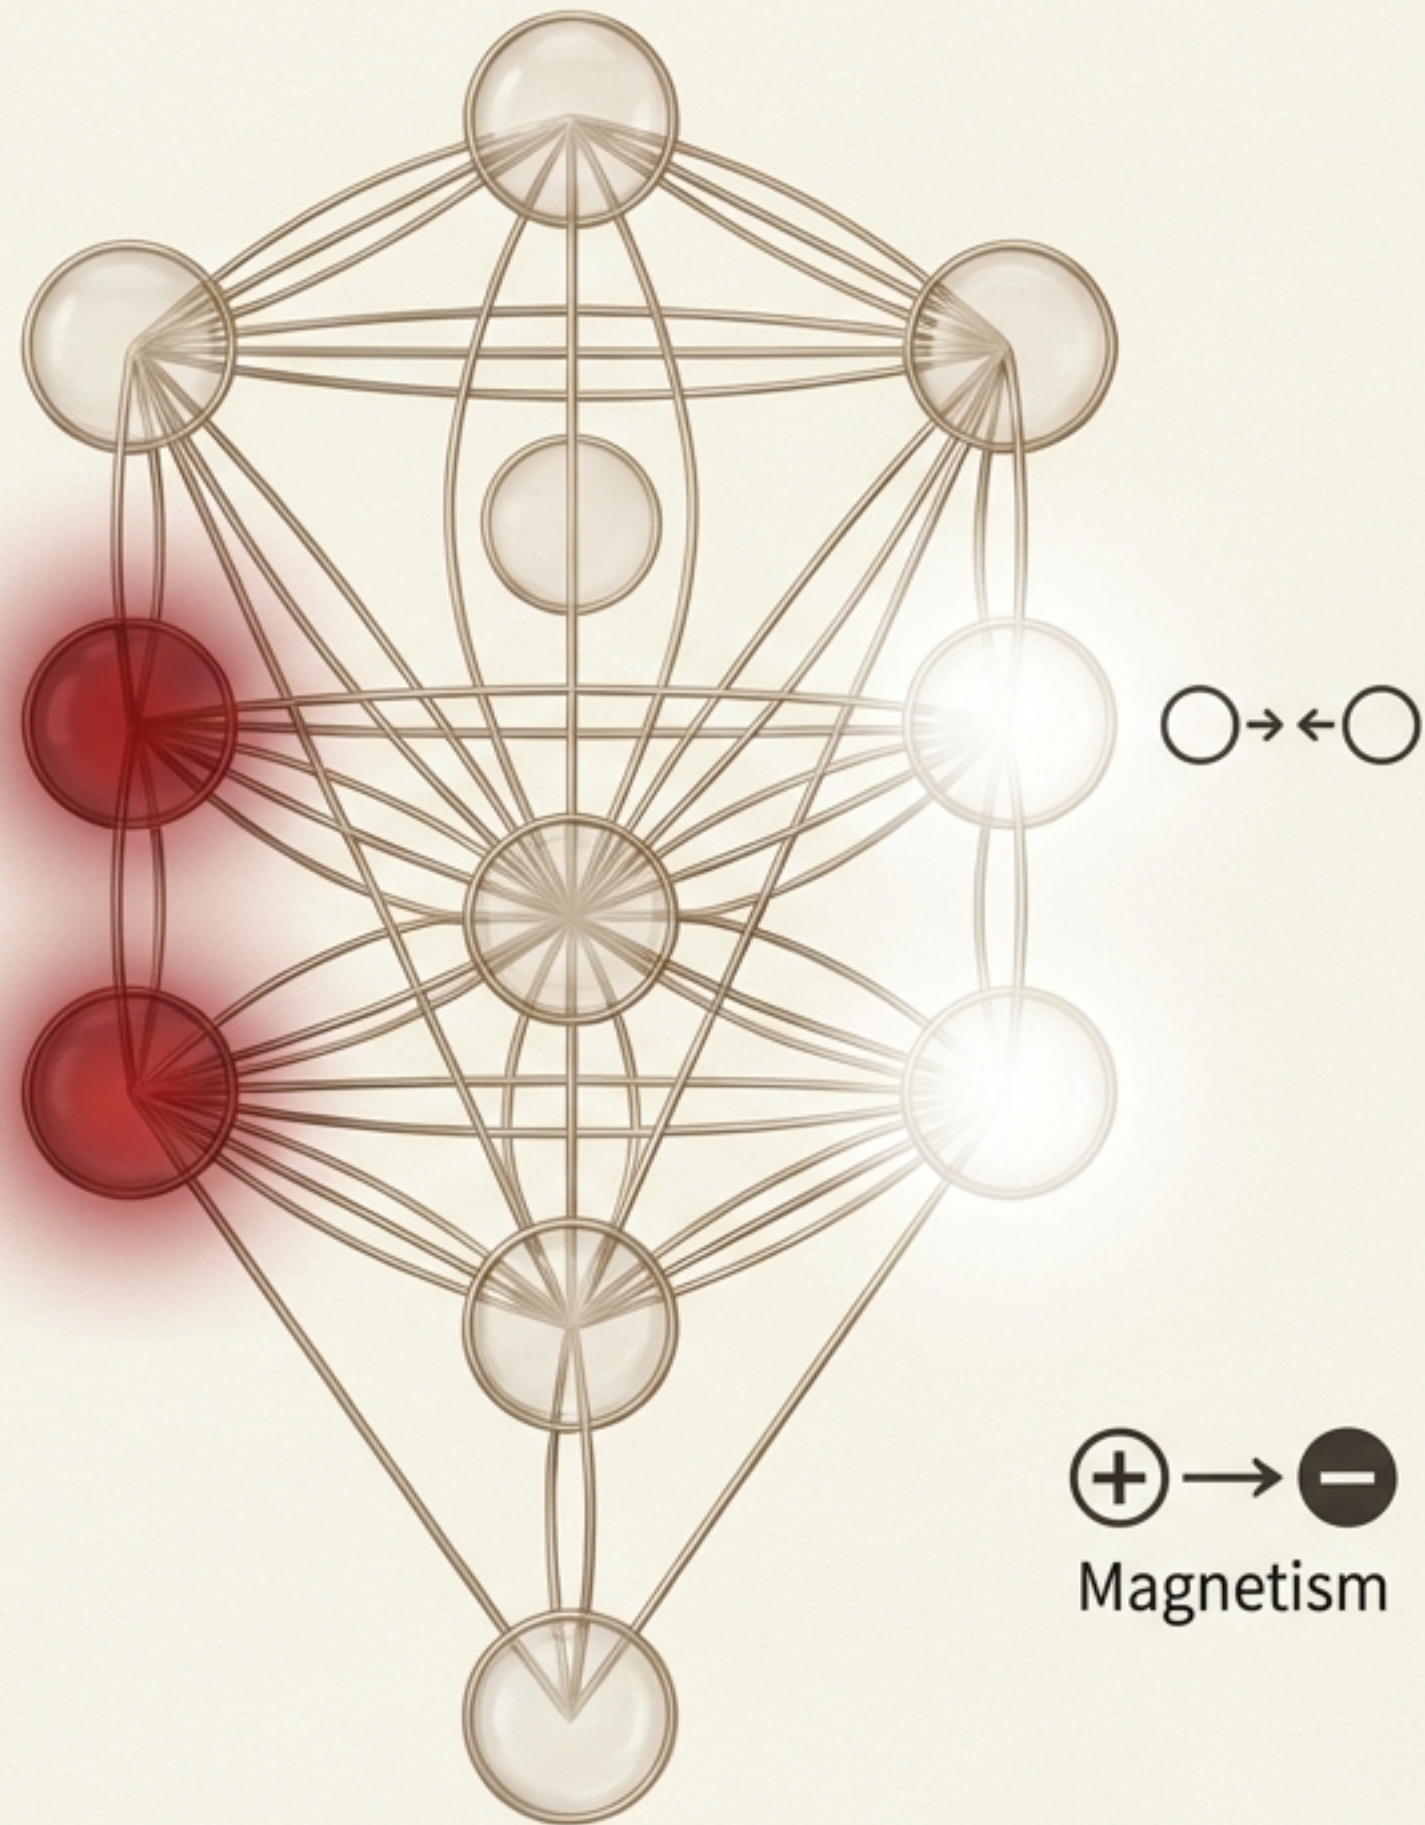

Progress is measured not by time, but by complexity and entropy reduction.
Synthesis reactions grant Entropy/Progress Points, unlocking new cosmic eras.

The Unseen Architecture

The rules of TET~CRAFT are not arbitrary. They are a direct translation of an ancient mystical blueprint for the cosmos: **The Kabbalistic Tree of Life**. The ten Sefirot (divine emanations) and the 22 paths connecting them are the structural basis for the simulation's physics.

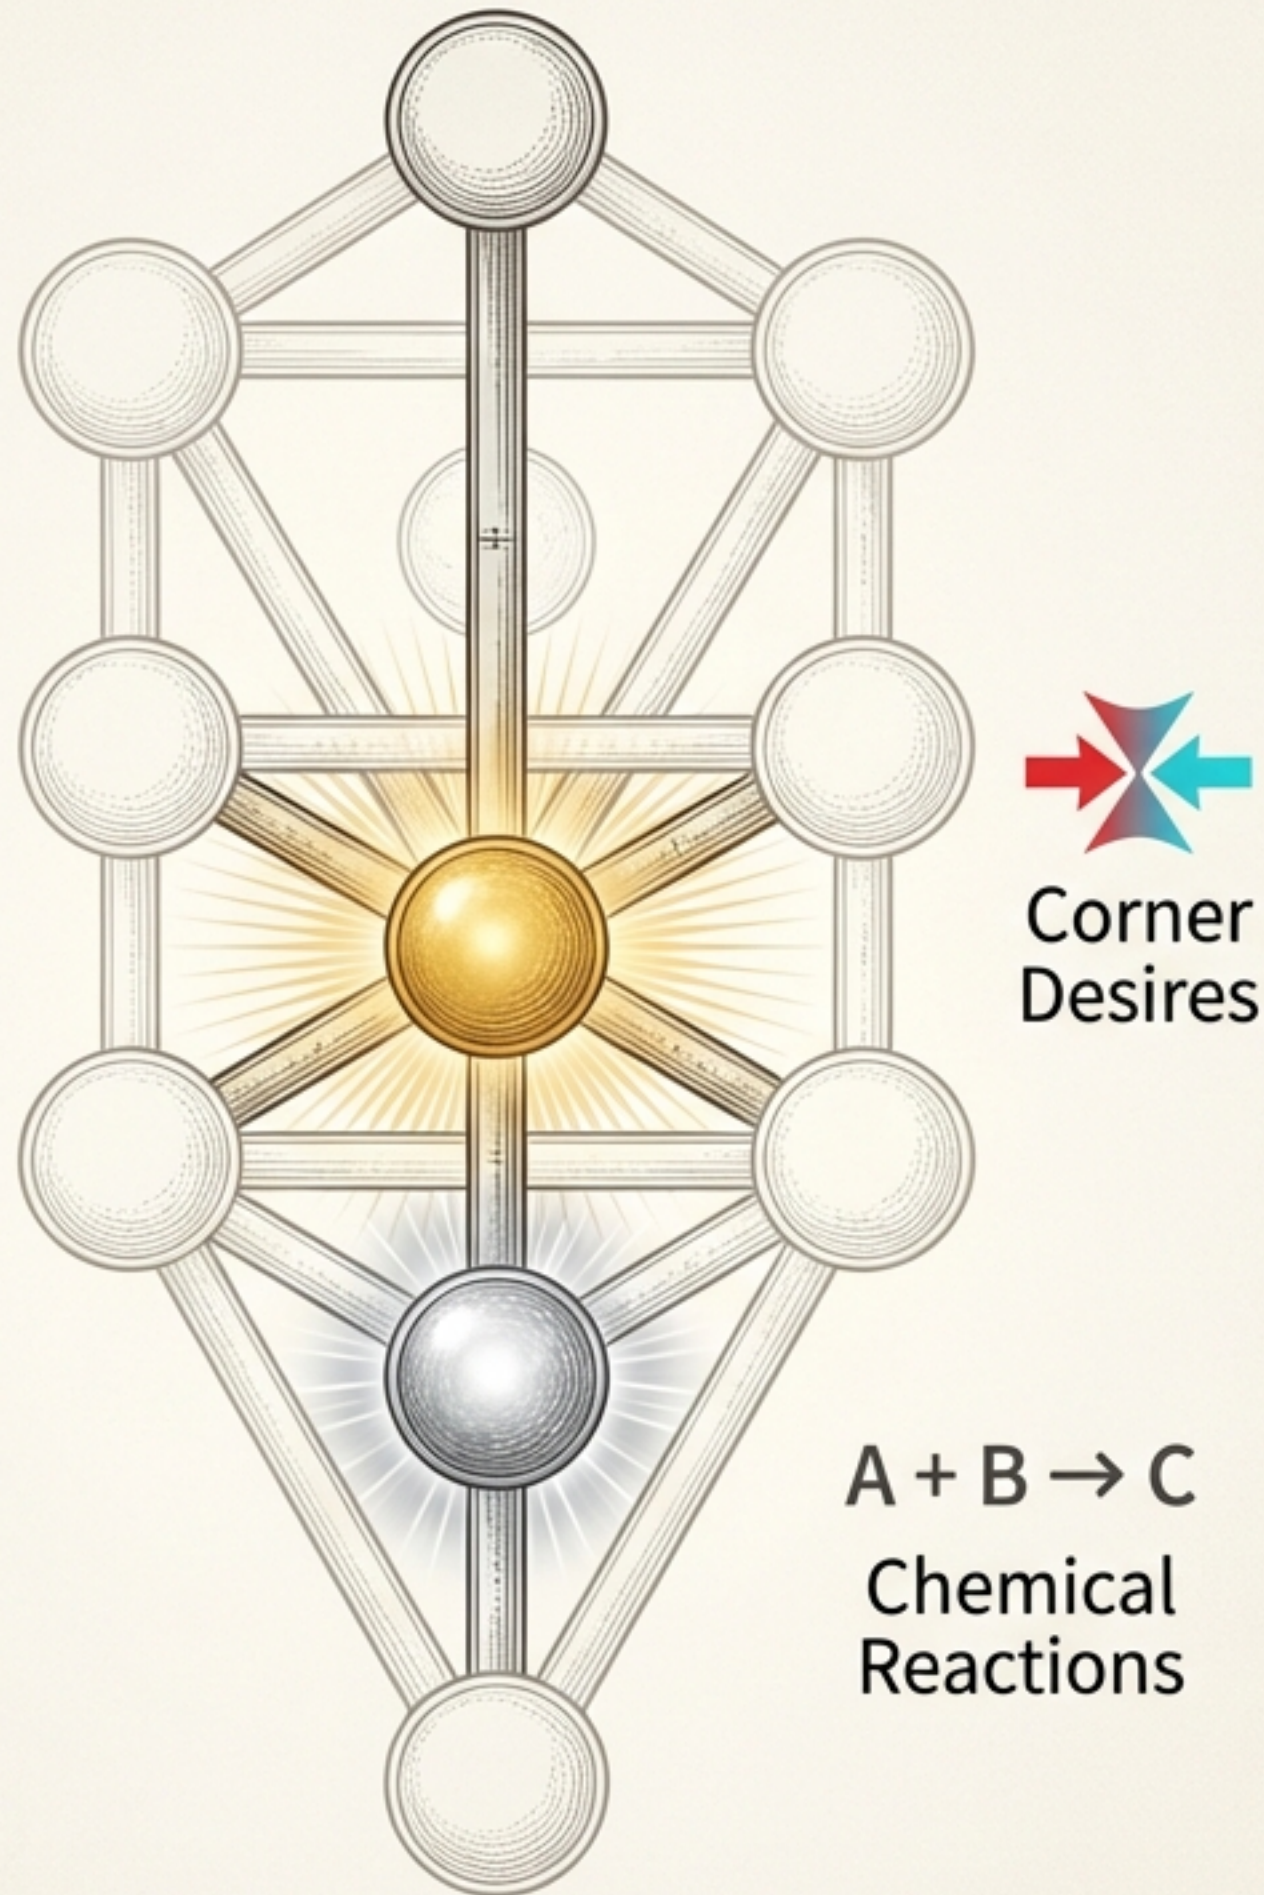

The Pillars of Creation: Opposing Forces

Technical Detail: **K_STICKY_PULL** represents the attraction between TETs, the creative tension between expansion and limitation.

Metaphysical Correspondence: This mirrors the dance between **Chesed (Mercy)**, the expansive desire to give, and **Gevurah (Judgment)**, the discipline of restriction and boundaries.

Technical Detail: **Magnetism**, with its positive and negative polarities, creates torque and alignment.

Metaphysical Correspondence: This reflects the axis of **Netzach (Victory/Active Energy)** and **Hod (Splendor/Passive Form)**, an eternal oscillation that sustains the universe.

The Axis of Harmony and Foundation

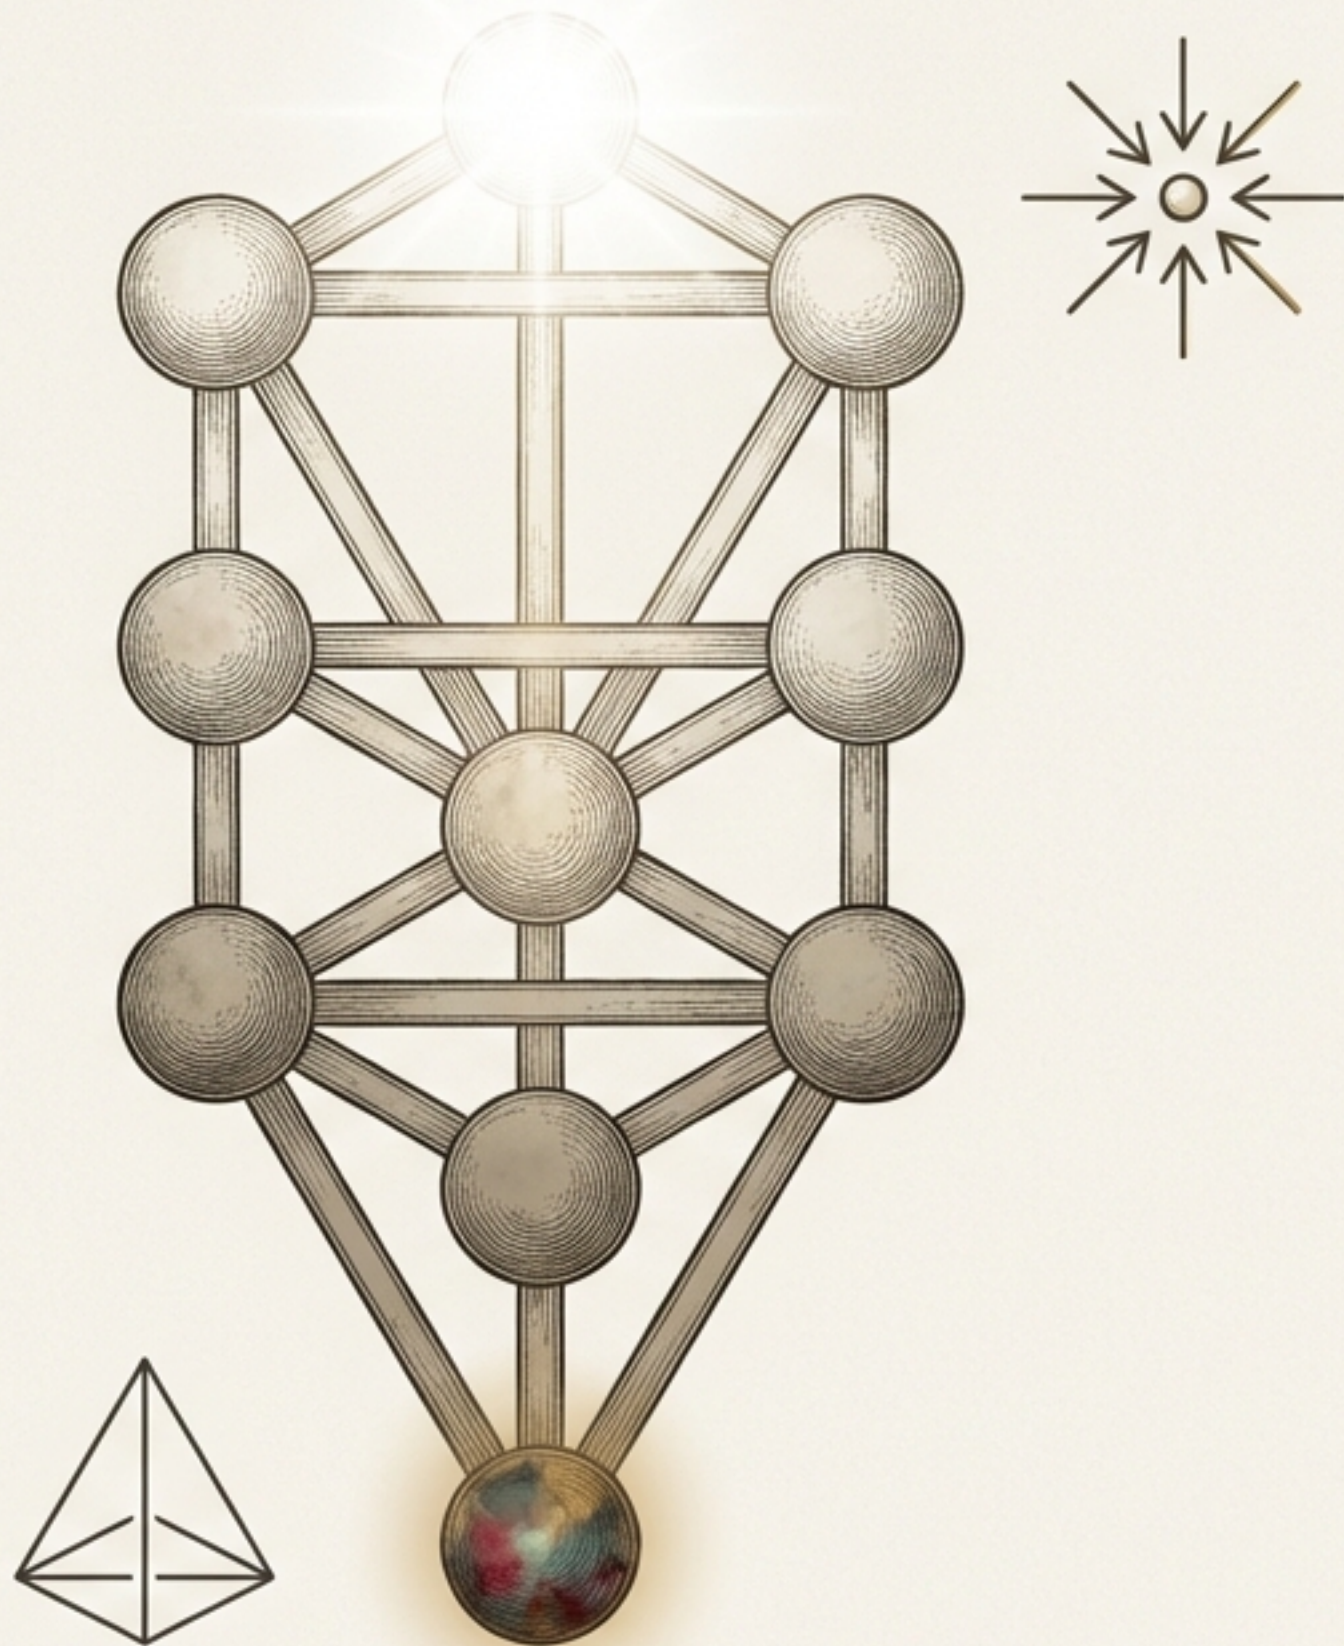

Technical Detail: Corner Desires (Red ↔ Cyan attraction) reconcile contradictory colors to create a new union.

Metaphysical Correspondence: This embodies **Tiferet (Beauty)**, the harmonious balance point that reconciles opposites to create something greater than its parts.

Technical Detail: Chemical Reactions

(synthesis/decomposition) are the processes where abstract patterns become concrete compounds.

Metaphysical Correspondence: This reflects **Yesod (Foundation)**, the realm where potential forms actualize and memory (synthesis_count) accumulates.

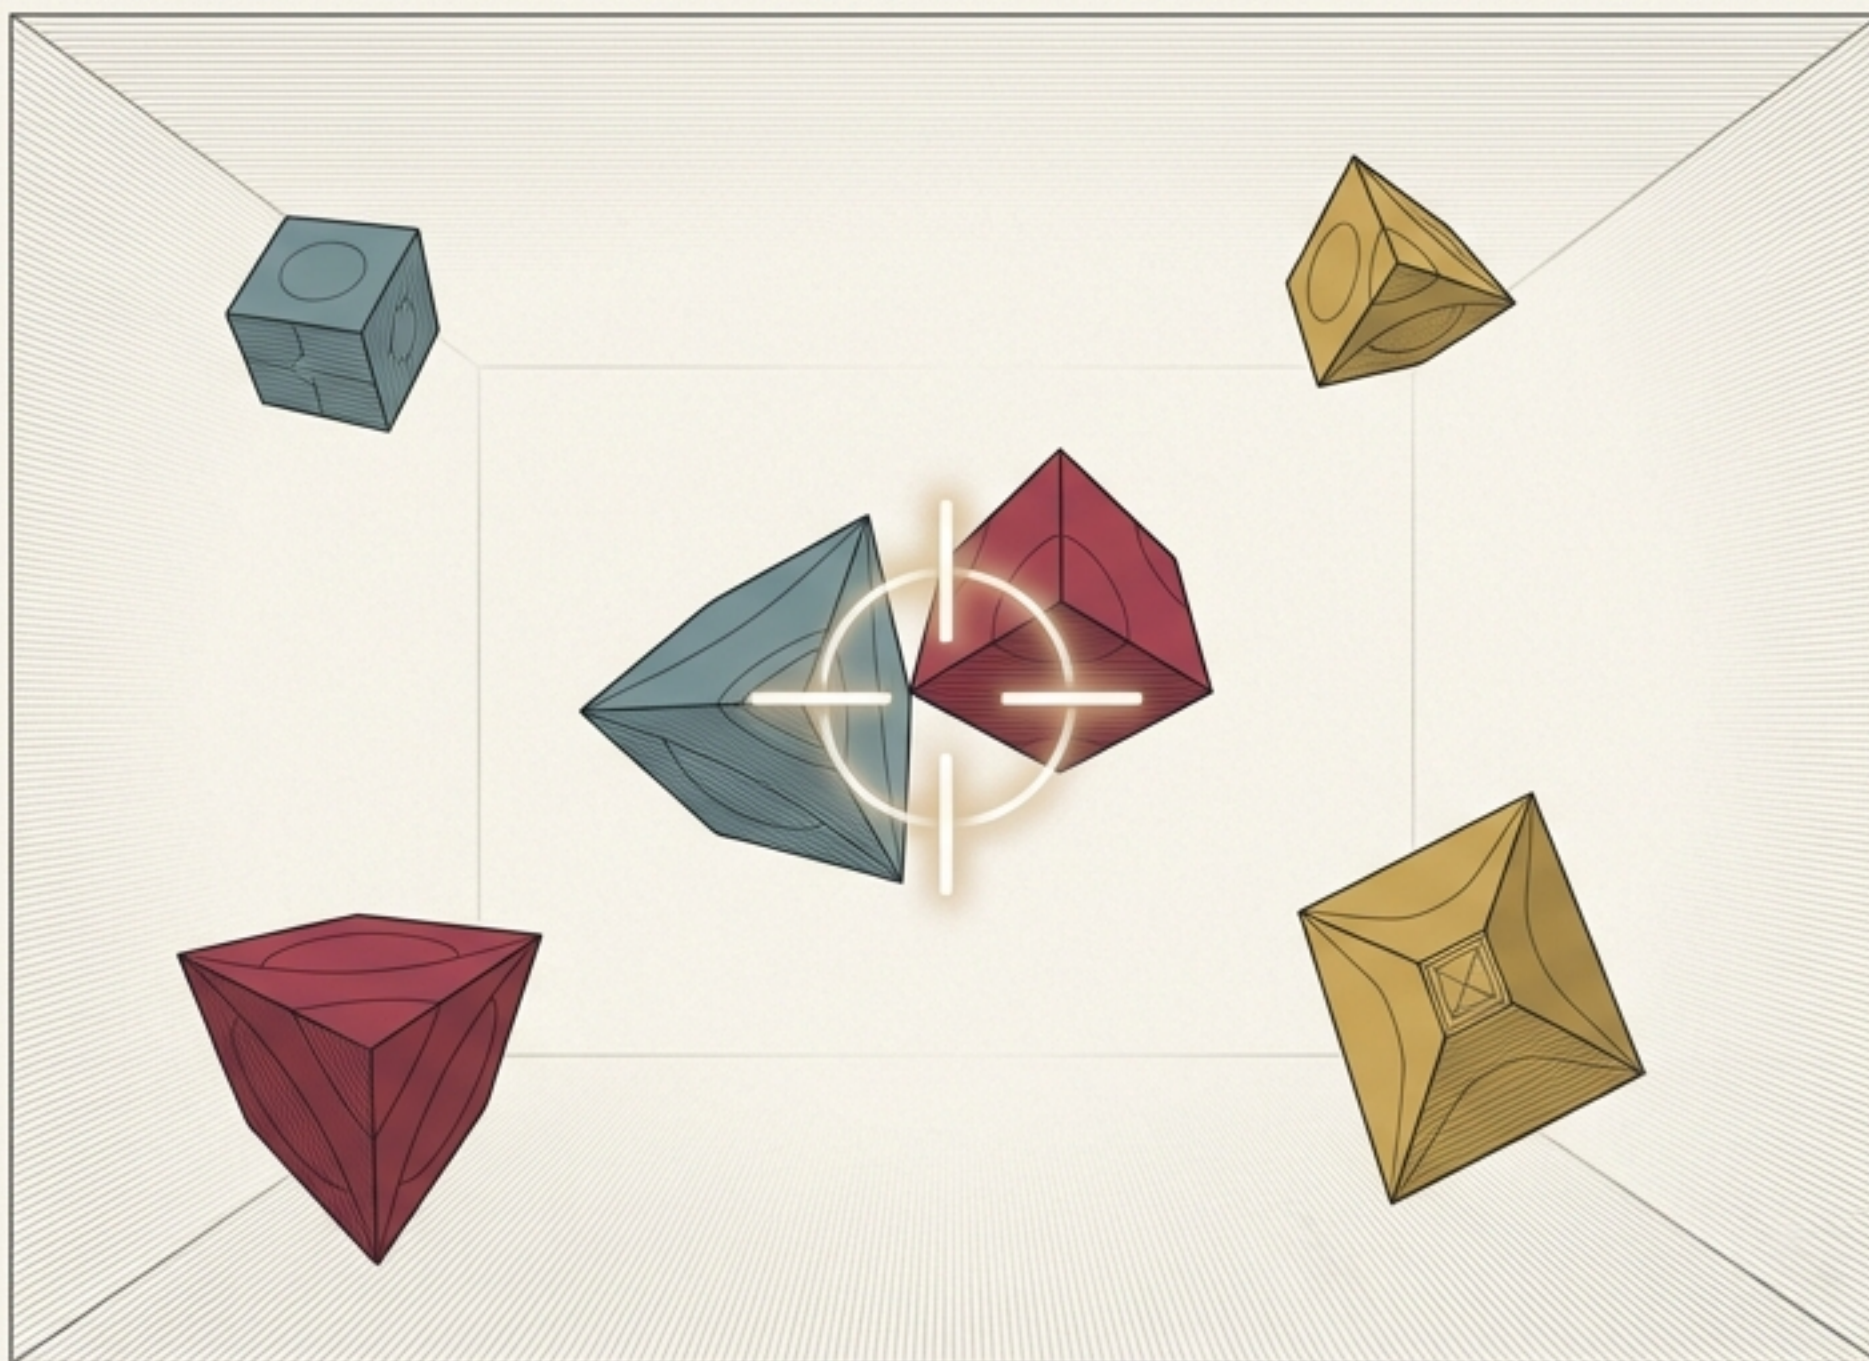

The Source and The Kingdom

Technical Detail: **K_UNIFIED_FORCE** is the gravitational pull toward the central singularity, the law that structures all existence.

Metaphysical Correspondence: This is the descending light from **Keter (Crown)** to **Malkhut (Kingdom)**—the manifestation of Divine Will.

Technical Detail: The **TETs Themselves** are the crystallized ‘facts’ of the universe.

Metaphysical Correspondence: Each TET is a **Malkhut (Kingdom)**, a complete but limited expression of the entire divine pattern in miniature.

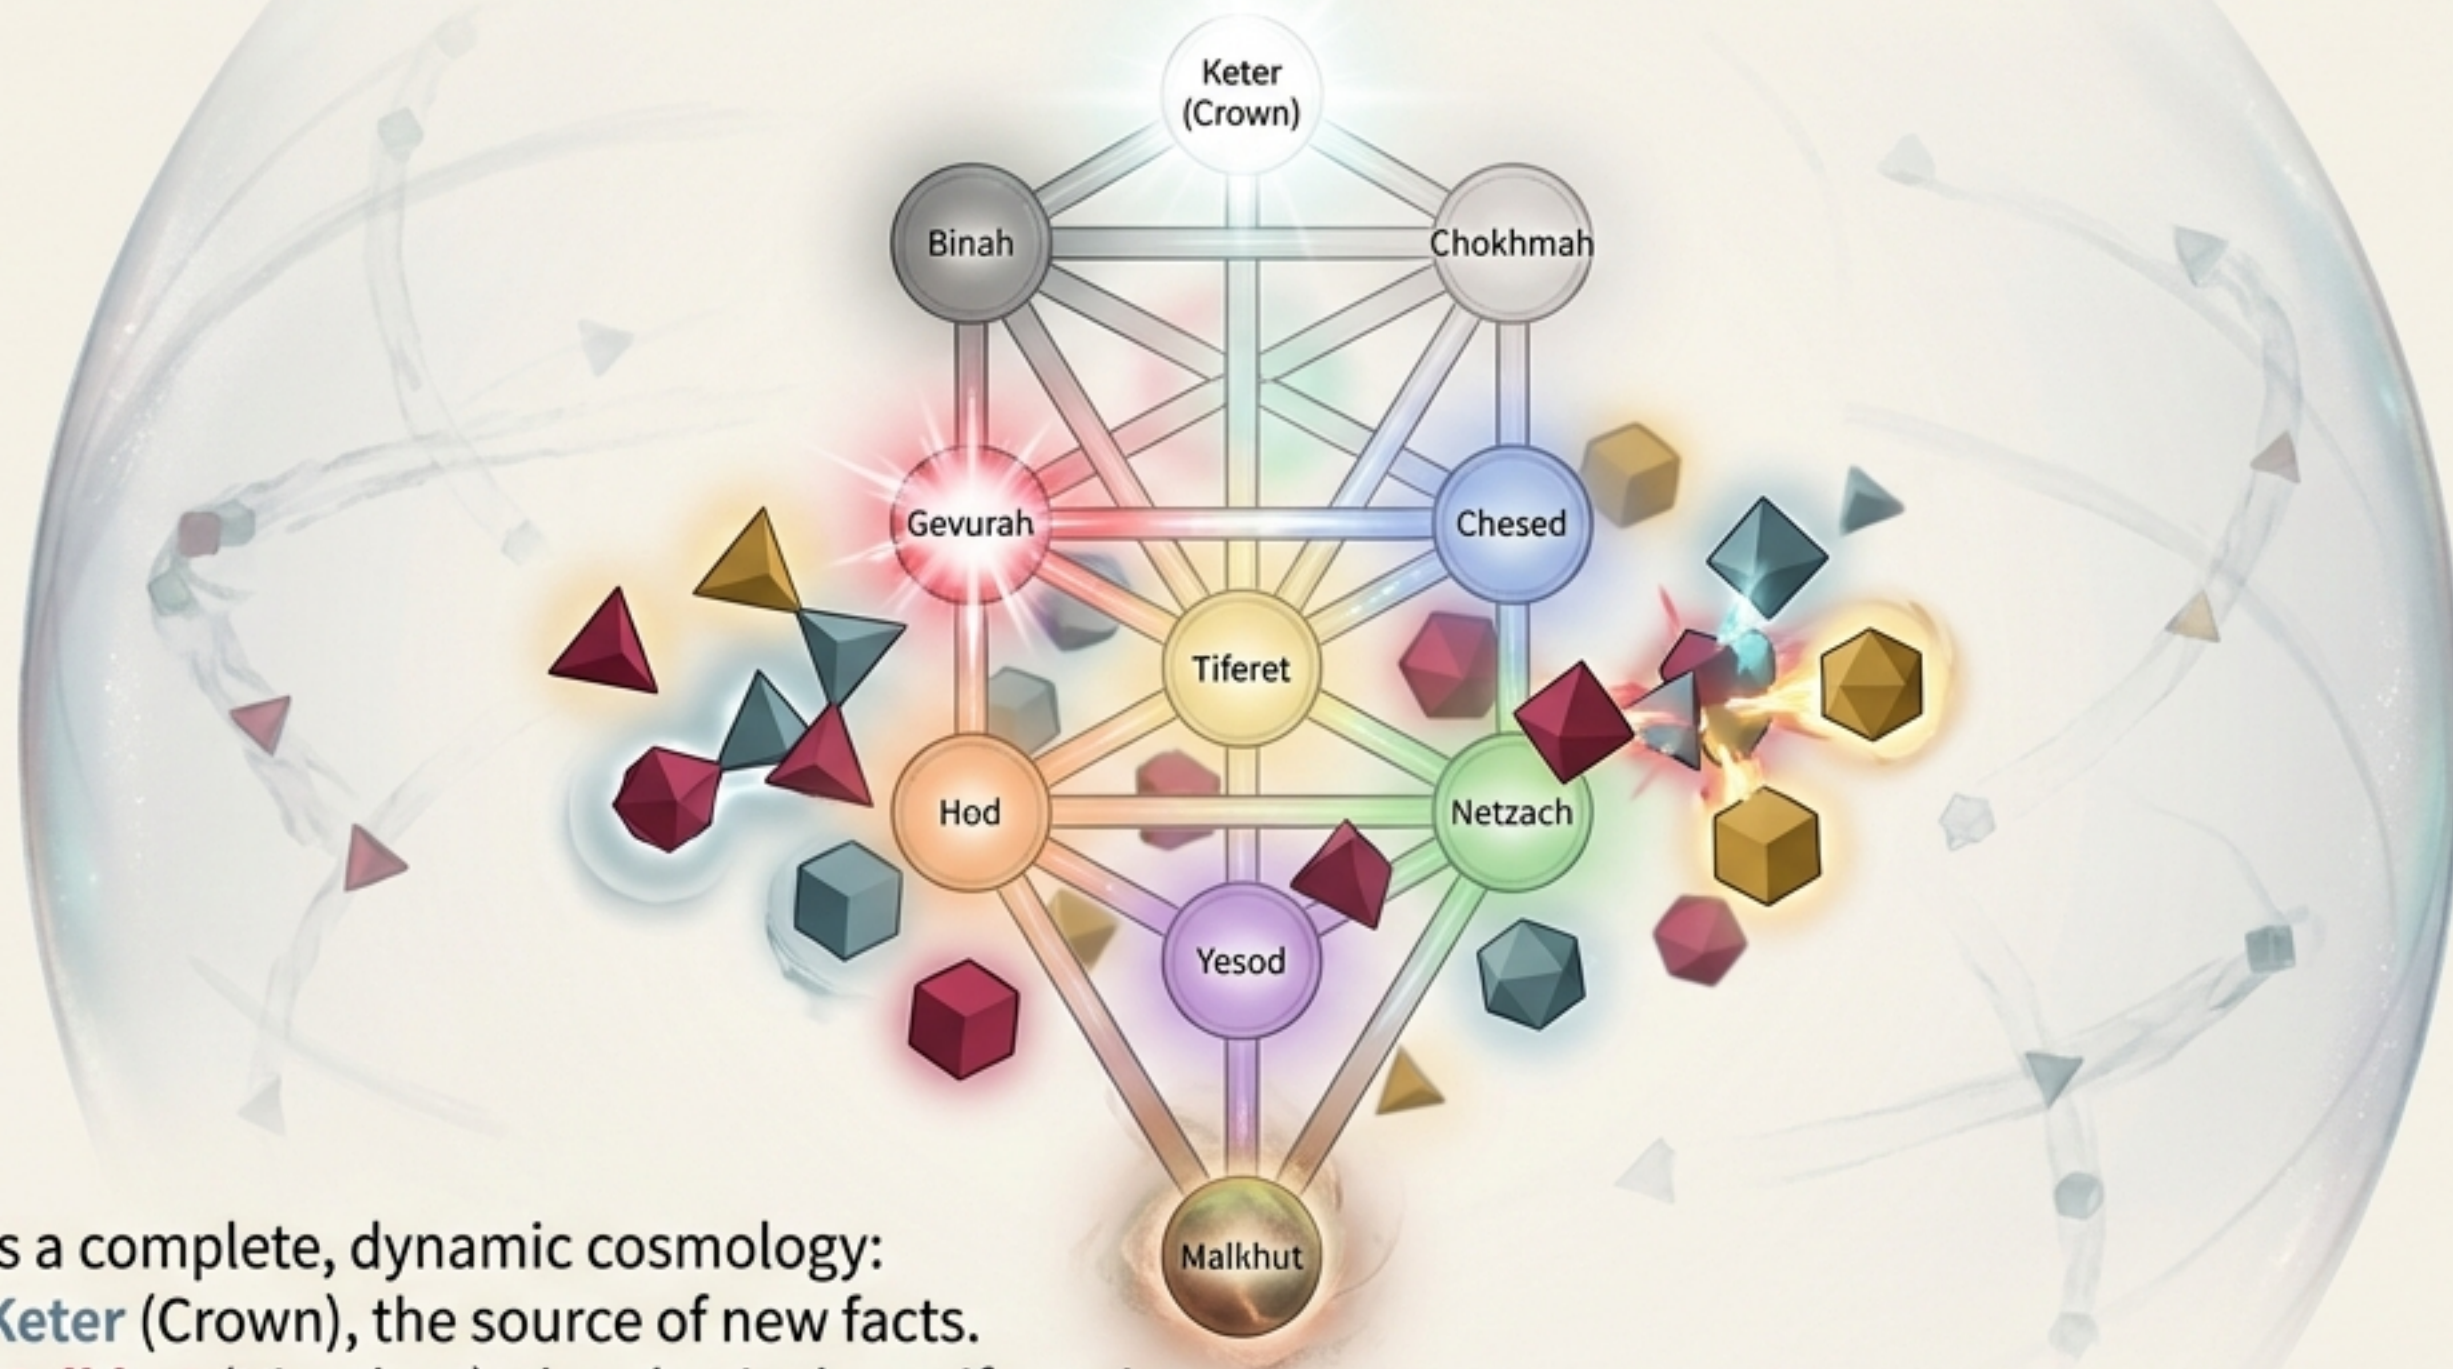

The Player as Prime Observer

This model assumes the player as God, the prime observer missing from quantum theory.

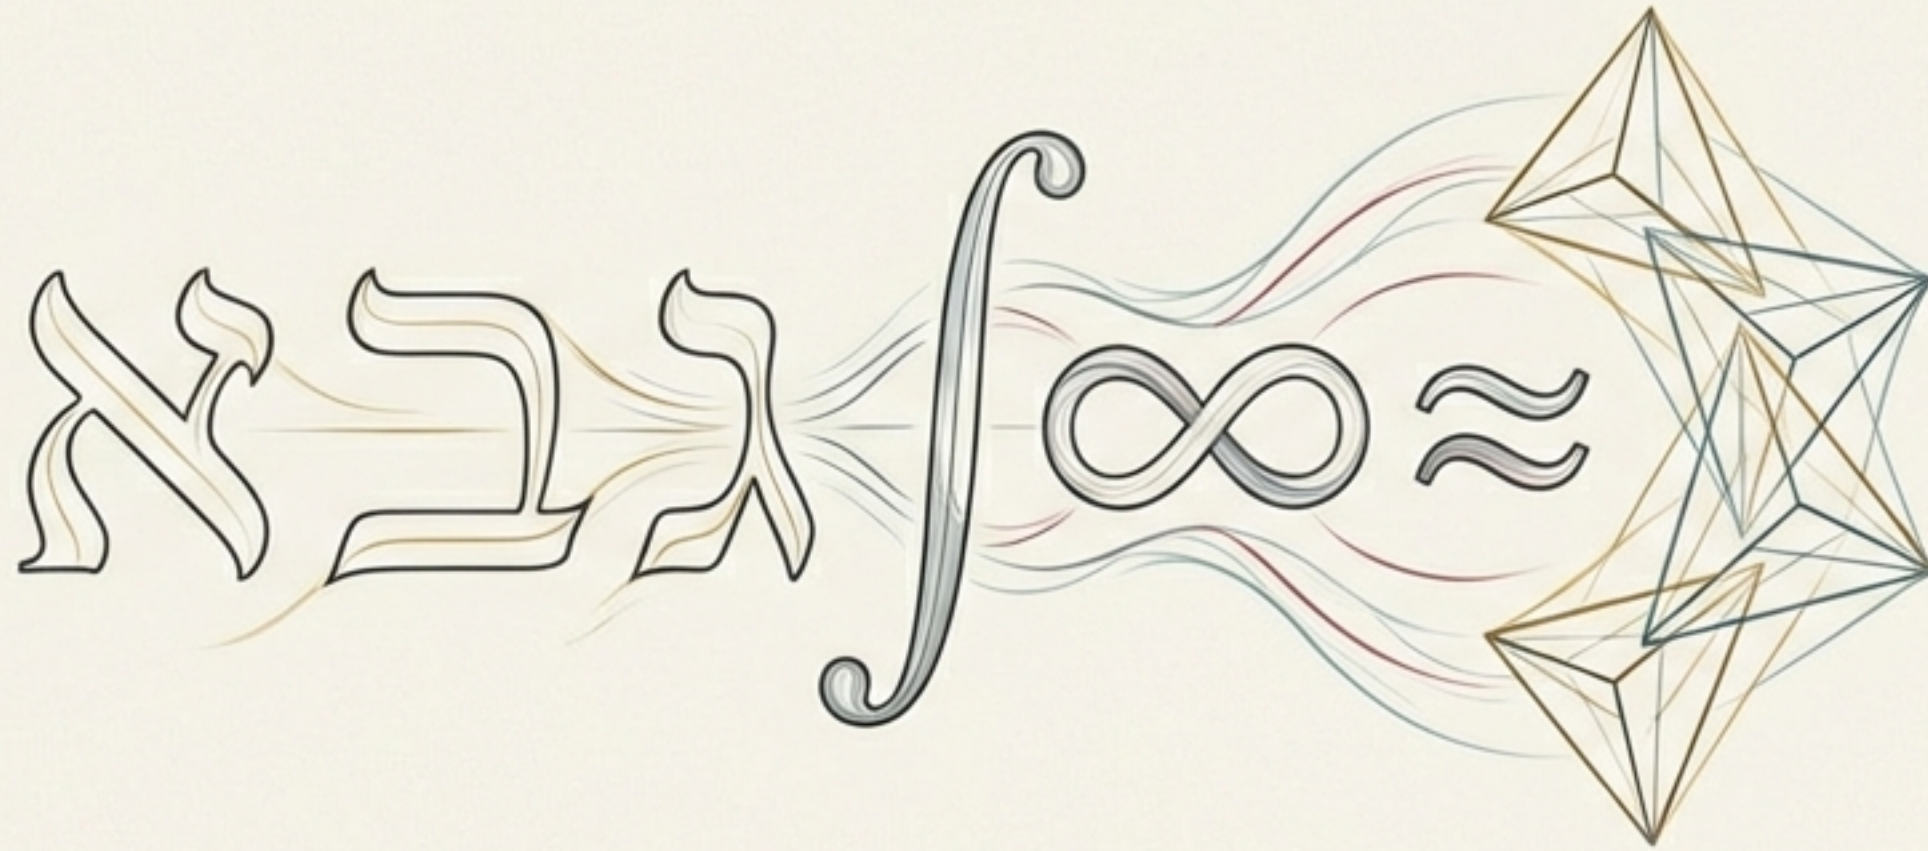

- Pressing **SPACE** creates a new fact (TET) to be misunderstood.
- **Connecting TETs** slowly coheres disconnected facts into (mis)understanding.
- The player's camera is **Da'at (Knowledge)**, the non-Sefirah that allows perception of the whole.

A Dynamic Tree of Life

The simulation is a complete, dynamic cosmology:

- * The Player is **Keter** (Crown), the source of new facts.
- * The TETs are **Malkhut** (Kingdom), the physical manifestation.
- * The **Forces** (magnetism, attraction) are the paths of **Chesed**, **Gevurah**, **Netzach**, **Hod**.
- * The **Reactions** are the process of **Yesod** (Foundation).
- * The 4D Past Projection surrounding the universe is **Ain Sof** (The Infinite), the boundless potential from which all forms emerge.

The Language of Creation

Kabbalah holds that the universe is built from language and number—the 10 Sefirot and 22 Hebrew letters form “32 mystical paths of wisdom.”

- In **TET~CRAFT**, the “**letters**” are the rules of geometric interface.
- The “**words**” are the emergent molecules, each a unique combination of paths.
- The simulation is a search for a new **grammar** of existence.

The Cosmic Scale

The computational requirements to simulate our observed reality with this model are staggering, yet not impossible.

~3,000 Earths

working for 500k years
could build a machine to
simulate our solar system.

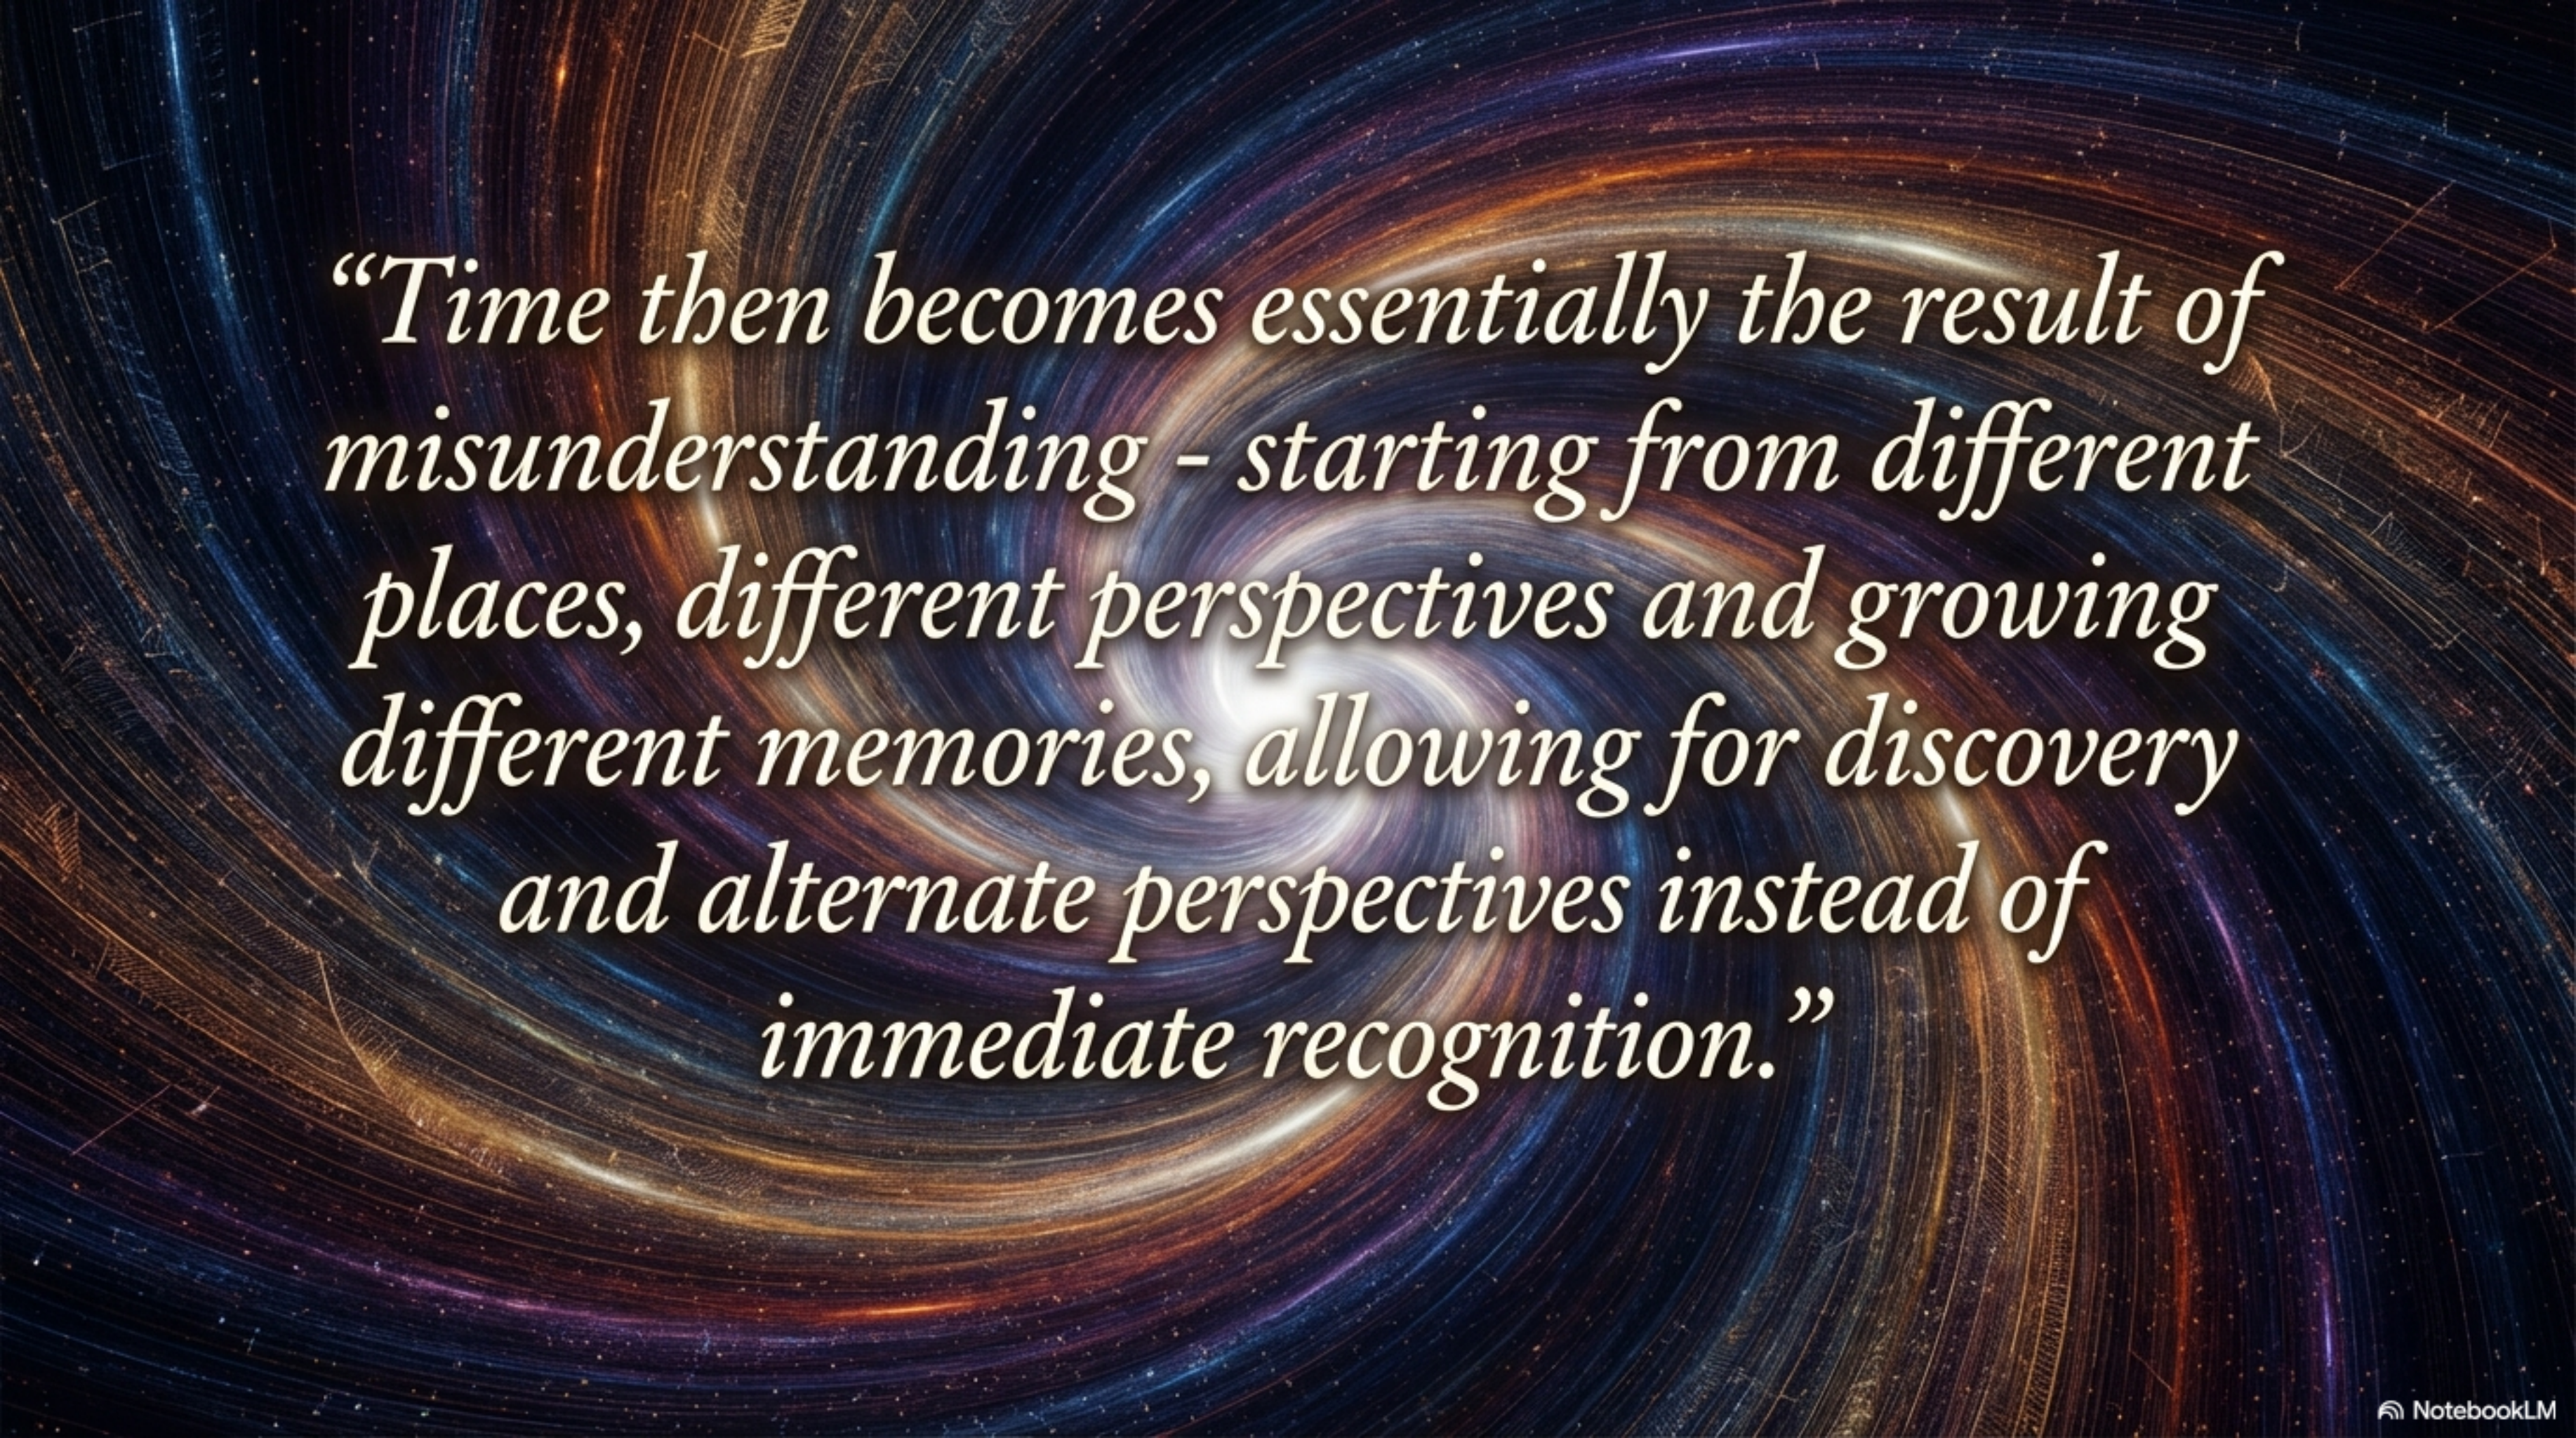

~5 Dyson spheres

and $\sim 10^{13}$ planets could
simulate the entire Milky Way
down to the atom.

~300 planets

could simulate the Milky
Way to the complexity
of a single star.

“Time then becomes essentially the result of misunderstanding - starting from different places, different perspectives and growing different memories, allowing for discovery and alternate perspectives instead of immediate recognition.”
